Rising To The Challenge In Asia A Study Of Financial Markets Volume 9 Pakistan:

Rising to the Challenge in Asia: Pakistan Asian Development Bank,1999 *Explaining Pakistan's Long-Run Growth* Moazam Mahmood,Rabia Ikram,2025-05-14 This book explains the behaviour of output and its growth over time It does so by deliberating over a choice among three fundamental models the Samuelson Swan Solow neoclassical model the Harrod Domar model and the Keynesian model to choose one fit for purpose The criteria for goodness of fit are some mathematical properties of growth models The model chosen for meeting these properties is the Keynesian model which is a bit better on all these counts The chosen Keynesian model of aggregate demand has been used to explain the observed behaviour of Pakistan s long run growth of gross domestic product GDP Pakistan s GDP growth over the long run between 1973 and 2019 is marked by a statistically significant hiatus at approximately 1992 Pre 1992 GDP growth on trend approximated 6 percent per annum Post 1992 it drops on trend to approximately 4 percent per annum Applied to the hiatus in Pakistan s GDP growth after 1992 this model shows that pre 1992 high GDP growth is explained by high investment growth paired with a low marginal propensity to consume MPC while post 1992 lowered GDP growth is explained by lower investment growth paired with a higher MPC Thus Pakistan s higher GDP growth pre 1992 was investment led while its lower GDP growth post 1992 has been consumption led The book then traces the causality of these trends in investment and consumption to a falling trend in public investment This is linked to an increasingly austere regulatory policy environment while private investment fails to step in and maintain aggregate investment Labor Market Distortions, Rural-Urban Inequality, and the Opening of the People's Republic of China Economy Thomas Hertel,2008-05 Evaluates the impact of some key factor market reforms on rural urban inequality income distribution using a household disaggregated recursive dynamic computable general equilibrium model of the People s Republic of China It also explores how these factor market reforms interact with product market reforms currently under way as part of the country s World Trade Org WTO accession process The simulation results show that reforms in the rural land rental market hukou system as well as increasing off farm labor mobility would reduce the urban rural income ratio dramatically Furthermore the combination of WTO accession factor market reforms improves both efficiency equality significantly Charts tables graphs **Practices of Poverty Measurement and Poverty Profile of Nepal** Devendra Chhetry,2009-03 Reviews the poverty measuring practices available measures of poverty and economic growth figures of Nepal The poverty rates for FY 1976 77 1984 85 and 1995 96 are found to be not comparable due to change in methodology over time The three poverty rates average 40% Nepal has experienced high economic growth during the 7th 1985 86 to 1989 90 and 8th 1992 93 to 1996 97 Plan periods with no strong evidences of poverty reduction This incompatible result is partially explained by comparing growth of the agricultural sector with the role of the sector in providing employment and income generation at the household level and by comparing social indicators particularly literacy rate with the growth of the nonagricultural sector Tables **Monetary Poverty Estimates in Sri Lanka** Neranjana

Gunetilleke,2008-05 Provides an introduction to poverty related data available in Sri Lanka monetary measurements of poverty carried out using this data The lack of an official poverty line in Sri Lanka until June 2004 has over time generated a number of poverty lines corresponding poverty measures While these poverty measures have provided a good base for poverty analysis this paper also touches on the problems generated by the use of multiple methods The release of the official poverty line by the Dept of Census Statistics can be seen as a major step forward in the debate on poverty measurement in Sri Lanka Charts tables

Measuring Competitiveness in the World's Smallest Economies Ganeshan

Wignaraja,2008-05 Attempts to measure competitiveness CP across countries have typically neglected the world s smallest economies Hence a simple composite index the Small State Manufactured Export CP Index or SSMECI was developed to benchmark industrial CP The SSMECI represents the first attempt to provide a comprehensive picture of the CP performance of small states The performance of small states varies across geographical regions income groups country size classes High performing small states had better macroeconomic conditions higher levels of foreign invest more trade openness better levels of educ modern infrastructure A coherent market oriented CP strategy in small states is vital to success on international markets Tables

Economic Growth and Poverty Reduction in Viet Nam Arsenio M. Balisacan,2011-04

Viet Nam s dramatic transition and growth in the 1990s have been attributed to a series of reforms known as doi moi which began in the late 1980s Economic growth of nearly 8% yearly benefited the poor and reduced poverty from 61% in 1993 to 37% in 1998 The proportionate increases in the incomes of the poorest quintile were appreciably larger than those of the top 20 or 40% of the population This result is at variance with typical findings for other countries which indicate that welfare gains from growth are smallest for the lowest quintile and rise with income group The results for Viet Nam suggest that the faster the growth rate the lesser becomes the role of distributive factors that directly influence the poor s well being A print on demand report *Poverty Estimates in India* Savita Sharma,2004 *Foreign Exchange Reserves, Exchange Rate*
