Risk Management and Regulation Tobias Adrian,2018-08-01 The evolution of risk management has resulted from the

interplay of financial crises risk management practices and regulatory actions In the 1970s research lay the intellectual foundations for the risk management practices that were systematically implemented in the 1980s as bond trading revolutionized Wall Street Quants developed dynamic hedging Value at Risk and credit risk models based on the insights of financial economics In parallel the Basel I framework created a level playing field among banks across countries Following the 1987 stock market crash the near failure of Salomon Brothers and the failure of Drexel Burnham Lambert in 1996 the Basel Committee on Banking Supervision published the Market Risk Amendment to the Basel I Capital Accord the amendment went into effect in 1998 It led to a migration of bank risk management practices toward market risk regulations The framework was further developed in the Basel II Accord which however from the very beginning was labeled as being procyclical due to the reliance of capital requirements on contemporaneous volatility estimates Indeed the failure to measure and manage risk adequately can be viewed as a key contributor to the 2008 global financial crisis Subsequent innovations in risk management practices have been dominated by regulatory innovations including capital and liquidity stress testing macroprudential surcharges resolution regimes and countercyclical capital requirements Republic of Moldova International Monetary Fund. Monetary and Capital Markets Department,2016-02-29 The National Bank of Moldova NBM has made significant progress in reinforcing its prudential and supervisory framework Two medium term strategies have been designed in succession since 2008 to set a forward looking approach for supervision The most recent one spanning four years 2013 17 aims to ensure a higher level of efficiency transparency and performance of the NBM by bringing the best international practices particularly in the area of corporate governance The country is also in the process of transitioning from Basel I to Basel II In the context of an Association Agreement to be signed with the European Union EU 2 the NBM plans to implement the standard risk weighting model of Basel II as well as other elements of Basel III The objective is to enhance the NBM s institutional capacity with the view to foster the banks prudential regulatory framework The association process will also enable NBM to gradually implement the EU Capital Requirements Regulation and Directive CRR CRD
