Risk Taking And Decision Making:

Risk Taking and Decision Making, 1998-02 Risks are an integral part of complex high stakes decisions and decisionmakers are faced with the unavoidable tasks of assessing risks and forming risk preferences This is true for all decision domains including financial environmental and foreign policy domains among others How well decisionmakers deal with risk affects to a considerable extent the quality of their decisions This book provides the most comprehensive analysis available of the elements that influence risk judgments and preferences The book has two dimensions theoretical and comparative historical The study of risk taking behavior has been dominated by the rational choice approach Instead the author adopts a socio cognitive approach involving a multivariate theory integrating contextual cognitive motivational and personality factors that affect an individual decisionmaker's judgment and preferences the social interaction and structural effects of the decisionmaking group and its organizational setting and the role of cultural societal values and norms that sanction or discourage risk taking behavior The book's theoretical approach is applied and tested in five historical case studies of foreign military interventions The richly detailed empirical data on the case studies make them metaphorically speaking an ideal laboratory for applying a process tracing approach in studying judgment and decision processes at varying risk levels The case studies analyzed are U S interventions in Grenada in 1983 and Panama in 1989 both low risk Soviet intervention in Czechoslovakia in 1968 moderate risk U S intervention in Vietnam in 1964-68 high risk and Israel's intervention in Lebanon in 1982-83 high risk

Risk assessment and risk management in regulatory decision-making United States. Presidential/Congressional Commission on Risk Assessment and Risk Management, 1997 *Overconfidence and Risk Taking in Foreign Policy Decision Making* Imran Demir, 2017-03-24 This book introduces a new perspective on risk seeking behaviour developing a framework based on various cognitive theories and applying it to the specific case study of Turkey's foreign policy toward Syria The author examines why policy makers commit themselves to policies that they do not have the capacity to deliver and develops an alternative theoretical model to prospect theory in explaining risk taking behaviour based on the concept of overconfidence The volume suggests that overconfident individuals exhibit risk seeking behaviour that contradicts the risk averse behaviour of individuals in the domain of gain as predicted by prospect theory Using a set of testable hypothesis deduced from the model it presents an empirical investigation of the causes behind Turkish decision

Uncertainty Kerstin Preuschoff, Peter N. C. Mohr, Ming Hsu, 2015-06-16 Most decisions in life are based on incomplete information and have uncertain consequences To successfully cope with real life situations the nervous system has to estimate represent and eventually resolve uncertainty at various levels A common tradeoff in such decisions involves those between the magnitude of the expected rewards and the uncertainty of obtaining the rewards For instance a decision maker may choose to forgo the high expected rewards of investing in the stock market and settle instead for the lower expected reward and much less uncertainty of a savings account Little is known about how different forms of uncertainty such as risk or ambiguity are processed and learned about and how they are integrated with expected rewards and individual preferences throughout the decision making process With this Research Topic we aim to provide a deeper and more detailed understanding of the processes behind decision making under uncertainty

Risk Taking Herbert S. Kindler, 1990 Risk is everywhere and often avoiding one risk backs us into another The issue for people in organizations is not whether to take risks but how to take reasonable risks The first edition of this book presented a systematic way of evaluating risks and a three step process for making decisions in risky situations The revision looks at the anatomy of decisions in a new way and integrates new studies and information developed over the 8 years since the original publication

Food safety risk management: Evidence-informed policies and decisions, considering multiple factors Food and Agriculture Organization of the United Nations, 2018-06-15 These FAO guidance materials were developed to support food safety risk managers and policy makers in applying structured evidence informed processes to decision making Food safety issues can have widespread impacts beyond public health They may contribute to or detract from the achievement of goals in areas including nutrition food security food trade and market access economic and rural development The risk analysis paradigm guides risk managers to ensure their decisions are based on an assessment of risks to health and consideration of other factors in choosing the preferred risk management decision The materials assist decision makers in applying a multi factor approach and is applied to two key decision areas setting food safety priorities and selecting risk management options The principles and approaches can be applied to all food safety decisions Case studies are included as examples of how to apply this decision making process Using this guidance will lead to improved food safety decisions where decision makers can demonstrate how evidence was used and any trade offs made It also facilitates stakeholder engagement transparency and accountability throughout the decision making process

The Rules of Project Risk Management Robert James Chapman,2016-02-24 The evidence continues to grow that the effective management of risk is the very kernel of successful project management Its absence frequently leaves project sponsors lamenting missed objectives and shareholders coming to terms with an organisation s poor bottom line performance Dr Robert Chapman s The Rules of Project Risk Management stands out from other risk management texts because it provides very practical guidance supported by numerous mini case studies many of which have attracted considerable publicity The book brings to life both the benefits of project risk management when effectively applied and the ramifications when it is misunderstood or receives scant attention The structure of the book is based on International Standard ISO 31000 seen through the lens of general systems theory where projects are undertaken by organisations which have an external context and internal sub systems A project system is seen to be composed of seven key subject areas Practical short rules or implementation guidelines written in an engaging style are offered to support each of these subject areas and aid quick assimilation of key risk management messages Each rule focuses on a specific aspect of effective risk management which warrants attention in its own right Taken together the rules will provide those implementing projects with the building blocks to secure a project s objectives They have been drawn from a wealth of experience gained from applying risk management practices across multiple industries from Europe to Africa the Middle East and Asia

Uncertainty in Risk Assessment, Risk Management, and Decision Making V.T. Covello,Lester B. Lave,Alan Moghissi,V.R.R. Uppuluri,2013-03-08 The subject of this volume uncertainties in risk assessment and management reflects an important theme in health safety and environmental decision making Most technological hazards are characterized by substantial uncertainty Recent examples include nuclear waste disposal acid rain asbestos in schools carcinogens in food and hazardous waste dealing with such uncertainty is arguably the most difficult and challenging task facing risk assessors and managers today Four primary sources of uncertainty in risk assessment and management can be identified 1 uncertainties about definitions 2 uncertainties about scientific facts 3 uncertainties about risk perceptions and attitudes and 4 uncertainties about values Uncertainties about definitions derive primarily from disagreements about the meaning and interpretation of key concepts such as probability Uncertainties about scientific facts derive primarily from disagreements about failure modes the probability and magnitude of adverse health or environmental consequences cause and effect relationships dose response relationships and exposure patterns Uncertainties

about risk perceptions and attitudes derive primarily from disagreements about what constitutes a significant or acceptable level of risk. Uncertainties about values derive primarily from disagreements about the desirability or worth of alternative risk management actions or consequences. The papers in this volume address each of these sources of uncertainty from a variety of perspectives. Reflecting the broad scope of risk assessment and risk management research, the papers include contributions from safety engineers, epidemiologists, toxicologists, chemists, biostatisticians, biologists, decision analysts, economists, psychologists, political scientists, sociologists, ethicists, and lawyers.

Psychology of Decision Making in Risk Taking and Legal Contexts Rachel N. Kelian, 2008. In a fast moving world, the necessity of making decisions and preferably good ones has become even more difficult. One reason is the variety and number of choices perhaps available which often are not presented or understood. Alternatives are often unclear and complex paths to them confusing and misleading. Thus the process of decision making itself requires analysis on an ongoing basis. Decision making is often made based on cultural factors whereas the best alternative might be quite different. The subject touches ethics aspects as well as psychological considerations. This book presents important research on the psychology of decision making and risk taking.

Decision Making, Assessment and Risk in Social Work Brian J. Taylor, 2017-04-10. At a time when accountability and the avoidance of risk are increasingly demanded of social workers, the ability to make clear and informed decisions is essential. This book, written for practicing social workers undertaking their ASYE and compulsory CPD, has been designed to help professionals make sound judgments in increasingly complex contexts and under pressure. The focus is on empowering front line professionals through reflective practice so that they are able to draw on multiple factors and perspectives and make sound problem solving judgements. The book begins with the core concepts: client focus and legal background, before moving on to consider the collaborative processes and the nature of individual judgements. It then considers particular dimensions of social work decision making such as safeguarding, taking risks, assessment and dynamic decision tools and processes. It then concludes by looking at the organisational context of decision management with a focus on supervision, training and effective communication.

Call to Teacher Leadership Sally J. Zepeda, R. Stewart Mayers, Brad Benson, 2013-09-27. The Call to Teacher Leadership demonstrates the many ways teachers can be leaders without having to opt out of the classroom full time. It examines formal leadership positions: instructional coordinators, lead teachers, department chairs, etc., as well as informal leadership roles: nurturing colleagues, supporting the instructional program, participating in decision making, etc. With practical examples and case studies, this book provides details about how teachers have participated in the leadership of their schools and districts. Examples come from elementary, middle, and high schools across the country.
