The Innovation Butterfly

Edward G. Anderson Jr., Nitin R. Joglekar, 2012-06-01. Product and service innovations are the result of mutually interacting creative and coordination tasks within a system that has to balance technical decisions, marketplace taste, personnel management, and stakeholder commitment. The constituent elements of such systems are often scattered across multiple firms and across the globe and constitute a complex system consisting of many interacting parts. In the spirit of the butterfly effect, metaphorically describing the sensitivity to initial conditions of chaotic systems, this book builds an argument that innovation butterflies can, in the short term, take up significant amounts of effort and sap efficiencies within individual innovation projects. Such innovation butterflies can be prompted by external forces such as government legislation or unexpected spikes in the price of basic goods such as oil, unexpected shifts in market tastes, or from a company manager's decisions or those of its competitors. Even the smallest change, the smallest disruption to this system, can steer a firm down an unpredictable and irreversibly different path in terms of technology and market evolution. In the long term, they can shift the balance of the entire innovation portfolio into unplanned directions. More importantly, we describe how

innovation leaders can influence the emergent behavior of the system for good or ill The first half of the book draws parallels from physics economics and sociology as well as evidence from multiple industries to describe the structural and behavioral causes of emergent phenomena in innovation settings as well as their often negative impacts In the second half of the book we turn to distributed management of innovation under emergence We show that innovation butterflies if improperly managed most often lead to negative outcomes On the other hand it is also argued that while the complexity of the innovation system and the desire to experiment and try new and emergent alternatives precludes precise planning innovation leaders can actually tame innovation butterflies through the design and implementation of appropriate processes strategies tools and leadership choices

Gaming at the Edge Adrienne Shaw, 2015-01-01 Video games have long been seen as the exclusive territory of young heterosexual white males In a media landscape dominated by such gamers players who do not fit this mold including women people of color and LGBT people are often brutalized in forums and in public channels in online play Discussion of representation of such groups in games has frequently been limited and cursory In contrast *Gaming at the Edge* builds on feminist queer and postcolonial theories of identity and draws on qualitative audience research methods to make sense of how representation comes to matter In *Gaming at the Edge* Adrienne Shaw argues that video game players experience race gender and sexuality concurrently She asks How do players identify with characters How do they separate identification and interactivity What is

the role of fantasy in representation What is the importance of understanding market logic In addressing these questions Shaw reveals how representation comes to matter to participants and offers a perceptive consideration of the high stakes in politics of representation debates Putting forth a framework for talking about representation difference and diversity in an era in which user generated content individualized media consumption and the blurring of producer consumer roles has lessened the utility of traditional models of media representation analysis Shaw finds new insight on the edge of media consumption with the invisible marginalized gamers who are surprising in both their numbers and their influence in mainstream gamer culture
