Teaching and Learning Japanese Martial Arts: Scholarly Perspectives, Vol. 2 Michael DeMarco, 2017-03-21

In contrast to the overabundance of writings about martial arts that are often promotional and misinformative there are rare works by scholars that are praiseworthy for their sincere unbiased approach to writing. This is the very definition of scholarly. This two volume anthology brings together the best scholarly works published in the Journal of Asian Martial Arts on the topic of teaching and learning Japanese martial arts. In this second volume you'll find eight chapters that dive deep into Japanese martial traditions combining aspects of history and culture that explain how teaching methods developed and evolved. Chapter one asks What defines and gives meaning to the practice of karate. The Dr Wingate looks to the ideology of karate as presented in the writings of founder Gichin Funakoshi and traditional Japanese martial arts as ways of self cultivation. This ideology is often greatly different from the ideology held by modern practitioners. This chapter explores the differences. Next Dr Donohue comments on the ideological complex surrounding training in the Japanese martial traditions. These systems while remaining relatively uniform through time have in fact been subject to considerable philosophical interpretation and emphasis. Why many practice martial artists has little to do with the essential nature of these arts. Dr Grossman presents a thesis in his chapter that we can arrive at a deeper understanding of any martial arts using aikido as an example if we consider it to be a symbolic form of communication as well as a martial art and utilize the science of semiotics to translate the message encoded in the body language of aikido techniques. A photographic technical section illustrates this process. The next chapter by Sakuyama Yoshinaga discusses the potential growth for learning in children. How can adults provide the best learning environment. The author believes that inspiration comes through subtle emotions of the human heart influencing others. The theory is found in ancient samurai traditions and applied by the author in teaching Shorinji Kempo. Chapter five by Dr Dykhuizen point out how Asian martial arts are being practiced in cultures other than those within which they originated. Specific information concerning how practitioners from different cultures understand them becomes increasingly useful to martial artists and martial arts scholars. This chapter summarizes findings of an investigation among aikido practitioners. The Japanese Imperial family is said to have been given three symbols of authority by the gods a mirror a jewel and a sword. Dr Donohue uses this symbolic structure to discuss varying perspectives on the Japanese martial arts. Each aid in our understanding and appreciation of the multifaceted dimensions of the martial arts. In his chapter Dr Edinborough examines how Japanese martial arts specifically the approach developed by Inaba Minoru can be functionally understood as a form of art. Through referring to the aesthetic theories the article examines budo as a means of organizing experience recognizable alongside painting dance theater and literature. The final chapter by Marvin Labbate looks close at the training hall. Dressed in a uniform students line up in a ready position come to attention sit meditate and bow. This ritualized pattern is performed at the beginning during and at the end of each class but what does it

mean In this chapter each element of the ritualized pattern will be discussed to provide a clear understanding of its original intent If you are interested in Japanese martial traditions you will find much in these eight chapters that clarify why the arts are taught according to a longstanding tradition and also why there have been evolutionary changes in the instructional methods There is sound logic for the old traditions as well as for the changes The scholarly research presented in this anthology will improve a teacher s way of instructing and help a student understand what to expect out of his or her studies

Medieval Warrior Cultures of Europe and Japan: Body, Mind, Sword Michael DeMarco,2015-11-17 There are similarities and differences between the European and Japanese medieval warrior traditions that reflect the social evolutions within those cultures Over the years publishing the *Journal of Asian Martial Arts* we published articles that presented the main themes found in this unique area of comparative studies The most important of these writings are assembled in this anthology for your convience Chapters 1 and 2 are by Dr Willy Pieter a leading scholar with a thorough grasp of European and Japanese martial art traditions His first chapter examines the feudal system and how aspects of social organization helped form the warrior ethic resulting in a mix of scientific and intuitive elements In the second chapter Dr Pieter illustrates how the perception of the human body and mind are culturally different in the East and West Westerners have a long tradition of dualism which separates the body and mind while the Eastern approach has been wholistic The author discusses scientific and medical histories for insight particularly Chinese and European influences on Japan In the third chapter John Michael Greer presents the esoteric side of a European sword tradition as found in the writings of Dutch fencing master Gerard Thibault ca 1574 1627 He notes that Asian and Western combat systems havebeen understood in sharply different ways over the last century or so Asian combatives came to be associated with Eastern spiritual traditions and seemed to be very different than any Western combative system However this short chapter shows that there is actually much in common In the final chapter Matthew Galas compares and contrasts the sword arts in Germany with the classical Japanese martial traditions The period covered by this inquiry reaches from approximately 1350 until 1600 The focus is on general principles and combat philosophy The study reveals that German sword techniques were as effective as their counterparts in feudal Japan The content in this anthology is usefull for anyone interested in either or both European and Japanese martial art traditions exemplified during their medieval periods Enjoy reading this special anthology dedicated to two leading warrior traditions

Ultimate Fighting and Embodiment Dale C. Spencer, 2013-06-19 Mixed martial arts (MMA) is an emergent sport where competitors in a ring or cage utilize strikes, punches, kicks, elbows and knees as well as submission techniques to defeat opponents. This book explores the carnal experience of fighting through a sensory ethnography of MMA and how it transgresses the cultural scripts of masculinity in popular culture. Based on four years of participant observation in a local MMA club and in-depth interviews with amateur and professional MMA fighters, Spencer documents fighters' training regimes and the meanings they attach to participation in the sport. Drawing from the philosophical phenomenology of Martin Heidegger, Maurice Merleau-Ponty and Jean-Luc Nancy, this book develops a body-centered ontological and epistemological grounding for this study. Guided by such a position, it places bodies at the center of analysis of MMA and elucidates the embodied experience of pain and injury and the sense and rhythms of fighting.

Japanese History & Culture from

Ancient to Modern Times John W. Dower, 1986 **Castles in Japan** Morton S. Schmorleitz, 2011-12-15 Behind the glossy facade of modern Japan there survive remnants some of them surprisingly well preserved of the country's feudal past of warlords and fighting samurai of shoguns and sequestered emperors of princes and peasants This book vividly presents the castles of Japan more than 80 of them altogether ranging geographically from Matsumae on the northern island of Hokkaido to Kagoshima in southern Kyushu The author brings not only an immense knowledge but also a deep feeling for Japan and things Japanese to this sensitive study formed from both the historian's and the sightseer's perspectives Most of the Japanese castles he explains were built in several amazing decades at the end of the 16th century The Tokugawa shogunate was then consolidating its power and local lords were girding themselves for the onslaughts of enemies supplied with that recent acquisition from the West firearms Castle architecture among the most original of Japanese architectural forms manifested a diabolically shrewd defense capability An unwary enemy if unwary he were might charge into a veritable chamber of horrors stone dropping chutes hidden gates sharply curved passageways flooded moats trap doors and floor boards that squeaked to warn of an intruder's arrival In Japanese style many even contained special suicide courts
