Securing Nuclear Weapons And Materials:

Securing Nuclear Materials Mary Beth Nikitin, 2010-09 Contents 1 Intro 2 The Summit Expected Summit Outcomes Foreign Reactions to the Summit The Non Proliferation Treaty and Nuclear Security 3 What is Nuclear Security NS 4 Challenges to Achieving the Four Year Goal 5 Domestic NS Measures 6 Multilateral Efforts to Improve NS The IAEA and NS Informal Initiatives and Non Proliferation Assistance 7 Role of Non Governmental Org and Industry 8 Considerations and Options for Congress Legislation in the 111th Congress NS and the FY 2011 Congressional Budget Request Appendix A Multilateral NS Related Instruments and Initiatives Appendix B U S NS Assistance to Foreign Countries Strengthening Long-Term Nuclear Security Russian Academy of Sciences, National Research Council, Policy and Global Affairs, Development, Security, and Cooperation, Office for Central Europe and Eurasia, Committee on Indigenization of Programs to Prevent Leakage of Plutonium and Highly Enriched Uranium from Russian Facilities, 2006-02-22 In July 2005 the National Academies released the report Strengthening Long term Nuclear Security Protecting Weapon Usable Material in Russia The report highlighted several obstacles in the transition from a U S Russian cooperative program to a Russian directed and Russian funded fully indigenized program that will ensure the security of 600 tons of weapon usable nuclear material at a level of international acceptability Overcoming these obstacles requires an increased political commitment at a number of levels of the Russian Government to modern material protection control and accounting systems MPC A Adequate resources must be provided to facilities where weapon usable material is located for upgrading and maintaining MPC A systems Additionally the technical security systems that are being installed through the cooperative program need to be fully embraced by Russian managers and specialists The report recommends the establishment of a ten year indigenization fund of about 500 million provided by Russia and its G 8 partners as a new mechanism for gradually shifting the financial burden of MPC A to the Russian Government

Understanding and Managing Risk in Security Systems for the DOE Nuclear Weapons Complex National Research Council, Division on Earth and Life Studies, Nuclear and Radiation Studies Board, Committee on Risk-Based Approaches for Securing the DOE Nuclear Weapons Complex, 2011-05-07 A nuclear weapon or a significant quantity of special nuclear material SNM would be of great value to a terrorist or other adversary It might have particular value if acquired from a U S facility in addition to acquiring a highly destructive tool the adversary would demonstrate an inability of the United States to protect its nuclear assets The United States expends considerable resources toward maintaining effective security at facilities that house its nuclear assets However particularly in a budget constrained environment it is essential that these assets are also secured efficiently meaning at reasonable cost and imposing minimal burdens on the primary missions of the organizations that operate U S nuclear facilities It is in this context that the U S Congress directed the National Nuclear Security Administration NNSA a semi autonomous agency in the U S Department of Energy DOE responsible for securing nuclear weapons and significant quantities of SNM asked the National Academies for

advice on augmenting its security approach particularly on the applicability of quantitative and other risk based approaches for securing its facilities In carrying out its charge the committee has focused on what actions NNSA could take to make its security approach more effective and efficient The committee concluded that the solution to balancing cost security and operations at facilities in the nuclear weapons complex is not to assess security risks more quantitatively or more precisely This is primarily because there is no comprehensive analytical basis for defining the attack strategies that a malicious creative and deliberate adversary might employ or the probabilities associated with them However using structured thinking processes and techniques to characterize security risk could improve NNSA s understanding of security vulnerabilities and guide more effective resource allocation

Securing Nuclear Weapons and Materials Matthew Bunn,John P.

Holdren,Anthony Wier,2002 In a new report Harvard experts outline seven immediate steps that should be taken to keep nuclear weapons and their essential ingredients out of terrorist hands and steps for consideration at the upcoming Bush Putin summit and beyond The report warns that even after September 11 the size and speed of the U S and global response to the threat of nuclear terrorism are not remotely commensurate with the threat Web site

Protection, Control, and Accounting of Nuclear Materials National Research Council,Policy and Global Affairs,Development, Security, and Cooperation,2006-01-31 The U S and Russian academies convened a workshop in 2003 for sharing best practices in nuclear materials protection control and accounting MPC A including the status and application of remote monitoring technologies personnel issues and both national and international safeguards worldwide The goals of the workshop were to identify areas in which the United States and Russia can promote best practices in MPC A globally and expand U S Russian cooperation on nuclear non proliferation The papers presented in the workshop and the outcomes of workshop discussions form the basis for this workshop summary
