Puttlitz, Paul A. Totta, 2012-12-06 Microelectronic packaging has been recognized as an important enabler for the solid state revolution in electronics which we have witnessed in the last third of the twentieth century Packaging has provided the necessary external wiring and interconnection capability for transistors and integrated circuits while they have gone through their own spectacular revolution from discrete device to gigascale integration At IBM we are proud to have created the initial simple concept of flip chip with solder bump connections at a time when a better way was needed to boost the reliability and improve the manufacturability of semiconductors The basic design which was chosen for SLT Solid Logic Technology in the 1960s was easily extended to integrated circuits in the 70s and VLSI in the 80s and 90s Three I/O bumps have grown to 3000 with even more anticipated for the future The package families have evolved from thick film SLT to thin film metallized ceramic to co-fired multi layer ceramic A later family of ceramics with matching expansivity to silicon and copper internal wiring was developed as a predecessor of the chip interconnection revolution in copper multilevel submicron wiring Powerful server packages have been developed in which the combined chip and package copper wiring exceeds a kilometer All of this was achieved with the constant objective of minimizing circuit delays through short efficient interconnects Catalogue of the London Library London Library, 1913 Ancient Prophecy Martti Nissinen, 2017-11-28 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations *Ancient Prophecy: Near Eastern Biblical and Greek Perspectives* is the first monograph length comparative study on prophetic divination in ancient Near Eastern biblical and Greek sources Prophecy is one of the ways humans have believed to become conversant with what is believed to be superhuman knowledge The prophetic process of communication involves the prophet, her/his audience and the deity from whom the message allegedly comes from Martti Nissinen introduces a wealth of ancient sources documenting the prophetic phenomenon around the ancient Eastern Mediterranean whether cuneiform tablets from Mesopotamia, the Hebrew Bible, Greek inscriptions or ancient historians Nissinen provides an up to date presentation of textual sources the number of which has increased substantially in recent times In addition the study includes four analytical comparative chapters The first demonstrates the altered state of consciousness to be one of the central characteristics of the prophets' public behavior The second discusses the prophets' affiliation with temples which are the typical venues of the prophetic performance The third delves into the

relationship between prophets and kings which can be both critical and supportive The fourth shows gender inclusiveness to be one of the peculiar features of the prophetic agency which could be executed by women men and genderless persons as well The ways prophetic divination manifests itself in ancient sources depend not only on the socio religious position of the prophets in a given society but also on the genre and purpose of the sources Nissinen contends that even though the view of the ancient prophetic landscape is restricted by the fragmentary and secondary nature of the sources it is possible to reconstruct essential features of prophetic divination at the socio religious roots of the Western civilization

Fairness and Division of Labor in Market Societies Hyeong-Ki Kwon, 2004-10-01 Contrary to the explanations offered by the theory of non reflexive path dependent institutionalism the U S and the German automotive industries undertook strikingly similar patterns of industry modification under tough international competition during the 1990s departing from their traditional national patterns By investigating the processes of the U S and German adjustments the author critically reconsiders the prevalent paradigms of political economy and comes to the conclusion that the evidence does not confirm the neoliberal paradigm In order to better account for the recomposition of new market relations which the author terms converging but non liberal and diverging but not predetermined markets he proposes an alternative model of politics among reflexive agents emphasizing different kinds of problem solving practices among those reflexive agents He argues that different forms and regimes of market are established in the process of recomposition in which agents reflect upon not only market rationality but also upon their own institutions creating new norms
