Nations Before Nationalism John A. Armstrong, 2017-03-01 In search of an explanation of how a sense of ethnic identity evolves to create the concept of nation Armstrong analyzes Islamic and Christian cultures from antiquity to the nineteenth century He explores the effects of institutions the city imperial polity bureaucratic imperatives of centralization and language divisions on the development of ethnicity Political science furnishes the focus anthropology and sociology provide the conceptual framework and history affords the evidence Originally published 1982 A UNC Press Enduring Edition UNC Press Enduring Editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print These editions are published unaltered from the original and are presented in affordable paperback formats bringing readers both historical and cultural value *Before the Gregorian Reform* John Howe, 2016-04-01 Historians typically single out the hundred year period from about 1050 to 1150 as the pivotal moment in the history of the Latin Church for it was then that the Gregorian Reform movement established the ecclesiastical structure that would ensure Rome's dominance throughout the Middle Ages and beyond In *Before the Gregorian Reform* John Howe challenges this familiar narrative by examining earlier pre Gregorian reform efforts within the Church He finds that they were more extensive and widespread than previously thought and that they actually established a foundation for the subsequent Gregorian Reform movement The low point in the history of Christendom came in the late ninth and early tenth centuries a period when much of Europe was overwhelmed by barbarian raids and widespread civil disorder which left the Church in a state of disarray As Howe shows however the destruction gave rise to creativity Aristocrats and churchmen rebuilt churches and constructed new ones competing against each other so that church building like castle building acquired its own momentum Patrons strove to improve ecclesiastical furnishings liturgy and spirituality Schools were constructed to staff the new churches Moreover Howe shows that these reform efforts paralleled broader economic social and cultural trends in Western Europe including the revival of long distance trade the rise of technology and the emergence of feudal lordship The result was that by the mid eleventh century a wealthy unified better organized better educated more spiritually sensitive Latin Church was assuming a leading place in the broader Christian world *Before the Gregorian Reform* challenges us to rethink the history of the Church and its place in the broader narrative of European history Compellingly written and generously illustrated it is a book for all medievalists as well as general readers interested in the Middle Ages

and Church history **A Military History of the Mediterranean Sea** ,2018-05-07 The Mediterranean has always attracted the imagination of modern historians as the epicentre of great political entities such as the Egyptians Greeks Romans Arabs Ottomans Venetians and Spanish However it seems that the sea itself was always on the margins of historical inquiry at least until the publication of the famous two volume work by F Braudel in 1949 This collection of essays aims to offer a vertical history of war in the Mediterranean Sea from the early Middle Ages to the early modernity putting the emphasis on the changing face of several different aspects and contexts of war over time Contributors are Stephen Bennett Stathis Birtachas Cornel Bontea Wayne H Bowen Lilia Campana Raffaele D Amato Elina Gugliuzzo Nikolaos Kanellopoulos Savvas Kyriakides Tilemachos Lounghis Alan V Murray Chrysovalantis Papadamou Jacopo Pessina Philip Rance Georgios Theotokis Iason Tzouriadis Ian Wilson and Aysel Yildiz *Vikings in the South* Ann Christys,2015-08-27 In the ninth century Vikings carried out raids on the Christian north and Muslim south of the Iberian peninsula modern Spain and Portugal going on to attack North Africa southern Francia and Italy and perhaps sailing as far as Byzantium A century later Vikings killed a bishop of Santiago de Compostela and harried the coasts of al Andalus Most of the raids after this date were small in scale but several heroes of the Old Norse sagas were said to have raided in the peninsula These Vikings have been only a footnote to the history of the Viking Age Many stories about their activities survive only in elaborate versions written centuries after the event and in Arabic This book reconsiders the Arabic material as part of a dossier that also includes Latin chronicles and charters as well as archaeological and place name evidence Arabic authors and their Latin contemporaries remembered Vikings in Iberia in surprisingly similar ways How they did so sheds light on contemporary responses to Vikings throughout the medieval world **A History of Palestine, 634-1099** Moshe Gil,1997-02-27 Moshe Gil s history of Palestine from the Muslim conquest to the Crusades was the first comprehensive survey of its kind Based on an impressive array of sources the author examines the lives of the Jewish Christian and Muslim communities of Palestine against a background of the political and military events of the period **The Ship in the Medieval Economy, 600-1600** Richard W. Byzantium in the Ninth Century: Dead or Alive? Leslie Brubaker,2016-12-05 9th century Byzantium has always been viewed as a mid point between Iconoclasm and the so called Macedonian revival in scholarly terms it is often treated as a dead century The object of these papers is to question such an assumption They present a picture of political and military developments legal and literary innovations artisanal production and religious and liturgical changes from the Anatolian plateau to the Greek speaking areas of Italy that are only now gradually emerging as distinct Investigation of how the 9th century Byzantine world was perceived by outsiders also reveals much about Byzantine success and failure in promoting particular views of itself The chapters here by an international group of scholars embody current research in this field they recover many lost aspects of 9th century Byzantium and shed new light on the Mediterranean world in a transitional century The papers in this volume derive from the 30th Spring Symposium of Byzantine Studies held for the Society for the

Houben, 2002-04-04 Although many studies have addressed important aspects of medieval southern Italy this was the first work for nearly ninety years to be devoted specifically to the life and reign of King Roger II the founder of the kingdom of Sicily The book provides a comprehensive introductory narrative of the reign and a clear scholarly analysis of its culture and of the development of royal government The kingdom created by the Norman Roger of Hauteville in the first half of the twelfth century was a monarchy with highly developed absolutist ideas an elaborate bureaucracy a reasonably well filled treasury and a mixed cultural heritage reflected by the presence of Arabs and Greeks at court Based on many years of research in archives and libraries across Europe the book offers a valuable overview of one of the most striking periods in south Italian and European history **Warfare, State And Society In The Byzantine World 565-1204** John Haldon, 2020-07-24

Warfare State and Society in the Byzantine World is the first comprehensive study of warfare and the Byzantine world from the sixth to the twelfth century The book examines Byzantine attitudes to warfare the effects of war on society and culture and the relations between the soldiers their leaders and society The communications logistics resources and manpower capabilities of the Byzantine Empire are explored to set warfare in its geographical as well as historical context In addition to the strategic and tactical evolution of the army this book analyses the army in campaign and in battle and its attitudes to violence in the context of the Byzantine Orthodox Church The Byzantine Empire has an enduring fascination for all those who study it and *Warfare State and Society* is a colourful study of the central importance of warfare within it **A Companion**

to the Byzantine Culture of War, ca. 300-1204 , 2018-09-04 This collection of essays on the Byzantine culture of war in the period between the 4th and the 12th centuries offers a new critical approach to the study of warfare as a fundamental aspect of East Roman society and culture in Late Antiquity and the Middle Ages The book's main goal is to provide a critical overview of current research as well as new insights into the role of military organization as a distinct form of social power in one of history's more long lived empires The various chapters consider the political ideological practical institutional and organizational aspects of Byzantine warfare and place it at the centre of the study of social and cultural history Contributors are Salvatore Cosentino Michael Grunbart Savvas Kyriakidis Tilemachos Lounghis Christos Makrypoulias Stamatina McGrath Philip Rance Paul Stephenson Yannis Stouraitis Denis Sullivan and Georgios Theotokis See inside the book *Papyrology*
