Selected Essays Of Gottfried Haberler:

Selected Essays of Gottfried Haberler Gottfried Haberler, 1985 Gottfried Haberler's contributions to the field of international trade and finance began in the 1920s with a seminal paper on comparative costs. His continuing contributions to open economy analysis, development, business cycles, and inflation, the theory of money, and rational expectations are highlighted in this selection of 27 essays spanning the years 1925 to 1980. The essays are divided into five major sections representing the subdisciplines of Haberler's most significant work. The first section on international trade contains his work on comparative costs, comparative advantage, and the location of production and international trade. A section on international finance deals with the state of the international monetary system under conditions of world recession, control over international reserves, U.S. balance of payments policy, currency depreciation, and the terms of trade and transfer and price movements. The topic of inflation and business cycles is covered in the third section with essays on income policies, stagflation, and the Great Depression, and the international transmission of inflation. Section four deals with economic development, and the concluding section contains essays on the theory of money and general macroeconomic theory. Several articles are translated here for the first time, and there is a complete bibliography of Haberler's work up to 1980. Gottfried Haberler is Professor Emeritus of Economics, Harvard University, and Resident Scholar at the American Enterprise Institute. With original contributions from a stellar cast, the volumes provide economists, especially those interested in macroeconomics and the history of economic thought, with an in-depth analysis of Harvard economics. **The Canon in the History of Economics** Michalis Psalidopoulos, 2000-03-09 The construction and the role of the economic canon, the accepted list of great works and great authors, has been the subject of much recent literary and historical debate. By contrast, the concept of the canon has been largely dormant in the study of the history of economics, with the canonical sequence of Smith, Ricardo, Marx, etc. constituting it. *The Palgrave Companion to Chicago Economics* Robert A. Cord, 2023-01-01 The University of Chicago has been and continues to be one of the most important global centres for economics.
