Seventeenth-Century Dutch and Flemish Painting Ivan Gaskell, Sammlung Thyssen-Bornemisza, 1990 A catalogue of 128 paintings produced during this period in which the art of portraiture was transformed religious imagery dynamized and new genres such as flower painting were established The art of Holland s Golden Age is perennially popular with collectors and gallery visitors alike and this book provides a new insight into this unique private collection In his introduction Ivan Gaskell considers the extremely varied character of Dutch and Flemish seventeenth century art It ranges from minutely observed scenes of everyday life to portraits religious works and intimate still life compositions The Thyssen Bornemisza Collection is especially rich in landscapes a subject which had emerged as a separate genre in the Netherlands in the previous century The author outlines the development of painting on both sides of the border placing it in its social and historical context and goes on to discuss the taste for Dutch and Flemish art from the seventeenth century to the present day and spotlights some of the earlier collectors This detailed catalogue of 128 paintings is the result of meticulous research in British Dutch and American libraries and archives The entries are arranged in ten groups by subject so that thematic similarities can be conveniently examined Amongst the most celebrated works is Frans Hals s monumental Family Portrait once the most expensive painting in the world All the paintings are illustrated in colour and are accompanied by comparative illustrations and technical photographs

Wetenschappelijk Onderzoek at the Rubenianum Antwerp **The Ashgate Research Companion to Dutch Art of the Seventeenth Century** Wayne Franits,2017-07-05 Despite the tremendous number of studies produced annually in the field of Dutch art over the last 30 years or so and the strong contemporary market for works by Dutch masters of the period as well as the public's ongoing fascination with some of its most beloved painters until now there has been no comprehensive study assessing the state of research in the field As the first study of its kind this book is a useful resource for scholars and advanced students of seventeenth century Dutch art and also serves as a springboard for further research Its 19 chapters divided into three sections and written by a team of internationally renowned art historians address a wide variety of topics ranging from those that might be considered traditional to others that have only drawn scholarly attention comparatively recently *Seventeenth-century Dutch and Flemish Paintings in South Africa* ,1994 *A Corpus of Rembrandt Paintings VI* Ernst van de Wetering,2014-11-11 A revised survey of Rembrandt's complete painted oeuvre The question of which 17th century paintings in Rembrandt's style were actually painted by Rembrandt himself had already become an issue during his lifetime It is an issue that is still hotly disputed among art historians today The problem arose because Rembrandt had numerous pupils who learned the art of painting by imitating their master or by assisting him with his work as a portrait painter He also left pieces unfinished to be completed by others The question is how to determine which works were from Rembrandt's own hand Can we for example define the criteria of quality that would allow us to distinguish the master's work from that of his followers Do we yet have methods of investigation that would deliver objective evidence of authenticity To what extent do research techniques used in the physical sciences help Or are we after all still dependent on the subjective expert eye of the connoisseur The book provides answers to these questions Prof Ernst van de Wetering the author of our forthcoming book which deals with these questions has been closely involved in all aspects of this research since 1968 the year the renowned Rembrandt Research Project RRP was founded In particular he played an important role in developing new criteria for authentication Van de Wetering was also witness to the way the often overly zealous tendency to doubt the authenticity of Rembrandt's paintings got out of hand In this book he re attributes to the master a substantial number of unjustly rejected Rembrandts He also was closely involved in the re discovery of a considerable number of lost or completely

unknown works by Rembrandt The verdicts of earlier specialists including the majority of members of the original RRP up to 1989 were based on connoisseurship the self confidence in one s ability to recognise a specific artist s style and hand Over the years Van de Wetering has carried out seminal research into 17th century studio practice and ideas about art current in Rembrandt s time In this book he demonstrates the fallibility of traditional connoisseurship especially in the case of Rembrandt who was par excellence a searching artist The methodological implications of this critical view are discussed in an introductory chapter which relates the history of the developments in this turbulent field of research Van de Wetering s account of his own involvement in it makes this book a lively and sometimes unexpectedly personal account The catalogue section presents a chronologically ordered survey of Rembrandt s entire painted oeuvre of 336 paintings richly illustrated and annotated For all the paintings re attributed in this book extensive commentaries have been included that provide a multi faceted new insight into Rembrandt s world and the world of art historical research Rembrandt s Paintings Revisited is the concluding sixth volume of A Corpus of Rembrandt Paintings Volumes I V 1982 1986 1989 2005 2010 It can also be read as a revisionary critique of the first three Volumes published by the old RRP team up till 1989 and of Gerson s influential survey of Rembrandt s painted oeuvre of 1968 69 At the same time the book is designed as an independent overview that can be used on the basis that anyone seeking more detailed information will be referred to the five previous digital versions of the Volumes and the detailed catalogues published in the meantime by the various museums with collections of Rembrandt paintings This work of art history and art research should belong in the library of every serious art historical institute university or museum

Davies, 1993 **Urban Space in the Middle Ages and the Early Modern Age** Albrecht Classen, 2009-12-15 Although the city as a central entity did not simply disappear with the Fall of the Roman Empire the development of urban space at least since the twelfth century played a major role in the history of medieval and early modern mentality within a social economic and religious framework Whereas some poets projected urban space as a new utopia others simply reflected the new significance of the urban environment as a stage where their characters operate very successfully As today the premodern city was the locus where different social groups and classes got together sometimes peacefully sometimes in hostile terms

The historical development of the relationship between Christians and Jews for instance was deeply determined by the living conditions within a city By the late Middle Ages nobility and bourgeoisie began to intermingle within the urban space which set the stage for dramatic and far reaching changes in the social and economic make up of society Legal historical aspects also find as much consideration as practical questions concerning water supply and sewer systems Moreover the early modern city within the Ottoman and Middle Eastern world likewise finds consideration Finally as some contributors observe the urban space provided considerable opportunities for women to carve out a niche for themselves in economic terms

Cavalli-Björkman,1986 **Vermeer's Wager** Ivan Gaskell,2000-10 Vermeer s Wager stands at the intersection of art history and criticism philosophy and museology Using a familiar and celebrated painting by Johannes Vermeer as a case study Ivan Gaskell explores what it might mean to know and use a work of art He argues that art history as generally practiced while successfully asserting certain claims to knowledge fails to take into account aspects of the unique character of works of art Our relationship to art is mediated not only through reproduction particularly photography but also through displays in museums In an analysis that ranges from seventeenth century Holland through mid nineteenth century France to artists and curators practice today Gaskell draws on his experience of Dutch art history philosophy and contemporary art criticism Anyone with an interest in Vermeer and the afterlife of his art will value this book as will all who think seriously about the role of photography in perception and the core purposes of art museums **Kenwood, Paintings in the Iveagh Bequest**
