Labour, state and society in rural India Jonathan Pattenden,2016-02-08 Behind India s high recent growth rates lies a story of societal conflict that is scarcely talked

about Across its villages and production sites state institutions and civil society organisations the dominant and less well off sections of society are engaged in antagonistic relations that determine the material conditions of one quarter of the world s poor Increasingly mobile and often with several jobs in multiple locations India s classes of labour are highly segmented but far from passive in the face of ongoing exploitation and domination Drawing on over a decade of fieldwork in rural South India the book uses a class relational approach to analyse continuity and change in processes of accumulation exploitation and domination By focusing on the three interrelated arenas of labour relations the state and civil society it explores how improvements can be made in the conditions of labourers working at the margins of global production networks primarily as agricultural labourers and construction workers Elements of social policy can improve the poor s material conditions and expand their political space where such ends are actively pursued by labouring class organisations More fundamental change though requires stronger organisation of the informal workers who make up the majority of India s population
