Tiananmen Protests , A Military History of China David Andrew Graff,Robin Higham,2012-03-09 Gaining an understanding of China s long and sometimes bloody history can help to shed light on China s ascent to global power Many of China s imperial dynasties were established as the result of battle from the chariot warfare of ancient times to the battles of the Guomindang KMT and Communist regimes of the twentieth century China s ability to sustain complex warfare on a very large scale was not emulated in other parts of the world until the Industrial Age despite the fact that the country is only now rising to economic dominance In A Military History of China Updated Edition David A Graff and Robin Higham bring together leading scholars to offer a basic introduction to the military history of China from the first millennium B C E to the present Focusing on recurring patterns of conflict rather than traditional campaign narratives this volume reaches farther back into China s military history than similar studies It also offers insightful comparisons between Chinese and Western approaches to war This edition brings the volume up to date including discussions of the Chinese military s latest developments and the country s most recent foreign conflicts Wealth and Power Orville Schell,John Delury,2013 Two leading experts on China evaluate its rise throughout the past one hundred fifty years sharing portraits of key intellectual and political leaders to

explain how China transformed from a country under foreign assault to a world giant From People's War to People's Rule Timothy J. Lomperis, 2000-11-09 Timothy Lomperis persuasively argues the ironic point that the lessons of American involvement in Vietnam are not to be found in any analysis of the war by itself. Rather, he proposes a comparison of the Vietnam experience with seven other cases of Western intervention in communist insurgencies during the Cold War era: China, Indochina, Greece, the Philippines, Malaya, Cambodia, and Laos. Lomperis maintains that popular insurgencies are manifestations of crises in political legitimacy which occur as a result of the societal stresses caused by modernization. Therefore, he argues, any intervention in a people's war will succeed or fail depending on how it affects this crisis. The unifying theme in the cases Lomperis discusses is the power of land reform and electoral democracy to cement political legitimacy and therefore deflect revolutionary movements. Applying this theory to the ongoing Sendero Luminoso insurgency in Peru, Lomperis makes a qualified prediction of that conflict's outcome. He concludes that a global trend toward democratization has produced a new era of people's rule.

Documentary, World History, and National Power in the PRC Gotelind Mueller, 2013-10-30 Documentaries have recently become a favourite format for Chinese state directed media to present an officially sanctioned view of history. Indeed, this is not confined to Chinese national history. In stark contrast to the earlier self-centred preoccupation with Chinese history, there has been an upsurge in interest in foreign history with a view to illuminating China's role not only in world history but also on the global stage today and in the future. This book examines three recent Chinese documentary television series which present the officially sanctioned view of the rise of the modern West, the reasons for the end of the Soviet Union and the legitimisation of the present day Chinese government via a specific reading of modern Chinese history to argue for a Chinese rise in the future. With a focus on these documentaries, Gotelind Müller discusses how history is presented on screen and explores the function of visual history for memory culture and wider society. Further, this book reveals how the presentation of Chinese and foreign history in a global framework impacts on the officially transmitted views on Self and Other and thus provides a keen insight into how the Chinese themselves regard their global rise. *Documentary, World History, and National Power in the PRC* will be welcomed by students and scholars working across a number of fields including Chinese studies, East Asian studies, media studies, television studies, history and memory studies.

Bauer, 2001-04-30 Why do we acquire the things we do Behind this apparently ingenuous question are several answers some straightforward and others more interesting To feed ourselves might be the first response for we can easily see that we expend much energy in the quest for food Clothing and shelter as well would seem to constitute our basic needs Yet we quickly see that even in the Garden of Eden people want more than they need This simple impulse has created the ever mounting abundance we call progress and nearly all of the subsequent trouble on our planet Four main interwoven themes run through this exploration of material culture and consumption in Latin America over the past five centuries supply and demand the relationships between consumption and identity the importance of ritual both ancient and modern in what we

buy and the relationship between colonial and post colonial power in consumption **Power and Sustainability of the Chinese State** Keun Lee, Joon-Han Kim, Wing Thye Woo, 2009-01-13 Since the start of the 21st century China has risen to the status of an important world power This book examines Chinese power focusing in particular although not exclusively on its economic capabilities and considering how this is likely to develop in the future It provides a detailed assessment of the key facets of Chinese power today including GDP growth multinationals and technological and scientific innovation It identifies the key trends in these areas compares China's experience with other important global powers such as the US and considers how this is viewed by the Chinese themselves including through the lens of their popular culture and mass media It goes on to identify the foremost problems facing China and the Chinese state today including fiscal management and public finance poverty inequality and rural development and considers whether China is capable of overcoming these challenges and continuing its remarkable economic development It addresses crucial questions such as the impact of globalization on Chinese power and whether Communist Party rule is sustainable for the foreseeable future
