Long Postwar Peace:

Great Powers and World Order Charles W. Kegley, Gregory A. Raymond, 2020-02-12 *Great Powers and World Order* encourages critical thinking about the nature of world order by presenting the historical information and theoretical concepts needed to make projections about the global future Charles W. Kegley and Gregory Raymond ask students to compare retrospective cases and formulate their own hypotheses about not only the causes of war but also the consequences of peace settlements Historical case studies open a window to see what strategies for constructing world order were tried before why one course of action was chosen over another and how things turned out By moving back and forth in each case study between history and theory rather than treating them as separate topics the authors hope to situate the assumptions causal claims and policy prescriptions of different schools of thought within the temporal domains in which they took root giving the reader a better sense of why policy makers embraced a particular view of world order instead of an alternative vision

The Waning of Major War Raimo Vayrynen, 2013-10-31 This book is a systematic effort by leading international scholars to map the trends in major power warfare and explore whether it is waxing or waning The main point of departure is that major power war as a historical institution is in decline This does not mean though that wars between states are in general disappearing While there is some convergence in the conclusions by individual authors they are by no means unanimous about the trend The articles explore different causes and correlates of the declining trend in major power warfare including the impact of the international structure nuclear weapons international law multilateral institutions sovereignty and value changes , [Understanding Conflict Resolution](#) Peter Wallensteen, 2015-03-31 This book provides you with

the perfect introduction to your studies in peace and conflict resolution and equips you with the tools you need to analyse real world cases Drawing on recent research and examples from around the world the new edition Explores the ongoing situation in Syria and the events and repercussions of the Arab Spring Examines the issue of internet security and the relationship between social media and peace Draws on the cases of Libya and Syria to discuss the principle of Responsibility to Protect R2P Outlines the functions of key regional and Non Governmental organisations Includes a companion website with annotated further reading lists and links to free SAGE journal articles reports and data sets This is an essential text for all students lecturers and researchers of peace and conflict resolution in international relations global politics and political science

The Ambiguous Legacy Michael J. Hogan, 1999-11-13 This collection of essays assesses the record of American foreign policy over the course of the twentieth century The essays comprise the work of political scientists as well as historians conservatives as well as liberals foreign scholars as well as Americans Taking off from Henry Luce's vision of an American century the authors discuss such important topics as the American conception of the national interest the tension between democracy and capitalism the US role in both the developed and underdeveloped worlds party politics and foreign policy the significance of race in American foreign relations and the cultural impact of American diplomacy on the world at

large The result is a lively collection of essays by authors who often disagree but who nonetheless provide the reader with keen insights about the past and provocative views of the future The War Puzzle Revisited John A. Vasquez, 2009-07-23 John A Vasquez s *The War Puzzle* provided one of the most important scientific analyses of the causes of war of the last two decades *The War Puzzle Revisited* updates and extends his groundbreaking work reviewing research on the onset and expansion of war and the conditions of peace Vasquez describes systematically those factors associated with wars to see if there is a pattern that suggests why war occurs and how it might be avoided delineating the typical path by which relatively equal states have become embroiled in wars in the modern global system The book uses the large number of empirical findings generated s the basis of its theorizing and integrates these research findings so as to advance the scientific knowledge of war and peace **War in a Changing World** Zeev Maoz, Azar Gat, 2001 Essays tracing the changing nature of war in relation to global and regional changes Point of Attack John Yoo, 2014-03-25 The world today is overwhelmed by wars between nations and within nations wars that have dominated American politics for quite some time *Point of Attack* calls for a new understanding of the grounds for war In this book John Yoo argues that the new threats to international security come not from war between the great powers but from the internal collapse of states terrorist groups the spread of weapons of mass destruction and destabilizing regional powers In *Point of Attack* he rejects the widely accepted framework built on the U N Charter and replaces it with a new system consisting of defensive pre emptive or preventive measures to encourage wars that advance global welfare Yoo concludes with an analysis of the Afghanistan and Iraq wars failed states and the current challenges posed by Libya Syria North Korea and Iran **Fundamental Principles of International Relations** J. Martin Rochester, 2010-02-23 This lucid and engaging volume provides an essential framework for introducing students to the fundamentals of world politics by clarifying the complexities of its rapidly changing context *The Future's Back* Frank P. Harvey, 1997 Arguing that previous critiques of rational choice and deterrence theory are not convincing Frank Harvey constructs a new set of empirical tests of rational deterrence theory to illuminate patterns of interaction between rival nuclear powers He analyses the crisis management techniques used by the United States and the Soviet Union in twenty eight post war crises and isolates factors that promote or inhibit escalation of these crises This crises based data set serves as the basis for identifying patterns of response when one nuclear state is threatened by another *The Future's Back* offers new directions for testing that emphasize a more unified approach to theory building and assesses the feasibility of alternative courses of action to prevent escalation of future disputes characterized by nuclear rivalry *Paradigm Lost?* David Jablonsky, 1993 Sometime in the penultimate decade of the 20th century the United States and its allies won the cold war Once again in the current transition period the primary questions revolve around the management of power and America s role in global politics Once again there are the issues of change and continuity In terms of change the cold war set in train a blend of integrative and disintegrative forces and trends that are adding to the complex tensions of the current transition

The integrative force that increasingly linked global economies in the cold war for instance also holds out the spectral potential of global depression or at the very least nations more susceptible to disintegrative actions as the Iraqi invasion of Kuwait demonstrated In a similar manner the advances in communications and transportation that have spread the results of medical and scientific discoveries around the world are countered by the malign transnational results of nuclear technology the drug trade terrorism AIDS and global warming

The Scourge of War Paul Diehl, 2010-03-25 J David Singer's legendary Correlates of War project represented the first comprehensive effort by political scientists to gather and analyze empirical data about the causes of war In doing so Singer and his colleagues transformed the face of twentieth century political science Their work provoked some of the most important debates in modern international relations about the rules governing territory international intervention and the so called democratic peace Editor Paul F Diehl has now convened some of the world's foremost international conflict analysis specialists to reassess COW's contribution to our understanding of global conflict Each chapter takes one of COW's pathbreaking ideas and reevaluates it in light of subsequent world events and developments in the field The result is a critical retrospective that will reintroduce Singer's important and still provocative findings to a new generation of students and specialists Paul F Diehl is Professor of Political Science and University Distinguished Scholar at the University of Illinois Urbana Champaign

The Realism Reader Colin Elman, Michael Jensen, 2014-08-12 The Realism Reader provides broad coverage of a centrally important tradition in the study of foreign policy and international politics After some years in the doldrums political realism is again in contention as a leading tradition in the international relations sub field Divided into three main sections the book covers seven different and distinctive approaches within the realist tradition classical realism balance of power theory neorealism defensive structural realism offensive structural realism rise and fall realism and neoclassical realism The middle section of the volume covers realism's engagement with critiques levelled by liberalism institutionalism and constructivism and the English School The final section of the book provides materials on realism's engagement with some contemporary issues in international politics with collections on United States U S hegemony European cooperation and whether future threats will arise from non state actors or the rise of competing great powers The book offers a logically

coherent and manageable framework for organizing the realist canon and provides exemplary literature in each of the traditions and dialogues which are included in the volume Offering substantial commentary and analysis and including enhanced pedagogy to facilitate student learning The Realism Reader will provide a one stop shop for undergraduates and masters students taking a course in contemporary international relations theory with a particular focus on realism

Liberal Peace Michael Doyle, 2011-08-05 This volume comprises the key writings of Prof Michael Doyle on the Liberal Peace from the 1980s up to the present day [Encyclopedia of Conflicts Since World War II](#) James Ciment, 2015-03-27 Thoroughly revised to include 25 conflicts not covered in the previous edition as well as expanded and updated information on previous coverage this illustrated reference presents descriptions and analyses of more than 170 significant post World War II conflicts around the globe Organized by region for ease of access Encyclopedia of Conflicts Since World War II Second Edition provides clear in depth explanations of events not covered in such detail in any other reference source Including more than 180 detailed maps and 150 photos the set highlights the conflicts that dominate today's headlines and the events that changed the course of late twentieth century history

The War Puzzle John A. Vasquez, 1993-05-06 This book constructs a new scientific explanation of the onset and expansion of war and the conditions of peace The author describes systematically those factors common to wars between equal states to see if there is a pattern that suggests why war occurs and how it might be avoided or mitigated delineating the typical path by which relatively equal states have become embroiled in wars with one another in the modern global system Emphasis is placed on the issues that give rise to war and how the practices of power politics lead to a series of steps that produce war rather than peace The book differs from others in that it employs the large number of empirical findings generated in the last twenty five years as the basis of its theorizing and integrates these research findings so as to advance dramatically the scientific knowledge of war and peace

The Military In New Times James Burk, Robert J Waldman, David R Segal, Charles C Moskos, 2019-06-26 What role will armed forces play in a world that is turbulent yet no longer organized by the bipolar conflict of East and West In this volume leading experts from several disciplines assess the rapidly changing global strategic and cultural landscape examining how it will affect the responsibilities and social standing of the modern military There are provocative disagreements among the contributors especially over whether we should expect and prepare for another global war However the contributors generally agree on several broad themes that guide their analysis Arguing that the Cold War has masked basic trends that have been reshaping the international system for a long time they suggest that the sovereign states dominance of the international system is rapidly coming to an end as multinational ethnic regional and religious groups to name a few increasingly affect the course of global affairs In the absence of a clear enemy the military faces an identity crisis In the postmodern atmosphere of this multicentric global order authority is fragmented and the exercise of any one authority is subject to greater scrutiny and challenge The military has become more accepting of a variety of values life styles and attitudes toward its tasks At the same

time support for the military's mission is difficult to win requiring endless justification. The authors believe that the principal missions for the military in these new times are peacekeeping, peacemaking and humanitarian assistance. They examine the prospects for successful operations in these areas taking into account the cultural lag between world structures that favor increased multinational peacekeeping forces and individual nations that supply token resources to support such efforts. This volume provides a sophisticated and thought provoking perspective on the future role of the military in the coming decades. It is sure to enrich the vigorous debate surrounding these issues.

Cold War Statesmen Confront the Bomb John

Gaddis, Philip Gordon, Ernest May, Jonathan Rosenberg, 1999-04-01 *Cold War Statesmen Confront the Bomb* Nuclear Diplomacy Since 1945 is a path breaking work that uses biographical techniques to test one of the most important and widely debated questions in international politics: Did the advent of the nuclear bomb prevent the Third World War? Many scholars and much conventional wisdom assumes that nuclear deterrence has prevented major power war since the end of the Second World War; this remains a principal tenet of US strategic policy today. Others challenge this assumption and argue that major war would have been obsolete even without the bomb. This book tests these propositions by examining the careers of ten leading Cold War statesmen: Harry S. Truman, John Foster Dulles, Dwight D. Eisenhower, John F. Kennedy, Josef Stalin, Nikita Khrushchev, Mao Zedong, Winston Churchill, Charles De Gaulle and Konrad Adenauer, and asking whether they viewed war and its acceptability differently after the advent of the bomb. The book's authors argue almost unanimously that nuclear weapons did have a significant effect on the thinking of these leading statesmen of the nuclear age, but a dissenting epilogue from John Mueller challenges this thesis.

Nuclear Weapons and Conflict Transformation Saira Khan, 2008-09-09 This new volume explores what the acquisition of nuclear weapons means for the life of a protracted conflict using the case study of the conflict between India and Pakistan.
