Naito, 2025-02-05 This textbook considers aging a disease and summarizes the leading edge research and facts on anti aging medicine and the aging mechanism. It provides the basics and biology of aging science followed by presenting clinical studies such as exercise nutrition mental health brain sleep and treatment interventions. The book also discusses aging control and considers behavioral environmental and societal implications for healthy aging. The field of aging science is interdisciplinary and there are much more uncertainties thus it is crucial to summarize what is currently known to set a foundation for future research. The International Classification of Diseases by the World Health Organization WHO has given the aging related disease a subcode of XT9T. This trend advanced research of aging related sicknesses and the concept that infirmities associated with old age can be controlled such as cancer dementia and cardiovascular diseases. Basic research has progressed and clinical applications have become available resulting in significant social changes. As increased life expectancy is happening over the globe we are facing unprecedented challenges and anti aging medicine is a key to treating population growth environmental problems etc as problems for the entire planet. Anti Aging Medicine Basics and Clinical Practice is an English translation of the publication by the Japanese Society of Anti Aging Medicine. It is an insightful source for healthcare professionals and scholars in anti aging and geriatrics. It will attract pharmaceutical Information Technology and Artificial Intelligence industries associated with aging responsive markets. edited volume is a compilation of 30 articles discussing what constitutes food for health and longevity. The aim is to provide up to date information insights and future tendencies in the ongoing scientific research about nutritional components food habits and dietary patterns in different cultures. The health sustaining and health promoting effects of food are certainly founded in its overall composition of macronutrients and micronutrients. However the consumption of these nutrients is normally in the form of raw or prepared food from the animal and plant sources. The book is divided into four parts and a conclusion and successfully conveys the well established information and knowledge along with the personal views of a diversified group of researchers and academicians on the multifaceted aspects of nutrition food and diet. The first part reviews the scientific information about proteins carbohydrates fats and oils micronutrients pro and pre biotics and hormetins along with a discussion of the evolutionary principles and constraints about what is optimal food if any. The second part discusses various kinds of foods and food supplements with respect to their claimed benefits for general health and prevention of some diseases. The third part brings in the cultural aspects such as what are the principles of healthy eating according to the traditional Chinese and Indian systems what is the importance of meal times and daily rhythms and how

different cultures have developed different folk wisdoms for eating for health longevity and immortality In the part four various approaches which are either already in practice or are still in the testing and research phases are discussed and evaluated critically for example intermittent fasting and calorie restriction food based short peptides senolytics Ayurvedic compounds optimal food for old people and food for the prevention of obesity and other metabolic disorders The overreaching aim of this book is to inform inspire and encourage students researchers educators and medical health professionals thinking about food and food habits in a holistic context of our habits cultures and patterns Food cannot be reduced to a pill of nutritional components Eating food is a complex human behavior culturally evolved over thousands of years Perhaps the old adage we are what we eat needs to be modified to we eat what we are

The Frailty Model Luc Duchateau, Paul Janssen, 2007-10-23 Clustered survival data are encountered in many scientific disciplines including human and veterinary medicine biology epidemiology public health and demography Frailty models provide a powerful tool to analyse clustered survival data In contrast to the large number of research publications on frailty models relatively few statistical software packages contain frailty models It is demanding for statistical practitioners and graduate students to grasp a good knowledge on frailty models from the existing literature This book provides an in depth discussion and explanation of the basics of frailty model methodology for such readers The discussion includes parametric and semiparametric frailty models and accelerated failure time models Common techniques to fit frailty models include the EM algorithm penalised likelihood techniques Laplacian integration and Bayesian techniques More advanced frailty models for hierarchical data are also included Real life examples are used to demonstrate how particular frailty models can be fitted and how the results should be interpreted The programs to fit all the worked out examples in the book are available from the Springer website with most of the programs developed in the freeware packages R and Winbugs The book starts with a brief overview of some basic concepts in classical survival analysis collecting what is needed for the reading on the more complex frailty models

Subjective Logic Audun Jøsang, 2016-10-27 This is the first comprehensive treatment of subjective logic and all its operations The author developed the approach and in this book he first explains subjective opinions opinion representation and decision making under vagueness and uncertainty and he then offers a full definition of subjective logic harmonising the key notations and formalisms concluding with chapters on trust networks and subjective Bayesian networks which when combined form general subjective networks The author shows how real world situations can be realistically modelled with regard to how situations are perceived with conclusions that more correctly reflect the ignorance and uncertainties that result from partially uncertain input arguments The book will help researchers

and practitioners to advance improve and apply subjective logic to build powerful artificial reasoning models and tools for solving real world problems A good grounding in discrete mathematics is a prerequisite *Cytokines* Victor R.
