**New Approaches to Chinese Word Formation** Jerome L. Packard, 2011-07-22 TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language. The series publishes state of the art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by building bridges to neighbouring fields such as neuroscience and cognitive science. TRENDS IN LINGUISTICS considers itself a forum for cutting edge research based on solid empirical data on language in its various manifestations including sign languages. It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language. TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints. High quality standards are ensured through anonymous reviewing.

**New Terms for New Ideas** Michael Lackner, Iwo Amelung, Joachim Kurtz, 2001. This volume is about the lasting impact of new Western notions on the 19th and early 20th century Chinese language: their invention, spread and standardization. Topics examined range from preconceptions about the capacity of the Chinese language to accommodate foreign ideas, the formation of specific nomenclatures and the roles of individual translators to Chinese and European attempts at coming to terms with each other's grammar. A valuable reference work for all those interested in the historical semantics of modern China.

**China Perspectives**, 1999

**Handbook of Linguistic Terms** Sharad Rajimwale, 2006

[The Horizontal Skyscraper](#) Bjørn B. Erring, 2002. Chinese cities are undergoing profound changes. Urban development has transformed the townscape: low rise structures based on courtyard type housing, horizontal in character, have been replaced by vertical constructions. In the 1980s and 1990s Chinese cities were featured by the conflicting wishes for rapid modernization and cultural continuity. The articles of this book refer to experiences drawn from this particular period of time and are selected among case studies and related theoretical considerations. The case studies are concentrated on four cities: Beijing, Xi'an, Quanzhou and Shanghai. The authors have all been active in different fields of urban transformation in historic Chinese cities. They are politicians, historians, planners, anthropologists, architects and scholars. The articles describe the substantial transformation of the cities and the implications of this change. The contributing authors represent three countries: China, France and Norway. They all participated in two conferences in 1995 and 1996 dealing with urban renewal in housing areas of traditional Chinese cities. The outcome of these conferences constitute the raw material for this book.

**The Moral Metaphor System** Ning Yu, 2022. This book uses conceptual metaphor theory to explore moral metaphors in English and Chinese. Ning Yu sheds light on the metaphorical nature of moral cognition and how it is systematically manifested in language and explores the potential commonalities that define moral cognition and the differences that characterize distinct cultures.

**Sadness Expressions in English and Chinese** Ruihua Zhang, 2014-09-25 Winner of the Tianjin Social Science Outstanding Achievement Award This book reports on the contrastive semantic investigation of sadness expressions between English and Chinese based on two monolingual general corpora and a parallel corpus. The exploration adopts a unique theoretical approach which integrates corpus linguistic theories on meaning as a social construct, usage and paraphrase with a corpus linguistic lexical model. It employs a new complex but workable methodology which combines computational tools with manual examination to tease meaning out of corpus evidence to compare and contrast lexical items that do not match up neatly between languages. It looks at sadness expressions both within and across languages in terms of three corpus linguistic structural categories: i.e. colligation, collocation and semantic association. Preference and paraphrase both explicit and implicit to capture their subtle nuances of meaning disclose the culture specific conceptualisations encoded in them and highlight their respective cultural distinctiveness of emotion. By presenting multidisciplinary original work, *Sadness Expressions in English and Chinese* will be of interest to researchers in corpus linguistics, contrastive lexical semantics, psychology, bilingual lexicography and language pedagogy.
