Linguistic research and language teaching have generally been viewed as two separate types of academic endeavor While linguists have been preoccupied with pattern finding and theory building language teachers often encounter issues that are not readily addressed by theoretical linguistic research This collection with eleven papers touching upon a wide range of issues stands out as one of the rare concerted efforts toward a meaningful integration of the two endeavors Subject matters include tone stress word structure grammatical categories e g classifiers syntactic structures including argument structure discourse particles implicit and explicit knowledge conversational repair and learner corpus With a diverse range of theoretical orientations this collection serves to showcase some of the productive ways to create synergy between Chinese linguistic research and language education *Culture and Humanity in the New Millennium* Sin-wai Chan, Siu Tong Kwok, 2002

In 2006 a cartoon in a Danish newspaper depicted the Prophet Mohammed wearing a bomb in his turban The cartoon created an international incident with offended Muslims attacking Danish embassies and threatening the life of the cartoonist Editorial cartoons have been called the most extreme form of criticism society will allow but not all cartoons are tolerated Unrestricted by journalistic standards of objectivity editorial cartoonists wield ire and irony to reveal the naked truths about presidents celebrities business leaders and other public figures Indeed since the founding of the republic cartoonists have made important contributions to and offered critical commentary on our society Today however many syndicated cartoons are relatively generic and gag related reflecting a weakening of the newspaper industry's traditional watchdog function Chris Lamb offers a richly illustrated and engaging history of a still vibrant medium that forces us to take a look at ourselves for what we are and not what we want to be The 150 drawings in *Drawn to Extremes* have left readers howling sometimes in laughter but often in protest **Interlingual Lexicography** R. R. K. Hartmann, 2007

The Grammar of Chinese Characters James Myers, 2019-04-16 Anybody who reads or writes Chinese characters knows that they obey a grammar of sorts though numerous they are built out of a much smaller set of constituents often interpretable in meaning or pronunciation that are themselves built out of an even smaller set of strokes This book goes far beyond these basic facts to show that Chinese characters truly have a productive and psychologically real lexical grammar of the same sort seen in spoken and signed languages with non trivial analogs of morphology the combination of potentially interpretable constituents phonology formal regularities without implications for interpretation and phonetics articulatory and perceptual constraints Evidence comes from a wide variety of sources from quantitative corpus analyses to experiments on character reading writing and learning The grammatical approach helps capture how character constituents combine as they do how strokes systematically vary in different environments how character form evolved from ancient times to the modern simplified system and how readers and writers are able to process or learn even entirely novel characters This book not only provides tools for exploring the full richness of Chinese orthography but also offers new ways of thinking about the most fundamental question in linguistic theory what is grammar
