suggests that the time is opportune for a summary of the state of discipline The number of peer reviewed papers published in  
geomorphic journals has grown steadily for more than two decades and more importantly the diversity of authors with  
respect to geographic location and disciplinary background geography geology ecology civil engineering computer science  
geographic information science and others has expanded dramatically As more good minds are drawn to geomorphology and  
the breadth of the peer reviewed literature grows an effective summary of contemporary geomorphic knowledge becomes  
increasingly difficult The fourteen volumes of this Treatise on Geomorphology will provide an important reference for users  
from undergraduate students looking for term paper topics to graduate students starting a literature review for their thesis  
work and professionals seeking a concise summary of a particular topic Information on the historical development of diverse  
topics within geomorphology provides context for ongoing research discussion of research strategies equipment and field  
methods laboratory experiments and numerical simulations reflect the multiple approaches to understanding Earth s  
surfaces and summaries of outstanding research questions highlight future challenges and suggest productive new avenues  
for research Our future ability to adapt to geomorphic changes in the critical zone very much hinges upon how well landform  
scientists comprehend the dynamics of Earth s diverse surfaces This Treatise on Geomorphology provides a useful synthesis  
of the state of the discipline as well as highlighting productive research directions that Educators and students researchers  
will find useful Geomorphology has advanced greatly in the last 10 years to become a very interdisciplinary field  
Undergraduate students looking for term paper topics to graduate students starting a literature review for their thesis work  
and professionals seeking a concise summary of a particular topic will find the answers they need in this broad reference  
work which has been designed and written to accommodate their diverse backgrounds and levels of understanding Editor in  
Chief Prof J F Shroder of the University of Nebraska at Omaha is past president of the QG G section of the Geological Society

of America and present Trustee of the GSA Foundation while being well respected in the geomorphology research community and having won numerous awards in the field A host of noted international geomorphologists have contributed state of the art chapters to the work Readers can be guaranteed that every chapter in this extensive work has been critically reviewed for consistency and accuracy by the World expert Volume Editors and by the Editor in Chief himself No other reference work exists in the area of Geomorphology that offers the breadth and depth of information contained in this 14 volume masterpiece From the foundations and history of geomorphology through to geomorphological innovations and computer modelling and the past and future states of landform science no stone has been left unturned
