In 1777 the North Carolina Committee of Safety ordered to "employ immediately all the Gunsmiths in the Colony in the making of Markers and Bayonets, of the size and manner recommended by Congress . . ." Surviving specimens are very rare and no North Carolina pieces are presently known. This marker was made in Philadelphia. The barrel is marked "PHILADELPHIA COUNTY" and at the breech the C-P monogram pistol mark (called for in Committee of Safety minutes). The lock is marked "NICHOLSON" for John Nicholson. The bore is 68 caliber and the barrel length 44 inches.

Today these pieces are commonly referred to as First and Second Model Brown Bess. The Second Model, forty-two inch barrel musket, began to be issued in quantity in the early 1760's, with certain superficial modifications to hardware. Eventually, the Second Model superseded the First Model.

When it became necessary to begin production of their preparation for war, they saw the Brown Bess for a pattern. The model had been in use in the militia and Regulars for many years. French, Dutch, and German troops found in the Colonies, but that were considered dangerous citizens rather than rebels, as they adopted the Brown Bess and proven British ones were more likely to use as a

The Brown Bess was a killing machine between men and elephants. It was exceptionally well made for its time, and was the most reliable of the day, with a seven-inch stroke to the trigger. The Brown Bess was the finest of its century, from the standard of workmanship and finish, and its polished wood added to the image of the Englishman. It was a seventeen-inch bayonet, and the terror of Europe for a century, and with a few substantial witnesses.

The Brown Hen was of about 500 subjects, with forty-six birds having a smaller brood than the 1
