Metacognition in the Primary Classroom Peter Tarrant, Deborah Holt, 2016-01-08. Current trends in education suggest that pupils should have more responsibility for their own learning, but how can they if they don't understand the what, the why, and the how? This practical guide explores the idea that a metacognitive approach enables pupils to develop skills for lifelong learning. If pupils can identify the what, the why, and the how of their learning, they can begin to formulate strategies for overcoming challenges and for continuous improvement. In this book, the authors truly engage with research into the link between metacognition and learning and the idea that if you can effectively articulate your thoughts and strategies regarding how you learn, you might then be in a better position to take actions in order to improve and to be able to learn best. An appendix of useful resources is also included, which offers a range of activities surrounding the language of learning, reflection, and metacognition, as well as essential advice on how to develop metacognition in the early years (4-8), middle years (8-10), and upper years (10-13). *Metacognition in the Primary Classroom* demonstrates how important it is for children to be well enough informed to play an active role in learning better. Having the language skills to talk about your learning and the opportunity to share ideas and strategies with others enables all concerned to explore and develop approaches in order to learn better. This book is a crucial read for anyone interested in ensuring that pupils take an active role in their own learning.

Using Internet Primary Sources to Teach Critical Thinking Skills in Visual Arts Pamela J. Eyerdam, 2003-03-30. Use the Internet to teach visual arts and refine students' critical thinking skills. This book is based on the Discipline Based Art Education program, a proven art instruction program that teaches everything from the creative process and art history to criticism and aesthetics. An abundance of primary source web sites and background information is offered. The main focus of the book is western art history and painting, but examples of sculpture, drawings, prints, and architecture are included, along with a chapter on diversity. Part I provides background material: a brief history of art education is presented, followed by a review of the components of design elements and principles. The book describes using the Internet as a primary source by identifying and evaluating websites. Part II follows the program through the main historical periods from prehistoric and ancient Middle Eastern art through the Renaissance through the 20th century. A bibliography and index are included.

Independent Thinking on Primary Teaching Mark Creasy, 2022-02-01. Foreword by Ian Gilbert. Primary school teachers are working harder than ever and have more and more to do in the finite time they have with their pupils, but Mark Creasy

believes it doesn't need to be like this. With rare experience in both primary and secondary phases and at leadership as well as classroom levels, Mark is ideally placed to comment on what works and what doesn't, and in this book he urges teachers to recognise that there is another way. In *Independent Thinking on Primary Teaching*, Mark encourages teachers to stop and consider the things they do daily in the classroom and presents a series of prompts, nudges and suggestions to help them achieve the same or even better results by working smarter, not harder. In so doing, he shares a wealth of practical and easily transferable tips for immediate use in the classroom, all designed to streamline teachers' schedules and lighten their workload while enlivening children's learning. These are in no way doctrines or silver bullets for success, and nothing that Mark advocates requires further investment of either time or money; rather, these 'working smarter' tips are geared to win teachers their evenings and weekends back, something that many more teachers need than is healthy for the profession. Essential reading for primary school teachers, *Independent Thinking on Primary Teaching* is one of a number of books in the
