Looking Glass Self An Examination Of Self Awareness:

The Looking-Glass Self John V. Canfield,1990-11-20 John Canfield here presents a penetrating study of the self and self consciousness from the point of view of contemporary analytic philosophy Taking as his starting point Wittgenstein s views on the nature of the self Canfield explains Wittgenstein s approach to philosophy and his way of looking at language He also explores significant non Wittgensteinian philosophical literature including the widespread debate over criteria of personal identity and basic assumptions about the I of such expressions as I think The second half of the book examines how we fix or ascertain certain beliefs about ourselves a problem not previously discussed by analytic philosophers Canfield begins by examining traditional theories that take the self to be a fiction of some sort He goes on to analyze our deep seated existential belief in self a belief that he notes can coexist with a theoretical denial of self s existence A central chapter of the book attempts to delineate clearly Wittgenstein s view of the I as a grammatical fiction In addressing the large literature on criteria of personal identity Canfield argues that a central assumption of that work the notion of judging by intuition in puzzle cases is mistaken Turning his attention to forms of self consciousness Canfield demonstrates that the I of gut level belief is categorically heterogeneous and in part fictional Written with a minimum of jargon this book will interest Wittgensteinian scholars as well as philosophers social scientists and psychoanalysts involved in the study of the self **The Looking-Glass**

Self-Inference Processes James M. Olson,2013-03-07 Although self inference processes the ways individuals make

judgments about themselves have been studied in social psychology and sociology for many years a distinct literature on this topic has not emerged due to the diversity of relevant issues The editors of this current volume cull recent social psychological research and theory on self inference processes and identify some of the common themes in this area of study The specific topics covered in this volume include how people infer their emotions personality traits and body images from relevant information factors influencing the self concept identity and self standards the impact of self inferences on interpersonal relations conditions motivating escape from the self The book is written for researchers and graduate level students in clinical social developmental health and personality psychology The Palgrave Handbook of Global Perspectives on Emotional Labor in Public Service Mary E. Guy, Sharon H. Mastracci, Seung-Bum Yang, 2019-09-03 The Palgrave Handbook of Global Perspectives on Emotional Labor in Public Service challenges traditional public administration theory and its disavowal of the emotive component to public service delivery Providing a comprehensive and comparative overview of the current research in this previously understudied area this handbook situates emotional labor within public service and establishes emotional labor within individual organizational cultural and situational scenarios With chapters spanning twelve different countries across six continents this handbook provides groundbreaking survey research that probes the daily work experience of public servants paying special attention to the relational aspect of public service delivery It ultimately seeks to revise the current public service paradigm and will be an invaluable resource to researchers public managers and international public service organizations as the first of its kind for the public administration market The End of Individualism and the Economy Ann E. Davis, 2020-02-05 Individualism has been one of the driving forces in the rise of modern capitalism and methodological individualism has been dominant in social science for many years In this paradigm the economy is seen as a machine to routinize production and improve efficiency and the discipline of economics has come to focus on control and automation Recent innovations in natural and social sciences however indicate a shift in thinking away from individualism and towards interconnectedness The End of Individualism and the Economy Emerging Paradigms of Connection and Community traces the origins of the individual in history philosophy economics and social science Drawing from linguistic philosophy there is increasing attention to language as a social substrate for all institutions including money and the market One irony is that the individual is a key term related to distinct institutions and associated expertise that is the individual is social The book explores the influence of individualism in the subversion of class consciousness the view of impersonality as a virtue and the rise of financialization The founding assumption of economics the rational autonomous individual with exogenous tastes undercuts social solidarity and blocks awareness of interconnections and interdependencies The text looks forward and embraces the new paradigms and alternative forms of governance economics and science which can be developed based on collectives and communities with new values frameworks and world views This work is suitable for academics students scholars and researchers with an interest in economic and social collectives and methodological

individualism as well as those studying the connections between economics and other disciplines in the social and natural sciences

Communication Theory James Arthur Anderson, 1996-05-17 This book provides a thorough analysis of the scientific critical and cultural questions at the foundation of theory building in communication and other social sciences Any claim to knowledge the author explains can be analyzed in terms of a series of characteristics the object of its explanation the explanatory form and evidentiary method employed its characteristic explanations the scope of its performance and its consequences of value From identifying basic epistemological questions to exploring the impact of the knowledge industry on society the volume offers readers the analytical tools to understand compare and evaluate theories and their use both inside and outside the classroom The book also includes a systematic analysis of communication s most influential theories and traces their genealogies across different content fields and disciplines

Averting Global Extinction Louis S. Berger, 2009 The extensive literature about averting ecological disasters nuclear catastrophe and unsupportable overpopulation typically describes dangers analyzes their implications and presses for remedial action It seems that what is taken as too obvious and well understood to mention let alone to address seriously is humanity s failure to give global and human survival top priority More careful consideration of this irrational self destructive sociocultural negligence shows that it is complex puzzling and ensconced and perpetuated by pathological societal defenses This paradox is *Averting Global Extinction* s subject Berger argues that if these psychological defenses were reduced so would be society s indifference to necessary action The book s clinically informed approach conceptualizes society s self destructiveness as an analogue to the self destructive psychopathologies of individuals identifies society s ubiquitous and destructive psychological defenses denial projection and avoidance as the chief element in that sociocultural psychopathology and devises a sociocultural therapy This therapy is accomplished by translating a carefully selected individual psychotherapy framework a subtype of the so called analysis of defense into a corresponding societal therapeutic methodology society becomes the patient This intervention is intended to complement and facilitate not replace the usual recommended approaches to rescuing the globe Thus three analogies are deployed between individual and societal pathology defenses and psychotherapy The book s new and valuable principal contributions are the identification of sociocultural psychopathology as the underlying cause of our near indifference to the threat of global extinction the recognition of societal defenses as key elements in that pathology the conceptualization of a therapeutic analogue applicable at the societal level to counter that indifference and the construction of an exemplar of that analogue
