China and East Asia's Post-Crises Community Wei Liang,Faizullah Khilji,2012-10-04 China and East Asia's Post Crises Community A Region in Flux by Wei Liang and Faizullah Khilji explores how an East Asian community is taking shape as a result of China's emergence as a global economic power and the shocks of the financial crises emanating from the globalized financial system Today's East Asia shows a sharp break from the East Asia of the Cold War era in both basis and orientation

Important elements in this shift include the regional economic integration propelled by China's emergence as a processed manufacturing center in the world economy the common problems posed by the working of the dollar based international financial system and the desire to develop institutions that help to formalize the economic integration and financial cooperation that is taking place and may thus help protect and safeguard economic prosperity in the region Liang and Khilji show how the approach to regional economic cooperation and developing institutions comes from the bottom up lacking any leader nation grand vision or ideology The manner in which the region comes to work together also has implications for the governance of the world economy in particular the economic model that underlies policy formulation the working of the international financial system and the approach to the multilateral trading system From a security oriented US centric regional structure characterized as the hub and spokes system set up after the Second World War this region is now more nearly an informal economic community which increasingly appears to be China centric China and East Asia's Post Crises Community presents one of the first attempts to weave together different strands of the current discussion to develop a framework for understanding a rapidly evolving East Asia region

US-India Partnership in the Indo-Pacific Tayyaba Jaffery, 2025-03-31 This book discusses the partnership between the US and India in the Indo Pacific region which also serves as an engine for the Quad alliance of the US India Japan and Australia It investigates the multilateral efforts taken by the Quad and its effects on changing reforming or establishing a new regional security complex against China in the Indo Pacific The theory employed by the author is based on a novel construct of Heterarchical Regional Security Complex HRSC which refers to a de centralized principle of power distribution that is power is not concentrated in a particular element but rather diffused within the entire structure When merged with the Regional Security Complex RSC Theory it presumes the creation of such a security complex in which all members have roughly equal power This book unravels how the Quad can operate as an HRSC in balancing against China's growing hold in the region It is supplemented by the Balance of Threat framework to discuss the functioning of Quad from a minilateral perspective with a heterarchical overlay Besides Quad this book also focuses on the blooming partnership between the US and India since the turn of the century 2007 2020 This book will be beneficial for researchers interested in international relations Asian politics regional security and Indo Pacific studies
