of Captain James Cook on his Voyages of Discovery J.C. Beaglehole, 2017-07-05 Captain James Cook's first two voyages of exploration in 1768-71 and 1772-75 had drawn the modern map of the South Pacific Ocean and had opened the door on the discovery of Antarctica These expeditions were the subject of Volumes I and II of this edition of Cook's Journals The third voyage on which Cook sailed in 1776 was directed to the Northern Hemisphere Sailing north from Tahiti in 1778 Cook made the first recorded discovery of the Hawaiian Islands On March 7 he sighted the Oregon coast in 44°N The remarkable voyage which he made northward along the Canadian and Alaskan coasts and through Bering Strait to his farthest north in 70°N nearly disproved the existence of a navigable passage towards the Atlantic and produced charts of impressive accuracy Returning to Hawaii to refit Cook met his death in a clash with the natives as tragic as it seems unnecessary The volume and vitality of the records both textual and graphic for this voyage surpass those even for Cook's second voyage Dr Beaglehole prints the full text of Cook's own holograph journals followed by those of Captains Clerke and King for the course of the voyage after Cook's death This is a facsimile reprint of the edition published in 1967 For the print on demand edition the illustrations originally in colour are reproduced in black and white the fold outs divided to fit on separate pages and the volume itself split into two parts *Mapping and Empire* Dennis Reinhartz, Gerald D. Saxon, 2005-10-01 From the sixteenth through the mid nineteenth

centuries Spain then Mexico and finally the United States took ownership of the land from the Gulf Coast of Texas and Mexico to the Pacific Coast of Alta and Baja California today's American Southwest Each country faced the challenge of holding on to territory that was poorly known and sparsely settled and each responded by sending out military mapping expeditions to set boundaries and chart topographical features All three countries recognized that turning terra incognita into clearly delineated political units was a key step in empire building as vital to their national interest as the activities of

the missionaries civilian officials settlers and adventurers who followed in the footsteps of the soldier engineers With essays by eight leading historians this book offers the most current and comprehensive overview of the processes by which Spanish Mexican and U S soldier engineers mapped the southwestern frontier as well as the local and even geopolitical consequences of their mapping Three essays focus on Spanish efforts to map the Gulf and Pacific Coasts to chart the inland Southwest and to define and defend its boundaries against English French Russian and American incursions Subsequent essays investigate the role that mapping played both in Mexico s attempts to maintain control of its northern territory and in the United States push to expand its political boundary to the Pacific Ocean The concluding essay draws connections between mapping in the Southwest and the geopolitical history of the Americas and Europe

Historical Dictionary of the Discovery and Exploration of the Northwest Coast of America Robin

Inglis,2008-04-02 The Northwest Coast of America ranging from northern California through Oregon Washington and British Columbia all the way up to Alaska was the last temperate coastline to be placed on the world map First visited by Russians in 1741 and thought to contain a navigable passage between the Pacific and the Atlantic it was systematically revealed during an intense period of exploratory and commercial activity from the 1770s to the 1790s Subsequently the imperial ambitions of Russia Spain and Britain and an assumption of manifest destiny by the United States led to further exploration and ensured that the region would become disputed territory before national boundaries were determined in the mid 19th century The Historical Dictionary of the Discovery and Exploration of the Northwest Coast of America tells of the heroic endeavors and remarkable achievements the endless speculation about a northwest passage and the fighting and manipulation for commercial advantage that surrounded this terrain This is done through an introductory essay a detailed chronology an extensive bibliography modern maps and selected historical maps and drawings and over 400 cross referenced dictionary entries Entries cover the native people encountered the scientists and artists who left an invaluable documentary and visual record of people places flora and fauna the numerous voyages taken by men such as Vitus Bering James Cook Juan Francisco de la Bodega y Quadra and George Vancouver overland expeditions like those of Alexander Mackenzie Simon Fraser Meriwether Lewis and William Clark and David Thompson and maritime fur traders including George Dixon Grigori Shelikhov Robert Gray and William Sturgis No other dictionary exists that is dedicated solely to the coverage of this region
