A New History Of Cataract Surgery Christopher T. Leffler, 2025-08-14 Cataract surgery has been the procedure which has almost defined the profession of ophthalmology for millennia Patients have understood that cataract surgery could transform their lives in an almost miraculous way Much of the history of this surgery has been handed down to us and on occasion we have inherited some myths along with the facts In this two volume monograph we sought to uncover the reality behind the myths This book is entitled *A New History of Cataract Surgery* because it is based on original research from primary sources It is the work of 44 co authors from North America Europe the Middle East and Asia It contains new translations from Latin Greek Sanskrit Chinese Arabic Persian French Dutch and German It contains photographs from private collections We sought to tell stories you might have heard a little about from antiquity onward in a new way Many of the chapters in this book covering the 20th century were written by ophthalmologists who lived through the revolutionary changes in their field and were prime movers in making these advances

The Art is Long Julie Laskaris, 2018-07-17 This volume examines the fifth century medical treatise *On the Sacred Disease* as a sophistic speech and considers its position within the scientific tradition The first part concerns conceptions of science magic and medicine and establishes the antiquity of medicine as a specialized skill The latter part analyzes the treatise in light of sophistic oratory and explores its reception of traditional beliefs This analysis shows that traditional beliefs competition and rhetoric contributed to the intellectual tradition of science Traditional views are shown to have influenced ideas concerning physiology and disease aetiology and transmission Competition expressed in the terms of sophistic debate sharpened the author's arguments *On the Sacred Disease* is important evidence for the influence on fifth century medicine of both sophistic rhetoric and of older medical traditions
