Lord Kelvin The Dynamic Victorian:

Lord Kelvin, the Dynamic Victorian Harold I. Sharlin, Tiby Sharlin, 1979 William Thompson 1824 1907 later Lord Kelvin was the foremost scientific figure of an age that saw the quest of classical physics concluded and marked the beginning of the modern era of atomic physics and relativity Kelvin's role in the 19th century scientific revolution can be compared with Newton's position in the 17th century and Einstein's in the 20th Kelvin meets no simple definition of scientist engineer The reader of his biography will be introduced to an extraordinary figure of a past era who in no way fits the image of the modern specialist It is just this characteristic of Kelvin's life that will take readers scientists and nonscientists into the wider universe of technological innovation derived from scientific theory Kelvin's ideas are expressed in words not in the language of mathematics Kelvin directly influenced James Clerk Maxwell whose work culminated in the electromagnetic theory of light the theory that ushered in the modern period of electrical science and technology Kelvin's work on the Atlantic cable shortened the space between Europe and America from weeks to seconds His controversy with the Darwinians resulted in one of the few scientific debates that the Victorian public followed Kelvin was the nonpareil scientist of the 19th century and his biography encompasses the dynamic scientific changes of the Victorian age Lord Kelvin and the Age of the Earth Joe D. Burchfield, 2009-05-11 Burchfield charts the enormous impact made by Lord Kelvin's application of thermodynamic laws to the question of the earth's age and the heated debate his ideas sparked among British Victorian physicists astronomers geologists and biologists Anyone interested in geologic time and that should include all geologists and a fair smattering of biologists physicists and chemists should make Burchfield's commendable and time tested volume part of their personal library Brent Darymple *Quartely Review of Biology* **Kelvin: Life, Labours and Legacy** Raymond Flood, Mark McCartney, Andrew Whitaker, 2008-04-10 Lord Kelvin was one of the greatest physicists of the Victorian era Widely known for the development of the Kelvin scale of temperature measurement Kelvin's interests ranged across thermodynamics the age of the Earth the laying of the first transatlantic telegraph cable not to mention inventions such as an improved maritime compass and a sounding device which allowed depths to be taken both quickly and while the ship was moving He was an academic engaged in fundamental research while also working with industry and technological advances He corresponded and collaborated with other eminent men of science such as Stokes Joule Maxwell and Helmholtz was raised to the peerage as a result of his contributions to science and finally buried in Westminster Abbey next to Newton This book contains a collection of chapters authored by leading experts covering the life and wide ranging scientific contributions made by William Thomson Lord Kelvin 1824 1907 **A Natural History of Time** Pascal Richet, 2009-10-15 The quest to pinpoint the age of the Earth is nearly as old as humanity itself For most of history people trusted mythology or religion to provide the answer even though nature abounds with clues to the past of the Earth and the stars In *A Natural History of Time* geophysicist Pascal Richet tells the fascinating story of how scientists and philosophers examined those clues and from them built a

chronological scale that has made it possible to reconstruct the history of nature itself Richet begins his story with mythological traditions which were heavily influenced by the seasons and almost uniformly viewed time cyclically The linear history promulgated by Judaism with its story of creation was an exception and it was that tradition that drove early Christian attempts to date the Earth For instance in 169 CE the bishop of Antioch for instance declared that the world had been in existence for 5 698 years and the odd months and days Until the mid eighteenth century such natural timescales derived from biblical chronologies prevailed but Richet demonstrates with the Scientific Revolution geological and astronomical evidence for much longer timescales began to accumulate Fossils and the developing science of geology provided compelling evidence for periods of millions and millions of years a scale that even scientists had difficulty grasping By the end of the twentieth century new tools such as radiometric dating had demonstrated that the solar system is four and a half billion years old and the universe itself about twice that though controversial questions remain The quest for time is a story of ingenuity and determination and like a geologist Pascal Richet carefully peels back the strata of that history giving us a chance to marvel at each layer and truly appreciate how far our knowledge and our planet have come

Nineteenth-Century Science A.S. Weber, 2000-03-10 Nineteenth Century Science is a science anthology which provides over 30 selections from original 19th century scientific monographs textbooks and articles written by such authors as Charles Darwin Mary Somerville J W Goethe John Dalton Charles Lyell and Hermann von Helmholtz The volume surveys scientific discovery and thought from Jean Baptiste Lamarck's theory of evolution of 1809 to the isolation of radium by Marie and Pierre Curie in 1898 Each selection opens with a biographical introduction situating each scientist and discovery within the context of history and culture of the period Each entry is also followed by a list of further suggested reading on the topic A broad range of technical and popular material has been included from Mendeleev's detailed description of the periodic table to Faraday's highly accessible lecture for young people on the chemistry of a burning candle The anthology will be of interest to the general reader who would like to explore in detail the scientific cultural and intellectual development of the nineteenth century as well as to students and teachers who specialize in the science literature history or sociology of the period The book provides examples from all the disciplines of western science chemistry physics medicine astronomy biology evolutionary theory etc The majority of the entries consist of complete unabridged journal articles or book chapters from original 19th century scientific texts *It's Part of What We Are - Volumes 1 and 2 - Volume 1: Richard Boyle (1566-1643) to John Tyndall (1820-1893); Volume 2: Samuel Haughton (18210-1897) to John Stewart Bell (1928-1990)* Charles Mollan, 2007-11-15 Biographies of more than 100 Irish scientists or those with strong Irish connections in the disciplines of Chemistry and Physics including Astronomy Mathematics etc describing them in their Irish and international scientific social educational and political context Written in an attractive informal style for the hypothetical educated layman who does not need to have studied science Well received in Irish and international reviews *Astrophysical Hydrodynamics* Steven N.

Shore,2008-06-25 This latest edition of the proven and comprehensive treatment on the topic from the bestselling author of *Tapestry of Modern Astrophysics* has been updated and revised to reflect the newest research results Suitable for AS0000 and AS0200 courses as well as advanced astrophysics and astronomy lectures this is an indispensable theoretical backup for studies on celestial body formation and astrophysics Includes exercises with solutions **Ten Equations to Explain the**

Mysteries of Modern Astrophysics Santhosh Mathew,2019-06-15 This book introduces ten equations that transcend the boundaries of time and space It takes readers through a journey of self discovery where they will learn the history science and significance of these equations in the context of their lives Moreover the mathematical beauty of these equations is presented in a profoundly modest fashion to highlight the idea that equations are eternal but humans are transient Each chapter offers readers a sublime experience and provides insights into the laws of nature that address the ever expanding intricacy of our universe The history of humankind according to Franz Kafka is the instant between two strides taken by a traveler Therefore what remains eternal when we finish our journey on this tiny rocky planet is our deep desire to connect with everything else in this universe These equations capture the essence of that aspiration and remain everlasting while we continue our trivial human pursuits These equations change the way we live and view the world and will outlast even the most enduring signs of our civilization They have the potential to take us from planet to planet and perhaps to make us a cosmic species They can destroy the last strand of DNA to terminate life as we know it and generate life again from the fundamental laws of nature While these equations remain intangible they can create a tangible world yet remain truly eternal

Speculative Modernism William Gillard,James Reitter,Robert Stauffer,2021-11-04 Speculative modernists that is British and American writers of science fiction fantasy and horror during the late 19th and early 20th centuries successfully grappled with the same forces that would drive their better known literary counterparts to existential despair Building on the ideas of the 19th century Gothic and utopian movements these speculative writers anticipated literary Modernism and blazed alternative literary trails in science religion ecology and sociology Such authors as H G Wells and H P Lovecraft gained widespread recognition budding from them other speculative authors published fascinating tales of individuals trapped in dystopias of anti society attitudes post apocalyptic worlds and the rapidly expanding knowledge of the limitless universe This book documents the Gothic and utopian roots of speculative fiction and explores how these authors played a crucial role in shaping the culture of the new century with their darker more evolved themes *Connecting the Dots* Richard K.

Caputo,2017-11-21 Richard K Caputo an under the radar social work scholar shares lessons about finding his voice as a scholar overcoming obstacles and navigating the rigors and expectations of academia in this memoir From his days as an undergraduate to a graduate student from being a paraprofessional at Arizona State Hospital and Division of Behavioral Health Services to a professional social worker at a family service agency then known as United Charities of Chicago and from an agency based professional to an academic he reveals the trials tribulations and tradeoffs that went with each

transition He also pays homage to the mentors that helped him succeed in his various roles including being a junior faculty member at the University of Pennsylvania School of Social Work a continuing contract faculty member at the Barry University School of Social Work and finally as a tenured faculty member at the Yeshiva University Wurzweiler School of Social Work Join the author as he chronicles his journey navigating the political and social environment from the 1960s through the 2010s and juggling the demands of university life in Connecting the Dots
