Lorine Niedecker Collected Works:

Collected Works Lorine Niedecker, 2002 This volume presents all of Lorine Niedecker's surviving poetry plays and creative prose in the sequence of their composition It includes many poems previously unpublished in book form and all of Niedecker's surviving 1930s surrealist work *Lake Superior* Lorine Niedecker, 2013-04-02 A reader friendly anthology of influence the geologic historical and personal history to supplement Lorine Niedecker's poem **Poetics and Praxis** 'After' Objectivism W. Scott Howard, Broc Rossell, 2018-08-15 Poetics and Praxis After Objectivism includes an introduction ten chapters and a roundtable afterward all of which have been written specifically for this volume The collection examines late twentieth and early twenty first century poetic praxis within and against the dynamic disparate legacy of Objectivism and the Objectivists This is the first volume in the field to study this vital legacy through current poetic praxis renewing the complexities of the past in terms of the difficulties of the present The book's scope investigates the continuing relevance of the Objectivist ethos to poetic praxis in our time examining and exemplifying generative intersections of creativity and critique *The Zukofsky Era* Ruth Jennison, 2012-07-30 Zukofsky Oppen and Niedecker wrote with a diversity of formal strategies but a singularity of purpose the crafting of an anticapitalist poetics Inaugurated in 1931 by Louis Zukofsky Objectivist poetry gave expression to the complex contours of culture and politics in America during the Great Depression This study of Zukofsky and two others in the Objectivist constellation George Oppen and Lorine Niedecker elaborates the dialectic between the formal experimental features of their poetry and their progressive commitments to the radical potentials of modernity Mixing textual analysis archival research and historiography Ruth Jennison shows how Zukofsky Oppen and Niedecker braided their experiences as working class Jews political activists and feminists into radical canon challenging poetic forms Using the tools of critical geography Jennison offers an account of the relationship between the uneven spatial landscapes of capitalism in crisis and the Objectivists paratactical texts In a rethinking of the overall terms in which poetic modernism is described she identifies and assesses the key characteristics of the Objectivist avant garde including its formal recognition of proliferating commodity cultures its solidarity with global anticapitalist movements and its imperative to develop poetics that nurtured revolutionary literacy The resulting narrative is a historically sensitive thorough and innovative account of Objectivism's Depression era modernism A rich analysis of American avant garde poetic forms and politics The Zukofsky Era convincingly situates Objectivist poetry as a politically radical movement comprising a crucial chapter in American literary history Scholars and students of modernism will find much to discuss in Jennison's theoretical study Modernism, the Market and the Institution of the New Rod Rosenquist, 2009-01-08 This book examines the problems faced by innovative writers working in a late modernist era dominated by Joyce Eliot and Pound *Defensive Measures* Lee Upton, 2005 Much of our strongest poetry that learned its lessons from early modernism lives by its defensive measures that is by means of reversing inverting and challenging in covert ways a dominant perceptual mode Defensive

Measures explores strategies by which poets claim their distinctiveness and argues that poetry is the one literary form that most insistently demands a defense. It demands a defense it would seem because it is perpetually in crisis not only in regard to its utility and its aesthetic appeal or the vigor of its renunciation of such an appeal but in regard to its generic existence. Upton defines a generative conception of defense and examines in a new light the poetry of Lorine Niedecker, Elizabeth Bishop, Louise Gluck, and Anne Carson. In writing about Bishop, Upton puts this well-regarded poet in a new framework, aligning her work with that of three poets whose aesthetics might be viewed as antithetical to her own. *Global Appetites* Allison Carruth, 2013-05-31 *Global Appetites* explores how industrial agriculture and countercultural food movements underpin US conceptions of global power in the century since the First World War. Allison Carruth's study centers on what she terms the literature of food, a body of work that comprises literary realism, late modernism, and magical realism, along with culinary writing, food memoir, and advertising. Through analysis of American texts ranging from Willa Cather's novel *O Pioneers!* (1913) to Novella Carpenter's non-fiction work *Farm City* (2009), Carruth argues that stories about how the United States cultivates, distributes, and consumes food imbue it with the power to transform social and ecological systems around the world. Lively and accessible, this interdisciplinary study will appeal to scholars of American literature and culture as well as those working in the fields of food studies, food policy, agriculture history, social justice, and the environmental humanities.

Dictionary Poetics Craig Dworkin, 2020-05-05 The new ways of writing pioneered by the literary avant-garde invite new ways of reading commensurate with their modes of composition. *Dictionary Poetics* examines one of those modes: book-length poems from Louis Zukofsky to Harryette Mullen, all structured by particular editions of specific dictionaries. By reading these poems in tandem with their source texts, Dworkin puts paid to the notion that even the most abstract and fragmentary avant-garde literature is nonsensical, meaningless, or impenetrable. When read from the right perspective, passages that at first appear to be discontinuous, irrational, or hopelessly cryptic suddenly appear logically consistent, rationally structured, and thematically coherent. Following a methodology of critical description, *Dictionary Poetics* maps the material surfaces of poems, tracing the networks of signifiers that undergird the more familiar representational schemes with which conventional readings have been traditionally concerned. In the process, this book demonstrates that new ways of reading can yield significant interpretive payoffs, open otherwise unavailable critical insights into the formal and semantic structures of a composition, and transform our understanding of literary texts at their most fundamental levels. **Remainders** Margaret Ronda, 2018-03-20 A literary history of the Great Acceleration, *Remainders* examines an archive of postwar American poetry that reflects on new dimensions of ecological crisis. These poems portray various forms of remainders: from obsolescent goods and waste products to atmospheric pollution and melting glaciers that convey the ecological consequences of global economic development. While North American ecocriticism has tended to focus on narrative forms in its investigations of environmental consciousness and ethics, Margaret Ronda highlights the ways that poetry explores other dimensions of

ecological relationships The poems she considers engage in more ambivalent ways with the problem of human agency and the limits of individual perception and they are attuned to the melancholic and damaging aspects of environmental existence in a time of generalized crisis Her method which emphasizes the material histories and uneven effects of capitalist development models a unique critical approach to understanding the causes and conditions of ongoing biospheric catastrophe

The Cambridge Companion to Modern American Poetry Walter Kalaidjian, 2015-01-19 The Cambridge Companion to Modern American Poetry comprises original essays by eighteen distinguished scholars It offers a critical overview of major and emerging American poets of the twentieth century in addition to critical accounts of the representative schools movements regional settings archival resources and critical reception that define modern American poetry The Companion stretches the narrow term of literary modernism which encompasses works published from approximately 1890 to 1945 to include a more capacious and usable account of American poetry's evolution from the twentieth century to the present The essays collected here seek to account for modern American verse against the contexts of broad political social and cultural fields and forces This volume gathers together major voices that represent the best in contemporary critical approaches and methods
