Cosby, 2024-01-26 The history of rock and roll music can be seen in a long arc of Western civilization's struggle for both greater individual expression and societal stability In the 1960s the West's relationship with authority ruptured in part due to the rock revolution The lessons and implications of this era have yet to be fully grasped This book examines the key artists music and events of the classic rock era defined here as 1964 to 1980 through a virtual psychoanalysis of the West Over these years important truths unfold in the stories of British Invaders hippies proto punks and more as well as topics to include drugs primal scream therapy the occult spirituality and disco and its detractors to name just a few Through a narrative that is equal parts entertaining scholarly and even spiritual readers will gain a greater appreciation for rock music better understand the confusing world we live in today and see how greater individuality and social stability may be better reconciled moving forward *The Beatles* , **Interdisciplinary Essays on Environment and Culture** Luigi Manca, Jean-Marie Kauth, 2015-12-24 This is a collection of essays about the media the environment and the whole of humanity at the brink of extinction As the demands of overpopulation and of an unsustainable consumer economy dry up existing natural resources and destroy vital ecosystems that we need to survive the corporate controlled media saturate worldwide audiences with a barrage of hypnotic images and narratives to stimulate over consumption and to distract us from the consequences of rampant consumerism while remaining silent about the systematic destruction of the environment and our future Academicians from the across the sciences the social sciences the arts and the humanities engage in an interdisciplinary discussion informed by a vision of an interconnected humanity and focused on the role of the media in forging public discourse Contributors to the collection argue that today's media are failing humanity Rather than providing pictures of reality on which the world's citizens can act the corporate controlled media are widely used as instruments of commercial and political propaganda creating an immense web of images and narratives that their creators know to be not true fabrications designed to sell to manipulate in a sense to enslave worldwide audiences At the core of the discussion in this book is a utopian vision of one unified humanity billions of people whose destinies and dreams are imbricated and interdependent and who share the same world the same habitats It is a vision of a world that cherishes diversity but is also united a world where our differences are no longer a cause for conflict and where separate countries or separate ethnic or religious communities no longer have to compete or wage war to exploit available resources As extensions of humans the media can be instruments of salvation instead of destruction liberation instead of oppression But first we must recognize the challenges we face
