Lire comprendre se souvenir Trois activités dont les recherches de psychologie cognitive soulignent l' étroite interdépendance Adoptant une orientation cognitive et scientifique cet ouvrage est consacré à l'étude des relations entre la mémoire et la compréhension des textes Il est postulé que comprendre un texte c'est en construire la représentation cognitive et que les performances de mémoire dépendent des propriétés de celle-ci La question de la nature de la représentation est traitée dans les deux premiers chapitres Des éléments d'analyse linguistique des structures phrasiques et textuelles sont présentés avant que ne soient discutées les conceptualisations en termes de modèles propositionnels et de modèles mentaux Au terme de cet exposé la représentation cognitive d'un texte est définie comme une configuration de structures cognitives sémantiques produites d'un ensemble de processus Au-delà de l'accès au lexique et de l'analyse syntaxico-sémantique ce sont les processus d'ordre supérieur qui sont considérés Ainsi dans les chapitres suivants sont présentées des recherches dont l'objectif est d'étudier les processus de traitement de la structure globale du texte Les notions de cohésion et de cohérence sont tout fait centrales Cet ouvrage illustre les avancées d'une branche très active de la psychologie cognitive tout en soulignant les problèmes qui restent à élucider requérant une collaboration interdisciplinaire Il donne en outre un cadre solide aux études qui se préoccupent de mémoire des fins pédagogiques

130 exercices pour comprendre un texte Marie-Christine Perret, 2021-11-02 Les difficultés de compréhension de l'écrit sont souvent dues à une représentation erronée de l'écrit La lecture n'est pas mise en doute mais la compréhension est perturbée engendrant parfois des interprétations fantaisistes Cet ouvrage a donc pour objectif d'aider les enfants du CM1 jusqu'à la 3e pour lesquels l'accès à la compréhension de l'écrit demeure difficile travers 130 exercices cet ouvrage donne les clés de compréhension des différents types de textes narratifs descriptifs informatifs et argumentatifs Chaque texte est accompagné de deux images et le lecteur devra établir un lien pertinent entre l'écrit et le dessin correspondant Les écrits sont suivis de questions de deux ordres les unes pour s'assurer que la cohérence du texte a bien été établie ou pour obliger l'enfant à avoir une démarche de compréhension et les autres qui sollicitent le jugement du jeune lecteur en l'incitant à faire le lien entre ce qu'il lit ce qu'il sait ce qu'il vit ou a vécu et en lui permettant de donner son opinion Le corrigé des questions est disponible à la fin de chaque chapitre L'ouvrage est complété par un minisite contenant tous les exercices et permettant au professionnel d'imprimer séparément chaque fiche d'exercice Cette 3e édition cible sur les enfants s'enrichit d'une trentaine de nouveaux exercices Elle exclut les textes pour adultes qui feront l'objet d'un ouvrage spécifique

Psychology Serge P. Shohov, 2002 Cognitive psychology is concerned with several mental processes including those involved in perception attention learning memory problem solving decision making and the use of language It is often said that cognitive psychology tries to understand how people represent their experience and then use these representations to operate effectively Cognitive psychology holds that people are not passive organisms whose mental representations are simple or direct reflections of the outside world Rater they are active processors of environmental events and as such they

bring their past knowledge and their biases to bear on how they perceive and understand all current events Thus perceiving imagining thinking remembering forming concepts and solving problems indeed all aspects of people s mental lives define the domain of cognitive exploration This book presents important research which was carefully selected and screened for both current relevance and long term advancement of the field

Psychology and Cognitive Science Michel Denis,1998 This special issue includes revised versions of papers presented at the IUPsyS Symposium Psychology and Cognitive Science held during the XXVIth International Congress of Psychology in Montreal August 1996 The introductory article reports the results of an international survey conducted for the IUPsyS on the place and role of psychology in cognitive science the next three papers are illustrations of interdisciplinary approaches to cognitive issues Approaches to discourse comprehension by cognitive psychology artificial intelligence linguistics and neurobiology are discussed and it is considered how the human mind and machines represent knowledge from discourse and text Finally there is a description of a computational approach to vision and language inspired by psychological theories

Neuropsychologie et troubles des apprentissages chez l'enfant Michèle Mazeau, Alain Pouhet, Emmanuelle Ploix-Maes, 2021-06-01. L'ensemble de la symptomatologie des troubles cognitifs spécifiques au sein des troubles du neurodéveloppement chez l'enfant a été rassemblé en un seul volume entièrement révisé pour cette 3^e édition afin de tenir compte des études les plus récentes. Le premier chapitre précise la terminologie de ces troubles et définit clairement ce que sont et ne sont pas les situations de dysfonctionnement global conduisant leur diagnostic et rappelle les spécificités du bilan neuropsychologique. Les troubles sont ensuite successivement développés et richement illustrés selon qu'ils affectent le langage oral, le geste, la mémoire, l'attention et les fonctions exécutives, le langage écrit ou le nombre et le calcul. Les auteurs adoptent une stratégie propre à la neuropsychologie : partir de la description des notions développementales et du fonctionnement typique du domaine considéré sont abordés les mécanismes pathologiques sous-jacents aux symptômes. Ces processus sous-tendent la description des symptômes et les propositions thérapeutiques et recommandations pédagogiques, contournement de la situation de handicap. De nombreux exemples de cas cliniques accompagnés de reproductions d'exercices, de retranscriptions d'entretiens, de tests de valuation et plus de 20 vidéos illustrent ces mécanismes et facilitent leur compréhension.

Children's Discourse Maya Hickmann, 2002-11-21. This comparative study explores two central questions in the study of first language acquisition: What is the relative impact of structural and functional determinants? What is universal versus language specific during development? Maya Hickmann addresses these questions in three domains of child language: reference to entities, the representation of space and uses of temporal aspectual markings. She provides a thorough review of different theoretical approaches to language acquisition and a wide range of developmental research as well as examining all three domains in English, French, German and Chinese narratives. Hickmann's findings concern the rhythm of acquisition, the interplay among different factors (syntactic, semantic, pragmatic) determining children's uses and universal versus variable aspects of acquisition. Her conclusions stress the importance of relating sentence and discourse determinants of acquisition in a crosslinguistic perspective. *Children's Discourse* will be welcomed by those working in psychology and language-related disciplines interested in first language acquisition.
