Machine Translation And Translation Theory:

Machine Translation and Translation Theory Christa Hauenschild, Susanne Heizmann, 2011-08-02 The series serves to propagate investigations into language usage especially with respect to computational support This includes all forms of text handling activity not only interlingual translations but also conversions carried out in response to different communicative tasks Among the major topics are problems of text transfer and the interplay between human and machine activities

Machine Translation and Translation Theory Omri Asscher, 2025-07-17 Pervasive and ubiquitous machine translation systems have been transforming communication and understanding across languages and cultures on a historical scale Focused on both Neural Machine Translation tools such as Google Translate and generative AI tools such as ChatGPT Omri Asscher pursues the juncture between machine translation and the diverse often competing frameworks of human translation theory He shines a light on the subtleties of the intersection between the two the places where machine translation corresponds well with the ideas that have been developed on human translation throughout the years and the places where machine translation seems to challenge translation theory and perhaps even require that we rethink some of its basic assumptions Machine Translation and Translation Theory reflects the need for an accessible panoramic view on the subject It offers a detailed discussion of various points of theoretical interest definitions of translation equivalence in translation aesthetics of translation translation ethics translation as cross cultural communication and translation s historical agency This is key reading for researchers and students in translation studies as well as scholars of AI mediated communication and computer scientists interested in how machine translation architectures correspond with the understanding of translation in the humanities

The Possibility of Language Alan K. Melby, Terry Warner, 1995-12-08 This book is about the limits of machine translation It is widely recognized that machine translation systems do much better on domain specific controlled language texts domain texts for short than on dynamic general language texts general texts for short The authors explore this general domain distinction and come to some uncommon conclusions about the nature of language Domain language is claimed to be made possible by general language while general language is claimed to be made possible by the ethical dimensions of relationships Domain language is unharmed by the constraints of objectivism while general language is suffocated by those constraints Along the way to these conclusions visits are made to Descartes and Saussure to Chomsky and Lakoff to Wittgenstein and Levinas From these conclusions consequences are drawn for machine translation and translator tools for linguistic theory and translation theory The title of the book does not question whether language is possible it asks with wonder and awe why communication through language is possible

Translation and Practice Theory Maeve Olohan, 2020-10-13 Translation and Practice Theory is a timely and theoretically innovative study linking professional practice and translation theory showing the usefulness of a practice theoretical approach in addressing some of the challenges that the professional world of translation is currently facing including for example the increasing deployment of

machine translation Focusing on the key aspects of translation practices Olohan provides the reader with an in depth understanding of how those practices are performed as translators interact with people technologies and other material resources in the translation workplace The practice theoretical perspective helps to describe and explain the socio material complexities of present day commercial translation practice but also offers a productive approach for studies of translation and interpreting practices in other settings and periods This first book length exploration of translation through the lens of practice theory is key reading for advanced students and researchers of Translation Theory It will also be of interest in the area of professional communication within Communication Studies and Applied Linguistics Computers and Translation H. L. Somers, 2003-01-01 Designed for translators and other professional linguists this work attempts to clarify explain and exemplify the impact that computers have had and are having on their profession The book concerns machine translation computer aided translation and the future of translation and the computer *Translation and Information Technology*

Sin-wai Chan, 2002 Information technology has created new challenges for translation In this text contributors in computational linguistics machine translation and translation studies discuss the effect of electronic tools on translation and the conceptual gaps raised by the interface of human and machine Exploring Translation Theories Anthony Pym, 2017-11-27 Exploring Translation Theories presents a comprehensive analysis of the core contemporary paradigms of Western translation theory The book covers theories of equivalence purpose description uncertainty localization and cultural translation This second edition adds coverage on new translation technologies volunteer translators non lineal logic mediation Asian languages and research on translators cognitive processes Readers are encouraged to explore the various theories and consider their strengths weaknesses and implications for translation practice The book concludes with a survey of the way translation is used as a model in postmodern cultural studies and sociologies extending its scope beyond traditional Western notions Features in each chapter include An introduction outlining the main points key concepts and illustrative examples Examples drawn from a range of languages although knowledge of no language other than English is assumed Discussion points and suggested classroom activities A chapter summary This comprehensive and engaging book is ideal both for self study and as a textbook for Translation theory courses within Translation Studies Comparative Literature and Applied Linguistics *Translation and Technology* Chiew Kin Quah, 2006-04-12 Chiew Kin Quah draws on years of academic and professional experience to provide an account of translation technology its applications and capabilities Major developments from North America Europe and Asia are described including developments in uses and users of the technology *Translation* Marianne Lederer, 2014-04-08 This book the English version of La traduction aujourd'hui Hachette 1994 describes the interpretive theory of translation developed at the Paris Ecole Sup rieure d'Interpr tes et de Traducteurs ESIT over the last 35 years The theory identifies the mental and cognitive processes involved in both oral and written translation understanding the text deverbilizing its language re expressing sense For the purposes of translation

languages are a means of transmitting sense they are not to be translated as such Although translation involves the use of correspondences translators generally set up equivalence between text segments The synecdochic nature of both languages and texts a phenomenon discussed in the book explains why translation is possible across language differences The many practical problems faced by translators the difference between translation exercises used as a language teaching tool and professional translation translating into a foreign language and machine translation as compared to human translation are also discussed

Language Engineering and Translation Juan C. Sager, 1994-04-22 At a time when information technology has become a regular tool of specialised translators in all aspects of their work it is useful to place the activity of technical translation into its appropriate environment and to describe it from the point of view of its role in the broader context of communication in which it occurs The advent of automated alternatives to human translation has fundamentally affected the profession its products and the relationship between translators and their clients This book presents and discusses the process of translation against this background The context in which translation is normally studied is widened in order to re-examine the process of translation as part of interlingual text production and to analyse the manner in which the new tools affect the product of translation This book is of particular relevance in modern translator training courses

Contents 1 The language industry and translation 2 Aspects of language 3 Elements of communication theory 4 A theory of text types and messages 5 The nature of translation 6 Specifications Factors influencing the translation 7 Preparation for translation 8 Steps in translation 9 Human and Machine Translation 10 Pragmatic circumstances of automation 11 Translation in an information technology environment Bibliography Index

The Human Factor in Machine Translation Sin-wai Chan, 2018-05-08 Machine translation has become increasingly popular especially with the introduction of neural machine translation in major online translation systems However despite the rapid advances in machine translation the role of a human translator remains crucial As illustrated by the chapters in this book man machine interaction is essential in machine translation localisation terminology management and crowdsourcing translation In fact the importance of a human translator before during and after machine processing cannot be overemphasised as human intervention is the best way to ensure the translation quality of machine translation This volume explores the role of a human translator in machine translation from various perspectives affording a comprehensive look at this topical research area This book is essential reading for anyone involved in translation studies machine translation or interested in translation technology

Human Issues in Translation Technology Dorothy Kenny, 2017-01-12 Provides a new perspective and focus on the human dimension Offers a new critical approach to the subject drawing on a range of theories from cognitive to social and psychological Provides empirical evidence of what the technologization of the workplace means to translators
