Micro-Behavioral Economics of Global Warming S. Niggol Seo, 2015-03-30 This book presents a foundation for studying the micro behavioral economics of global warming The author develops an empirical model named the Geographically scaled Micro econometric model of Adapting Portfolios G MAP in response to climatic changes and risks The G MAP model is applied to observed decisions of agricultural and natural resource enterprises in Sub Saharan Africa and South America The author describes the five applications of the model the G MAP animal species the G MAP agricultural systems the G MAP natural resource enterprises the G MAP climate risk and the G MAP public adaptations The micro behavioral economics of global warming and the G MAP models are evaluated against the three alternative modeling traditions The first is the Agro Economic Models AEM based on crop simulations of selected crops under elevated CO₂ conditions The second is a family of econometric studies of grain yield changes caused by yearly weather fluctuations The third is the Agro Ecological Zone AEZ method hinged crucially on the AEZ classifications of ecosystems The author offers a refreshing look at the traditional economics of global warming unraveling a broad array of adaptation strategies adopted by managers of agricultural and natural resource enterprises in Sub Saharan Africa and South America The book demonstrates that the micro behavioral economics dynamically integrates multiple disciplines in a cohesive way including economics psychology climate science ecosystem studies agronomy and animal science into the decision making framework of an individual agent The G MAP models provide a guide map of adaptation strategies for the humanity s enduring journey of battling global climatic changes in this century and beyond
