Pempel, Chung-Min Lee, 2012-06-14 Defining and conceptualizing Northeast Asia's security complex poses unique quandaries The security architecture in Northeast Asia to date has been predominately U.S. dominated bilateral alliances weak institutional structures and the current Six Party Talks dealing with the North Korean nuclear issue There has been a distinct lack of desire among regional countries as well as the U.S. to follow in the footsteps of Europe with its robust set of multilateral institutions However since the late 1990s there has been burgeoning interest among regional states towards forming new multilateral institutions as well as reforming and revitalizing existing mechanisms Much of this effort has been in the economic and political arenas with the creation of bodies such as the East Asian Summit but there have also been important initiatives in the security sphere This book offers detailed examinations about how this potentially tense region of the world is redefining certain longstanding

national interests and shows how this shift is the result of changing power relations the desire to protect hard won economic gains as well as growing trust in new processes designed to foster regional cooperation over regional conflict Presenting new and timely research on topics that are vital to the security future of one of the world s most important geographical regions this book will be of great value to students and scholars of Asian politics regionalism international politics and security studies

The China Reader David Shambaugh, 2016-03-29 The rise of China is the most significant development in world affairs in this generation No nation in history has risen as quickly or modernized as rapidly as has China over the four decades This sixth edition of The China Reader chronicles the diverse aspects of this transition since the late 1990s It is comprehensive in scope and draws upon both primary Chinese sources and secondary Western analyses written by the world s leading experts on contemporary China Perfectly suited as both a textbook for students as well as for specialists and the public alike the volume covers the full range of China s internal and external developments During the past three decades China dramatically modernized its economy and taken a position as one of the two major powers in the world Its mega economy has skyrocketed to being the second largest in the world and will soon surpass the United States on aggregate The physical transformation of the country has been extraordinary to witness with infrastructure development unparalleled in human history Modern cities featuring futuristic architecture have literally risen from farmland across the country As China has developed domestically it has also taken its place as a major power on the world stage Whether in its relations with other powers the United States Russia and European Union with its neighbors in Asia or other countries across the world China is now a major factor in international relations Its businesses are going global and its people are establishing their footprint from Antarctica to outer space For all its newfound prowess China s rise has not been a smooth process Domestically the nation s juggernaut economy has produced numerous negative social and environmental side effects Its political system remains anachronistic and authoritarian with substantial repression Externally Beijing s rapid military modernization and regional territorial claims have alarmed China s neighbors Its relationship with the United States is complex and increasingly strained And its soft power remains limited Still the rise of China is the story of the current era The China Reader is a perfect window into the complexities of this historic process
