A Cultural History of the Violin in Nineteenth-Century London Tom Wilder, 2025-03-18 Examines the violin s evolution as not just instrument but valued objet d art through the eyes of musicians collectors makers dealers connoisseurs journalists auctioneers and traders The nineteenth century saw developments in the composition performance and reception of classical music that led to an unprecedented shift in how the violin was appreciated from humble craft object to one of art A utilitarian tool defined in 1800 by its tonal properties became by century s end an expensive objet d art classified almost exclusively in terms of physical visible properties In London s vibrant musical life Cremonese violins acquired special significance and in turn helped shape the beliefs knowledge and behaviour of the disparate actors connected to the instrument musicians collectors makers dealers connoisseurs journalists auctioneers and traders By 1880 London had supplanted Paris as the centre of the international violin trade One firm in particular W E Hill Sons emerged as a major presence in both the local musical community and the global violin market The Hills were makers

restorers dealers and connoisseurs They were also writers collectors and melomaniacs deeply implicated in London s instrument auction and exhibition scene The mutually reinforcing nature of these activities which they consciously turned to account for commercial reasons bear witness to events and developments earlier in the century Their story illuminates this first study of the violin s nineteenth century journey from simple musical instrument to mystified work of art *Makers of Nineteenth Century Culture 1800-1914* Justin Wintle,1978 Makers of Nineteenth Century Culture Justin Wintle Esq,Justin Wintle,2021-12-24 This volume provides a critical examination of the lives and works of the leading novelists poets dramatists artists philosophers social thinkers mathematicians and scientists of the period The subjects are assessed in the light of their cultural importance and each entry is deliberately interpretative making this work both an essential reference tool and an engaging collection of essays Figures covered include Marx Wagner Darwin Malthus Balzac Jane Austen Nietzsche Babbage Edgar Allan Poe Ruskin Schleiermacher Herbert Spencer Harriet Martineau and Oscar Wilde

Biography and the Question of Literature in France Ann Jefferson,2007-01-04 This book takes a fresh look at the relations between literature and biography by tracing the history of their connections through three hundred years of French literature The starting point for this history is the eighteenth century when the term biography first entered the French language and when the word literature began to acquire its modern sense of writing marked by an aesthetic character Arguing that the idea of literature is inherently open to revision and contestation Ann Jefferson examines the way in which biographically orientated texts have been engaged in questioning and revising definitions of literature At the same time she tracks the evolving forms of biographical writing in French culture and proposes a reappraisal of biography in terms not only of its forms but also of its functions Although Ann Jefferson s book has powerful theoretical implications for both biography and the literary it is first and foremost a history offering a comprehensive new account of the development of French literature through this dual focus on the question of literature and on the relations between literature and biography It offers original readings of major authors and texts in the light of these concerns beginning with Rousseau and ending with life writing contemporary authors such as Pierre Michon and Jacques Roubaud Other authors discussed include Mme de St el Victor Hugo Sainte Beuve Barbey d Aureville Baudelaire Nerval Mallarm Schwob Proust Gide Leiris Sartre Genet Barthes and Roger Laporte

A Cultural History of Furniture in the Age of Empire and Industry Catherine L. Futter,Christina M. Anderson,2022-02-24 The 19th century in Western culture was a time of both confidence and turbulence Industrial developments resulted in a number of benefits from a growing middle class to efficiency convenience and innovation across a range of fields from engineering to architecture Alongside these improvements the century began with the extended period of the Napoleonic Wars and was further disrupted by rebellions and revolutions both within Europe and in India South America and other parts of the world Slavery was abolished and urbanization increased dramatically These myriad developments were reflected throughout the period in the proliferation of types of furniture along with their categorization as industrial art at the international exhibitions and world fairs and the increasingly adventurous range of materials that were sometimes used in their construction Nonetheless a strong antiquarian historicist strand also prompted interest in the revival of past styles in areas of art and design including furniture Drawing upon a wealth of visual and textual sources this volume presents essays that examine key characteristics of the furniture of the period on the themes of Design and Motifs Makers Making and Materials Types and Uses The Domestic Setting The Public Setting Exhibition and Display Furniture and Architecture Visual Representations and Verbal Representations *Reference Sources in History* Ronald H. Fritze,Brian E. Coutts,Louis A. Vyhnanek,2004-03-09 Fully annotated and completely updated the most comprehensive guide to reference books in the field

of history Reference Sources in History catalogs atlases encyclopedias dictionaries handbooks sourcebooks bibliographies and chronologies and makes sense of it all Its broad scope and systematic organization make it an accessible reliable resource for experienced and inexperienced researchers alike Fully annotated and updated the new edition summarizes hundreds of reference works on every conceivable subject in history from ancient to modern from Afghanistan to Zimbabwe This edition also reflects the dramatic impact of the digital revolution on historical research by integrating a wide range of Internet and CD ROM sources Reference Sources in History is a time saving alternative to searching the reference stacks or getting lost in an online thicket of dubious historical websites

Re-Imagining Democracy in the Mediterranean, 1780-1860 Joanna Innes, Mark Philp, 2018-10-25 Mediterranean states are often thought to have democratized only in the post war era as authoritarian regimes were successively overthrown On its eastern and southern shores the process is still contested Re imagining Democracy looks back to an earlier era the late eighteenth and early nineteenth centuries and argues it was this era when some modern version of democracy in the region first began By the 1860s representative regimes had been established throughout southern Europe and representation was also the subject of experiment and debate in Ottoman territories Talk of democracy its merits and limitations accompanied much of this experimentation though there was no agreement as to whether or how it could be given stable political form Re imagining Democracy assembles experts in the history of the Mediterranean who have been exploring these themes collaboratively to compare and contrast experiences in this region so that they can be set alongside better known debates and experiments in North Atlantic states States in the region all experienced some form of subordination to northern great powers In this context their inhabitants had to grapple with broader changes in ideas about state and society while struggling to achieve and maintain meaningful self rule at the level of the polity and self respect at the level of culture Innes and Philip highlight new research and ideas about a region whose experiences during the age of revolutions are at best patchily known and understood as well as to expand understanding of the complex and variegated history of democracy as an idea and set of practices

The History and Poetics of Scientific Biography Thomas Söderqvist, 2016-03-03 Biographies of scientists carry an increasingly prominent role in today's publishing climate Traditional historical and sociological accounts of science are complemented by narratives that emphasize the importance of the scientific subject in the production of science Not least is the realization that the role of science in culture is much more accessible when presented through the lives of its practitioners Taken as a genre such biographies play an important role in the public understanding of science In recent years there has been an increasing number of monographs and collections about biography in general and literary biography in particular However biographies of scientists engineers and medical doctors have rarely been the topic of scholarly inquiry As such this volume of essays will be welcomed by those interested in the genre of science biography and who wish to re examine its history foundational problems and theoretical implications Borrowing approaches and methods from cultural studies and the history philosophy

and sociology of science the contributions cover a broad range of subjects periods and locations By presenting such a rich diversity of essays the volume is able to chart the reoccurring conceptual problems and devices that have influenced scientific biographies from classical antiquity to the present day In so doing it provides a compelling overview of the history of the genre suggesting that the different valuations given scientific biography over time have been largely fuelled by vested professional interests

Women and museums 1850-1914 Kate Hill, 2016-07-01 This book recovers the significant contribution made by women to museums not just in obvious roles such as workers but also as donors visitors volunteers and patrons It suggests that women persistently acted to domesticate the museum by importing domestic objects and domestic regimes of value as well as by making museums more welcoming to children and even by stressing the importance of housekeeping at the museum At the same time women sought masculine careers in science and curatorship but found such aspirations hard to achieve their contribution tended to be kept within clear feminised areas The book will be of interest to those working on gender culture or museums in the period It sheds new light on women's material culture and material strategies education and professional careers and leisure practices It will form an important historical context for those working in contemporary museum studies *New Society*, 1982

The Culture of History Billie Melman, 2006-06-22 In this original and widely researched book Billie Melman explores the culture of history during the age of modernity Her book is about the production of English pasts the multiplicity of their representations and the myriad ways in which the English looked at history sometimes in the most literal sense of looking and made use of it in a social and material urban world and in their imagination Covering the period between the Napoleonic Wars and the Coronation of 1953 Melman recoups the work of antiquarians historians novelists and publishers wax modellers cartoonists and illustrators painters playwrights and actors reformers and educationalists film stars and their fans musicians and composers opera fans and radio listeners Avoiding a separation between high and low culture Melman analyses nineteenth century plebeian culture and twentieth century mass culture and their venues like Madame Tussaud's Chamber of Horrors panoramas national monuments like the Tower of London and films as well as studying forms of minority art notably opera She demonstrates how history was produced and how it circulated from texts visual images and sounds to people and places and back to a variety of texts and images While paying attention to individuals making do with culture Melman considers constrictions of class gender the state and the market place on the consumption of history Focusing on two privileged pasts the Tudor monarchy and the French Revolution the latter seen as an English event and as the framework for narrating and comprehending history Melman shows that during the nineteenth century the most popular longest enduring and most highly commercialized images of the past represented it not as cosy and secure but rather as dangerous disorderly and violent The past was also imagined as an urban place rather than as rural In Melman's account City not green Country is the centre of a popular version of the past whose central images are the dungeon the gallows and the guillotine
