HART, 2017-07-25 Excerpt from *Makers of Science Mathematics Physics Astronomy* Space has demanded a rigid limitation in the matter treated No attempt has been made to include either the biological or the chemical sciences For the same reason much of the history of physics and mathematics has necessarily been omitted and the characters chosen for biographical treatment have been so chosen rather from the point of view of their suitability as pegs from which to hang the scientific history of their times than from any superiority over their contemporaries About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works Makers of Science W. G. Hardie, 1923 *Makers of Science* Ivor Blashka Hart, 1924 **Reference Catalogue of Current Literature** , 1924 **Seeking Truth** Elgin L. Hushbeck, Jr, 2022-04-26 We live in a world that is not governed by Truth Disagreements surround us Recent Presidential elections are hotly contested and won by the narrowest of margins Charges of misinformation fake news and bias abound Everyone claims they are correct they have the Truth Seeking Truth looks at both the philosophical and practical issues of Truth to understand how we come to know what we know and why we disagree so much More importantly it lays out how we can disagree in ways that avoid division and polarization and instead move to build a consensus on the Truth Seeking Truth addresses things like how to think about what you believe how to handle disagreement and errors positively how do you know if you are open minded and how to make better decisions Seeking Truth uses a lot of examples to make this case To avoid current disputes most are

drawn from history as people in various times and settings sought to understand how nature works what happened in a particular event or what is the best way to proceed or govern ourselves Science history politics business all of these areas involve Truth in one way or another Seeking Truth will help you become a better thinker a more critical thinker and one who moves closer to the Truth *Creators of Mathematical and Computational Sciences* Ravi P Agarwal, Syamal K Sen, 2014-11-11 The book records the essential discoveries of mathematical and computational scientists in chronological order following the birth of ideas on the basis of prior ideas ad infinitum The authors document the winding path of mathematical scholarship throughout history and most importantly the thought process of each individual that resulted in the mastery of their subject The book implicitly addresses the nature and character of every scientist as one tries to understand their visible actions in both adverse and congenial environments The authors hope that this will enable the reader to understand their mode of thinking and perhaps even to emulate their virtues in life Learning Activities from the History of Mathematics Frank J.
