Places and Politics in an Age of Globalization Roxann Prazniak, Arif Dirlik, 2001-02-07 This ambitious work provides a unique statement on the question of place based activism and its relationship to powerful forces of international capital Arguing that specific places around the world are sites for the defense and enhancement of daily life in the context of rapidly expanding global technologies and investment options the contributors reach for a vision of social development that supports sustainable humane cultures Bringing together the local and the global this work provides the first sustained linkage of ethnic groups in diaspora to macrocosmic processes of world capital that inevitably reach down to mediate even the most local experiences The essays ranging in their discussion of place from Los Angeles and New York to New Zealand and Indonesia offer both reasoned argument and authoritative information on how local experience interacts with larger processes of global capital and the diasporic phenomenon The book will be an invaluable resource and launching point for scholars and students in ethnic and identity studies and will interest all readers exploring the production of place and identification

methodological and empirical perspectives can productively converge on a common set of problems related to social temporal and spatial scales and contemporary globalization Local Politics Global Impacts will stimulate empirical and theoretical research that focuses on understanding how political concepts practices and instruments translate across scales and contribute to the emergence of a self aware community of scholars and practitioners focusing explicitly on modelling the dynamics of local regional global interactions Local Politics, Global Impacts Dr Olivier Charnoz, Dr Virginie Diaz Pedregal, Professor Alan L. [American Literary Regionalism in a Global Age](#)

Philip Joseph, 2007-01-01 In this distinctive book Philip Joseph considers how regional literature can remain relevant in a modern global community Why he asks should we continue to read regionalist fiction in an age of expanding international communications and increasing nonlocal forms of affiliation With this question as a guide Joseph places the regionalist tradition of the late nineteenth and early twentieth centuries at the center of a contemporary conversation about community Part of the challenge Joseph shows is to distinguish between versions of regionalism that speak nostalgically to modern readers and those that might enter actively into a more progressive collective dialogue Examining the works of well known writers including Hamlin Garland Abraham Cahan Willa Cather Zora Neale Hurston and William Faulkner Joseph argues that these regionalist authors share a vision of local communities in open discourse with the external world capable of shaping public thought and policy and also of benefiting from the knowledge and experiences of outsiders Their fiction depicts a range of localities from Jewish American neighborhoods and midwest farming communities to southern African American towns and southwestern mixed race parishes Their characters are often associated with the literary artistic process a method stressing open ended critique that unlike journalistic philosophical or legal processes ensures open dialogue Joseph takes his argument beyond the boundaries of literary scholarship by engaging with art critics such as Lucy Lippard distance learning opponents such as David Noble and civil society proponents such as Robert Putnam and Michael Sandel Like civil society advocates today regionalist writers used the idea of community as a discursive topos and explored how values including

home and neighborhood were reconciled with such democratic ideals as individual self determination and collective empowerment

The Global City 2.0 Kristin Ljungkvist, 2015-08-27 Global cities all over the world are taking on new roles as they increasingly participate directly and independently in international affairs and global politics So far surprisingly few studies have analyzed the role of the Global City beyond its already well explicated role in the globalized economy How is it that local governments of Global Cities claim international political authority and develop what appears to be their own independent foreign and security policies despite the fact that such policy areas have traditionally been considered to be the core function of nation states and central governments What does it mean to be and to govern the contemporary Global City In this book Kristin Ljungkvist claims that we can better understand why local governments find it to be in their Global City s interest to claim international political authority by exploring how the city s role in the globalized world is constructed and narrated locally A core claim is that Global City hood as a specific type of collective identity can play a constitutive part in such interest formation Combining insights from International Relations and Urban Studies scholarship and with the help of a case study on New York City Ljungkvist develops a new analytical framework for studying the Global City as an international political actor The Global City 2 0 shows that even as the Global City engages in various global issues such as global environmental governance or counterterrorism such pursuit will be framed and rationalized in terms of the city s economic growth The quest for growth and global competitiveness are not necessarily the only available meanings attached to the being and governing of the contemporary Global City However there seems to be a remarkable persistency and attraction in economistic ideas and an economistic conception of the Global City
