Hale, 2023-07-03 A unique reference describing successful diversity initiatives in higher education Higher education like the nation is facing major demographic changes Our colleges and universities recognize they not only have to be more inclusive but that they have to provide an environment that will effectively retain and develop the growing population of ethnically and racially diverse students How ready are they and what should they be doing Frank W Hale Jr known as the Dean of Diversity for his pioneering efforts in establishing Ohio State as one of the institutions graduating the most Black Ph D s has gathered twenty two leading scholars and administrators from around the country who describe the successful diversity programs they have developed Recognizing the importance of diversity as a means of embracing the experiences perspectives and expertise of other cultures this book shares what has been most effective in helping institutions to create an atmosphere and a campus culture that not only admits students faculty and staff of color but accepts and welcomes their presence and participation This is a landmark reference for every institution concerned with inclusivity and diversity The successes it presents offers academic leaders much they can learn from and ideas and procedures they can adapt as they discuss and develop their own campus policies and initiatives Contributors Samuel Betances Donald Brown Carlos E Cort s Myra Gordon Linda S Greene Frank W Hale Jr Margaret N Harrigan William B Harvey Freeman A Hrabowski III Lee Jones William Brit Kirwan Paul Kivel Antoinette Miranda Jo Ann Moody Leslie N Pollard Neil L Rudenstine William E Sedlacek Mac A Stewart M Rick Turner Clarence G Williams Raymond A Winbush Higher Education , 1981 **American Higher Education Since World War II** Roger L. Geiger, 2021-05-25 Geiger provides an in depth history of the remarkable transformation of higher education in the United States in the decades after World War II taking readers from the GI Bill and the postwar expansion of higher education to the social upheaval of the 1960s and 1970s desegregation and coeducation and the challenges confronting American colleges today Shedding light on the tensions and triumphs of an era of rapid change the author shows how American universities emerged after the war as the world s most successful system for the advancement of knowledge how the pioneering of mass higher education led to the goal of higher education for all and how the selectivity sweepstakes for admission to the most elite schools has resulted in increased stratification today Geiger identifies 1980 as a turning point when the link between research and economic development stimulated a revival in academic research and the ascendancy of the modern research university that continues to the present Sweeping in scope this book demonstrates how growth has been the defining feature

of modern higher education but how each generation since the war has pursued it for different reasons It provides the context we need to understand the complex issues facing our colleges and universities today from rising inequality and skyrocketing costs to deficiencies in student preparedness and lax educational standards From publisher description
