Making Democracy Work A Framework For Macroeconomic Policy In South Africa:

South Africa and the Logic of Regional Cooperation James J. Hentz, 2005-07-19 In South Africa and the Logic of Regional Cooperation James J Hentz addresses changes in South Africa's strategies for regional cooperation and economic development since its transition from apartheid to democracy Hentz focuses on why the new South African government continues to make regional cooperation a priority and what methods this dominant state uses to pursue its neighborly goals While providing a synthetic overview of the history of regional cooperation in southern Africa Hentz considers the logic of cooperation more generally An extensive discussion of South African politics provides the context for Hentz's exploration of the more widely felt effects of domestic change Readers interested in the international organization of the politics and economy of southern Africa will find thought provoking material in this important book

Making Democracy Work Macroeconomic Research Group, 1993 MERG has become convinced that a sea change in economic policy is essential to generate growth in the next few years It can demonstrate that its proposed policy framework is both coherent and affordable The MERG proposals offer a radically different vision of the future of South Africa They have been designed to address the current imbalances through direct intervention in a way which would benefit all sections of the South African population within a short period of time MERG took the objectives of the democratic movement as its starting point The aim of the MERG framework is therefore to secure a rapid improvement in the quality of the daily lives of South Africa's poorest most oppressed and disadvantaged people The strategy stresses programmes to initiate job creation and training programmes for the unemployed improve the status of the poorest women in the rural areas improve the availability and quality of education health housing and electrification raise the level of wages of low income workers and dramatically improve the skills of employed workers

South Africa **The Oxford Handbook of the South African Economy** Arkebe Oqubay, Fiona Tregenna, Imraan Valodia, 2021 This Handbook provides a detailed and wide ranging coverage of the key economic questions in South Africa concentrating on the more recent economic challenges facing the country **Ownership and Governance of Companies** Jonathan Michie, Vishnu Padayachee, 2021-06-29 Apartheid South Africa was often thought to run in the interests of the business elite Yet 27 years after apartheid those business interests remain largely entrenched Why Did the South African business community play a role in engineering this outcome perhaps recognising the apartheid era was over and jumping ship in time Conversely the mission of the ANC was widely perceived to be to shift wealth and power into the hands of the whole community Yet despite black empowerment measures corporate ownership remains largely in white hands and certainly in the hands of an elite few even though no longer restricted to whites This picture is replicated across the global south where corporate ownership tends to be concentrated in the hands of an elite rather than being more democratically spread Why have alternative corporate forms not been pursued more vigorously with ownership in the hands of customers employees and local communities In the case of South Africa where the majority of customers and employees are black this could have delivered on the ANC's mission to replace the apartheid era with a democratic one in terms of wealth incomes and power as well as in terms of voting and civic rights This edited volume explores all these questions and looks at ways to align corporate forms with economic and social goals The chapters in this book were originally published as special issues of International Review of Applied Economics **Public Policymaking in a Globalized World** Robin J. Lewis, 2018-01-19 The inexorable advent of globalization has transformed the public policymaking process into a multi faceted challenge that transcends traditional policymaking boundaries and forces scholars experts and practitioners to redefine their field in terms of both theory and practice While every policy dilemma has a specific location in time and space most significant policy issues climate change food and water economic development global pandemics terrorism and violence and migration to name just a few now require a collective framing of the problem and a collaborative effort to take effective action The essays in Public Policymaking in a Globalized World offer valuable insights into how policymaking is evolving from a circumscribed field of inquiry into a truly global dialogue that can help stakeholders to focus on key issues that threaten the survival of our planet Regions and Development Sheila Page, 2020-12-15 At the 1996 EADI Conference the papers presented in the World Trade and Trade Policy workshop looked at the new trends in regionalism from a variety of points of view for different institutions They considered the effects of regions their implications for policy and performance in the developing countries and for international economic institutions and tried to interpret them in terms of economic and political theory **Race and Regionalism in the Politics of Taxation in Brazil and South Africa** Evan S. End of Millennium Manuel Castells, 2010-01-26 This final volume in Manuel Castells trilogy with a substantial new preface is devoted to processes of global social change induced by the transition from the old industrial society to the emerging global

network society Explains why China rather than Japan is the economic and political actor that is revolutionizing the global system Reflects on the contradictions of European unification proposing the concept of the network state Substantial new preface assesses the validity of the theoretical construction presented in the conclusion of the trilogy proposing some conceptual modifications in light of the observed experience *The Experience of Economic Redistribution* Clarence Tshitereke, 2006-10-09 This book provides an analysis of the country's political economy in transition It documents the history of the gold mining industry's involvement in shaping the political landscape of South Africa and shows the degree to which the political transition was induced to put in place a new mode of regulation for capital accumulation In the process the victims of apartheid have now become victims of democracy's neo liberalism as the government is constrained from being developmental interventionist and redistributive

No More Tears Richard Levin, Daniel Weiner, 1997 This text demonstrates why incorporating extensive knowledge that exists in poor rural areas into development of land and reform policies is essential for truly democratic social and economic transformation Growth or Stagnation? Mats Lundahl, 2019-04-02 First published in 1999 the essays collected in the present volume derive from an interest in South Africa and its economy which goes back to the early 1970s and were written between 1994 and 1999 The intention is to follow how the debate on the South African economy has evolved since the fall of the apartheid regime Issues discussed include the South African economy after apartheid and whether the new South African economy is ultimately experienced growth or stagnation

Electric Capitalism David A. McDonald, 2012-05-16 Although Africa is the most under supplied region of the world for electricity its economies are utterly dependent on it There are enormous inequalities in electricity access with industry receiving abundant supplies of cheap power while more than 80 per cent of the continent's population remain off the power grid Africa is not unique in this respect but levels of inequality are particularly pronounced here due to the inherent unevenness of electric capitalism on the continent This book provides an innovative theoretical framework for understanding electricity and capitalism in Africa followed by a series of case studies that examine different aspects of electricity supply and consumption The chapters focus primarily on South Africa due to its dominance in the electricity market but there are important lessons to be learned for the continent as a whole not least because of the aggressive expansion of South African capital into other parts of Africa to develop and control electricity Africa is experiencing a renewed scramble for its electricity resources conjuring up images of a recolonisation of the continent along the power grid Written by leading academics and activists *Electric Capitalism* offers a cutting edge yet accessible overview of one of the most important developments in Africa today with direct implications for health gender equity environmental sustainability and socio economic justice From nuclear power through prepaid electricity meters to the massive dam projects taking place in central Africa an understanding of electricity reforms on the continent helps shape our insights into development debates in Africa in particular and the expansion of neoliberal capitalism more generally The Oxford Handbook of Industrial

Policy Arkebe Oqubay, Christopher Cramer, Ha-Joon Chang, Richard Kozul-Wright, 2020-10-20 Industrial policy has long been regarded as a strategy to encourage sector industry or economy wide development by the state. It has been central to competitiveness catching up and structural change in both advanced and developing countries. It has also been one of the most contested perspectives reflecting ideologically inflected debates and shifts in prevailing ideas. There has lately been a renewed interest in industrial policy in academic circles and international policy dialogues prompted by the weak outcomes of policies pursued by many developing countries under the direction of the Washington Consensus and its descendants, the slow economic recovery of many advanced economies after the 2008 global financial crisis and mounting anxieties about the national consequences of globalization. The Oxford Handbook of Industrial Policy presents a comprehensive review of and a novel approach to the conceptual and theoretical foundations of industrial policy. The Handbook also presents analytical perspectives on how industrial policy connects to broader issues of development strategy, macro economic policies, infrastructure development, human capital and political economy. By combining historical and theoretical perspectives and integrating conceptual issues with empirical evidence drawn from advanced, emerging and developing countries, The Handbook offers valuable lessons and policy insights to policymakers, practitioners and researchers on developing productive transformation, technological capabilities and international competitiveness. It addresses pressing issues including climate change, the gendered dimensions of industrial policy, global governance and technical change. Written by leading international thinkers on the subject, the volume pulls together different perspectives and schools of thought from neo-classical to structuralist, development economists to discuss and highlight the adaptation of industrial policy in an ever-changing socio-economic and political landscape.

In the Balance Hein Marais, 2022-07 This timely book presents a compelling analysis of the need, conditions and possibilities for a universal basic income (UBI) in South Africa and globally. It explores the vexing questions a UBI raises about the relationship of paid work to social rights and about the role of the state in contemporary capitalism. As jobs disappear and wages flatline, paid work is an increasingly fragile basis for dignified life. This predicament, deepened by the COVID-19 pandemic, is sparking urgent debates about alternatives such as a universal basic income (UBI). In this incisive new book, Hein Marais casts the debate about a UBI in the wider context of the dispossessing pressures of capitalism and the turmoil of global warming, pandemics and social upheaval. Marais surveys the meaning, history and appeal of a UBI before even-handedly weighing the case for and against it. The book explores the vexing questions a UBI raises about the relationship of paid work to social rights, about prevailing notions of entitlement and dependency and about the role of the state in contemporary capitalism. Along with cost estimates for different versions of a basic income in South Africa, it discusses financing options and lays out the social, economic and political implications. Highly topical and distinctive in its approach, *In the Balance: The Case for a Universal Basic Income in South Africa and Beyond* is the most rounded and up-to-date examination yet of the need and prospects for a UBI in a global South setting such as South Africa.

Development Planning in South Africa John Reynolds, 2018-06-15 Celebrated as a beacon of democracy and reconciliation many people in South Africa continue to live in severe poverty particularly in the Eastern Cape Province Backed by the United Nations Development Programme the Eastern Cape s provincial government consequently launched an historically ambitious programme the Provincial Growth and Development Plan aimed at tackling the province s poverty unemployment and inequality over a ten year period in a radical policy overhaul Drawing on the author s first hand engagement with the planning process *Development Planning in South Africa* is an empirically rich study that utilises a strategic relational approach to explore the ways in which this unprecedented challenge was negotiated and eventually undermined by the South African state The first work of its kind the book provides an indispensable micro level study with profound implications for how state power is understood to be organised and expressed in state policy Relevant beyond South Africa to policy implementation in both developing and developed states globally the book is essential reading for students and scholars of government studies political economy development policy studies and social movements

South Africa's Uneasy Alliance Martin Plaut, 2012-10-31 The communist party in South Africa began as a revolutionary movement In exile in the 1960s and 1970s it took on significance its numbers never warranted through its relationship with the Soviet Union and the weapons it brought to the armed struggle Today it worries that it has been absorbed into the ANC machinery of government without being able to retain its own identity The unions of Cosatu were born out of the fight against poverty level wages of the 1970s Their culture comes from the shop floor and the democracy of the shop steward movement They played a critical role in ending apartheid through their links with the United Democratic Front and the grassroots groups in the townships African Nationalism Marxism Leninism and popular democracy are never easy ideological partners Yet the Alliance has survived and flourished The cost of this relationship has been endless disputes While each element of the Alliance pledges its support for the greater good it fights for its own corner The history of post apartheid South Africa is littered with examples of how this has been played out The overthrow of President Thabo Mbeki by Jacob Zuma in 2007 would have been unthinkable without the complex web of relationships that were developed within the Alliance As the ANC moves towards its elective conference in Mangaung in December 2012 tensions within the Alliance are at breaking point once more In theory this is a purely internal ANC party issue But candidates for the top job are battling it out and the support of the unions and the Communist Party is a critical element in their campaigns These battles can only be understood in the

context of the Alliance an extraordinary but poorly understood movement *Season of Hope* Alan Hirsch, 2005 Offers an insight into the circumstances under which the policies were developed implemented and reviewed as well as a study of the outcomes This book addresses questions such as How could an organisation with no previous experience of governing accomplish a peaceful transition to democracy How did they do it and where are they going *The Evolving Structure of South Africa's Economy* Seeraj Mohamed, Amuzweni Ngoma, 2024-01-23 South Africa still faces low economic growth and high unemployment coupled with the persistent challenges of poverty and inequality These exert pressure on South Africa to foster structural transformation that will facilitate a more inclusive and resilient economy Authors apply multiple theoretical and empirical perspectives to take stock of the historical and contemporary structure of the South African economy its evolving nature and possible future pathways The explore how South Africa s structural transformation agenda is affected by the global context and discuss debates on the extreme social impacts of globalised and financialised economic structures Contributors offer technical and analytical discussions of the overlapping structural faultlines that produce uneven economic performance They explain the changes and continuities of South Africa s economic structure bound by an analytical thread that centres power relations and political settlements Varied chapters explain how poor governance and corruption have slowed down structural reform This has been further exacerbated by the inconsistent availability of energy and the deterioration of logistics The book details the structural reforms and policy regimes necessary for increasing productive capacity in South Africa s agriculture manufacturing agro processing retail and services energy and mining industries It also reflects on the role that micro and informal enterprises can play if afforded the necessary support The technical details and analyses in the book highlight the need for a radical review of macroeconomic policy to reduce the country s chronic vulnerability to poverty and inequality
