Making Fathers Pay The Enforcement Of Child Support:

Making Fathers Pay David L. Chambers, 1979-09 A couple with children divorce A court orders the father to pay child support but the father fails to pay This pattern repeats itself thousands of times every year in nearly every American state Making Fathers Pay is David L Chambers s study of the child support collection process in Michigan the state most successful in inducing fathers to pay He begins by reporting the perilous financial problems of divorced mothers with children problems faced even by mothers who work full time and receive child support The study then examines the characteristics of fathers who do and do not pay support and the characteristics of collections systems that work Chambers s findings are based largely on records of fathers support payments in twenty eight Michigan counties some of which jail hundreds of men for nonpayment every year Chambers finds that in places well organized to collect support jailing nonpayers seems to produce higher payments from men jailed and from men not jailed but only at a high social cost He also raises grave doubts about the fairness of the judicial process that leads to jail While Chambers s total sample includes 12 000 men he interweaves through his text moving interviews with members of one family caught in the painful predicaments that men women and children face upon separation To increase support for children at lower social costs Chambers advocates a national system of compulsory deductions from the wages of non custodial parents who earn more than enough for their own subsistence *Downey-Hyde Child Support Enforcement and Assurance Proposal* United States. Domestic Contradictions Priya Kandaswamy, 2021-07-06 In *Domestic Contradictions* Priya Kandaswamy analyzes how race class gender and sexuality shaped welfare practices in the United States alongside the conflicting demands that this system imposed upon Black women She turns to an often neglected moment in welfare history the advent of the Freedmen s Bureau during Reconstruction and highlights important parallels with welfare reform in the late twentieth century Kandaswamy demonstrates continuity between the figures of the vagrant and welfare queen in these time periods both of which targeted Black women These constructs upheld gendered constructions of domesticity while defining Black women s citizenship in terms of an obligation to work rather than a right to public resources Pushing back against this history Kandaswamy illustrates how the Black female body came to represent a series of interconnected dangers to white citizenship heteropatriarchy and capitalist ideals of productivity and how a desire to curb these threats drove state policy In challenging dominant feminist historiographies Kandaswamy builds on Black feminist and queer of color critiques to situate the gendered afterlife of slavery as central to the historical development of the welfare state

States Irwin Garfinkel, Lee Rainwater, Timothy Smeeding, 2010-01-28 This book explores the role of the welfare state in the overall wealth and wellbeing of nations and in particular looks at the American welfare state in comparison with other developed nations in Europe and elsewhere It is widely believed that the welfare state undermines productivity and economic growth that the United States has an unusually small welfare state and that it is and always has been a welfare state laggard This book shows that all rich nations including the United States have large welfare states because the socialized programs that comprise the welfare state public education and health and social insurance enhance the productivity of capitalism In public education the most productive part of the welfare state for most of the 19th and 20th centuries the United States was a leader Though few would argue that public education is not part of the welfare state most previous cross national analyses of welfare states have omitted education Including education has profound consequences undergirding the case for the productivity of welfare state programs and the explanation for why all rich nations have large welfare states and identifying US welfare state leadership From 1968 through 2006 the United States swung right politically and lost its lead in education and opportunity failed to adopt universal health insurance and experienced the most rapid explosion of health care costs and economic inequality in the rich world The American welfare state faces large challenges Restoring its historical lead in education is the most important but requires investing large sums in education beginning with universal pre school and in complementary programs that aid children's development The American health insurance system is by far the most costly in the rich world yet fails to insure one sixth of its population produces below average results crowds out useful investments in children and is the least equitably financed Achieving universal coverage will increase costs Only complete government financing is likely to restrain long term costs In memory of Robert J Lampman Colleague Co author Friend and Mentor

Alexander, 2023-07-24 Although the legal problems of the elderly are as old as humankind they have taken on current prominence for another reason lifespan has increased markedly in recent years Persons who would given their age have been the elders of the past and would have been expected to be focused on their imminent death are now as a group robust and well They have better survived the ravages of time than have the plans fashioned when life expectancy was much lower Questions concerning social status expectations of living standards general assistance and medical care all have become far more important and considerably more difficult As life has become longer and death more controllable the issue of a person's right to choose death over diminished quality of life has also become far more complicated This interesting book provides the reader with a selection of perspectives from scholars in different parts of the world on various branches of elderlaw Questions of social obligations to elders and elders rights and duties are addressed as they arise in the United States Japan Greece New Zealand the Netherlands Canada and England The compilation does not attempt to map out the field nor to make country by country comparisons of the issues discussed Rather it shows some commonality of concerns and in the identification of problems and proposals for their solution *Child Poverty and Inequality* Duncan Lindsey, 2009 Duncan Lindsey shows in this volume that it is possible to provide true opportunity to all children insuring them against a lifetime of inequality When we do the walls dividing the United States by race ethnicity and wealth will begin to crumble
