## **Making It In College:**

**Making College Count** Patrick S. O'Brien, 2010 Making College Count is a comprehensive resource that will help students excel in college and create great career opportunities after graduation. Much more than a college survival guide, it offers students and parents a proven framework to achieve at a high level in the classroom, in extracurricular activities, and in their work experiences. The book also positions students for success in their future job searches. Making College Count features an eye-catching two-color design with 78 illustrations and is written in an approachable, student-friendly voice.

**Making College Work** Harry J. Holzer, Sandy Baum, 2017-08-15 Practical solutions for improving higher education opportunities for disadvantaged students. Too many disadvantaged college students in America do not complete their coursework or receive any college credential while others earn degrees or certificates with little labor market value. Large numbers of these students also struggle to pay for college and some incur debts that they have difficulty repaying. The authors provide a new review of the causes of these problems and offer promising policy solutions. The circumstances affecting disadvantaged students stem both from issues on the individual side such as weak academic preparation and financial pressures and from institutional failures. Low-income students disproportionately attend schools that are underfunded and have weak performance incentives contributing to unsatisfactory outcomes for many students. Some solutions including better financial aid or academic supports target individual students. Other solutions such as stronger linkages between coursework and the labor market and more structured paths through the curriculum are aimed at institutional reforms. All students and particularly those from disadvantaged backgrounds also need better and varied pathways both to college and directly to the job market beginning in high school. We can improve college outcomes but must also acknowledge that we must make hard choices and face difficult tradeoffs in the process. While no single policy is guaranteed to greatly improve college and career outcomes, implementing a number of evidence-based policies and programs together has the potential to improve these outcomes substantially.

**Making College Come True** Jennifer Herrera, 2018-11-27 The myth is that a college degree is expensive. The fact is that not having a college degree is expensive. Over a lifetime, a college graduate typically earns a million dollars more than a high school graduate. Education is the key that opens many doors. Dr. Jennifer Herrera or Dr. J is the founder of four charter schools, Tucson International Academies, and the creator of the Making College Come True system. For the past ten years, 100% of her students have been accepted into college. A popular speaker, Dr. J travels the globe to train educators and others. She is frequently featured on radio and TV spreading her message of hope and empowerment through education. Many people have no clue that they can get into college even if they have a low grade point average (GPA), they don't have the money to pay for it, no one in their family has gone to college before, English is not their first language, they're not a US citizen. It's not their fault; no one has taken the time to explain the truth. Until now, Dr. Jennifer Herrera reveals her proven system for Making College Come True and ten keys that
