Making Political Geography John Agnew, Luca

Muscarà, 2012-02-16 Dating from its inception in the late nineteenth century political geography as a field has been heavily influenced by global events of the time Thus rather than trying to impose a single fashionable theory leading geographers John Agnew and Luca Muscar consider the underlying role of changing geopolitical context as their framework for understanding the evolution of the discipline The authors trace the development of key thinkers and theories during three distinct periods 1875 1945 the Cold War and the post Cold War emphasizing the ongoing struggle between theoretical monism and pluralism or one path to knowledge versus many The world has undergone dramatic shifts since the book's first publication in 2002 and this thoroughly revised and updated second edition focuses especially on reinterpretations of the post Cold War period Agnew and Muscar explore the renewed questioning of international borders the emergence of the Middle East and displacement of Europe as the center of global geopolitics the rise of China and other new powers the reappearance of environmental issues and the development of critical geopolitics With its deeply knowledgeable and balanced history and overview of the field this concise work will be a valuable and flexible text for all courses in political geography

Making the Stage Ann C. Hall, 2020-11-30 MAKING THE STAGE is a collection of essays that examines the role of theatre drama and performance in contemporary culture a culture that is growing increasingly technological and isolated seemingly at odds with the very nature of theatre a collaborative and sometimes very primitive art form Through the course of these essays it is clear that theatre not only survives some of the challenges of the day but even defines discussions particularly political ones which are prohibited by an increasingly manipulated media The essays from a diverse group of theatre scholars examine the mechanics of theatre from space to sound to the use of technology the role of women in creating theatre the relationship between theatre and literary art forms the politics of theatre science and theatre and the role of performance art Through them all it is clear that theatre drama and performance continue to speak in significant ways

State Power and Politics in the Making of the Modern Middle East Lecturer in the Recent Economic History of the Middle East and Fellow Roger Owen, Roger Owen, 2002-04-12 Roger Owen has fully revised and updated his authoritative text to take into account the considerable developments in the Middle East in the 1990s [Making War, Thinking History](#) Jeffrey Record, 2014-02-15 In examining the influence of historical analogies on decisions to use or not use force military strategist Jeffrey Record assesses every major application of U S force from the Korean War to the NATO war on Serbia Specifically he looks at the influence of two analogies the democracies appeasement of Hitler at Munich and America's defeat in the Vietnam War His book judges the utility of these two analogies on presidential decision making and finds considerable misuse of them in situations where force was optional He points to the Johnson administration's application of the Munich analogy to the circumstances of Southeast Asia in 1965 as the most egregious example of their misuse but also cites the

faulty reasoning by historical analogy that prevailed among critics of Reagan's policy in Central America and in Clinton's use of force in Haiti and the former Yugoslavia. The author's findings show generational experience to be a key influence on presidential decision making. Munich persuaded mid twentieth century presidents that force should be used early and decisively while Vietnam cautioned later presidents against using force at all. Both analogies were at work for the Gulf War with Munich urging a decision for war and Vietnam warning against a graduated and highly restricted use of force. Record also reminds us of the times when presidents have used analogies to mobilize public support for action they have already decided to take. Addressing both the process of presidential decision making and the wisdom of decisions made, this well reasoned book offers timely lessons to a broad audience that includes political scientists, military historians, defense analysts and policy makers as well as those simply curious about history's influence.

Explaining Foreign Policy Steve A. Yetiv, 2011-03-01. Steve A. Yetiv has developed an interdisciplinary integrated approach to studying foreign policy decisions which he applies here to understand better how and why the United States went to war in the Persian Gulf in 1991 and 2003. Yetiv's innovative method employs the rational actor, cognitive domestic politics, groupthink and bureaucratic politics models to explain the foreign policy behavior of governments. Drawing on the widest set of primary sources to date including a trove of recently declassified documents and on interviews with key actors, he applies these models to illuminate the decision making process in the two Gulf Wars and to develop theoretical notions about foreign policy. What Yetiv discovers in addition to empirical evidence about the Persian Gulf and Iraq wars is that no one approach provides the best explanation but when all five are used a fuller and more complete understanding emerges. Thoroughly updated with a new preface and a chapter on the 2003 Iraq War, Explaining Foreign Policy already widely used in courses will continue to be of interest to students and scholars of foreign policy, international relations and related fields.

The Art of Policymaking George E. Shambaugh IV, Paul J. Weinstein Jr., 2024-04-24. The Art of Policymaking is the only book designed to provide students and practitioners with a detailed explanation of the specific tools, techniques and processes used to create policy in the U.S. as well as the tools they need to understand them. The book includes practical advice on how to write memos, prepare polling questions and navigate the clearance process. Case studies show how actual policies were developed and how and why policies and processes differed across administrations. And scenarios allow students to practice the tools and techniques they have learned by working through both domestic and foreign policy situations. Written by two experts in the field with experience in both academia and government, The Art of Policymaking is the perfect how to guide for students and professionals.

The Making of a Conservative Environmentalist Gordon K. Durnil, 2001-11-09. Durnil's attack on chlorine is one of the single boldest environmental policy ideas of the 1990's. The message is that if someone as conventional and as conservative as Mr. Durnil can latch on to one of the great social

transformations of the American century then so can every other Republican in the country New York Times Book Review This is a serious thoughtful book If they would read it the phoney conservatives now performing in the center ring in Congress might be shamed into mending their ways Village Voice Literary Supplement Here comes a thoughtful experienced conservative with impeccable Republican credentials a dedicated environmentalist with a different point of view A thoughtful readable mandate Ken Bode Moderator Washington Week in Review

The Making of the Gulf War H. Rahman, 1997

Kuwait's long standing territorial dispute with Iraq culminating in the 1991 Gulf War should properly be viewed within an extended historical context dating back to the Ottoman period Tracing the origins of this dispute through a detailed chronological account of events Dr Rahman describes how Anglo Ottoman manoeuvres in the 1890s were to have repercussions on Kuwaiti Iraqi relations for generations to come He considers the effect of the collapse of the Ottoman Empire and the subsequent redefinition of many of the boundaries of the Empire's former provinces in the Middle East Mesopotamia now Iraq became a kingdom under British mandate and in 1932 it attained independence

Improving the Presumptive Disability Decision-Making Process for Veterans Institute of Medicine, Board on Military and Veterans Health, Committee on Evaluation of the Presumptive Disability Decision-Making Process for Veterans, 2008-05-15

The United States has long recognized and honored the service and sacrifices of its military and veterans Veterans who have been injured by their service whether their injury appears during service or afterwards are owed appropriate health care and disability compensation For some medical conditions that develop after military service the scientific information needed to connect the health conditions to the circumstances of service may be incomplete When information is incomplete Congress or the Department of Veterans Affairs VA may need to make a presumption of service connection so that a group of veterans can be appropriately compensated The missing information may be about the specific exposures of the veterans or there may be incomplete scientific evidence as to whether an exposure during service causes the health condition of concern For example when the exposures of military personnel in Vietnam to Agent Orange could not be clearly documented a presumption was established that all those who set foot on Vietnam soil were exposed to Agent Orange The Institute of Medicine IOM Committee was charged with reviewing and describing how presumptions have been made in the past and if needed to make recommendations for an improved scientific framework that could be used in the future for determining if a presumption should be made The Committee was asked to consider and describe the processes of all participants in the current presumptive disability decision making process for veterans The Committee was not asked to offer an opinion about past presumptive decisions or to suggest specific future presumptions The Committee heard from a range of groups that figure into this decision making process including past and present staffers from Congress the VA the IOM veterans service organizations and individual veterans The Department of Defense DoD briefed the Committee about its current activities and

plans to better track the exposures and health conditions of military personnel The Committee further documented the current process by developing case studies around exposures and health conditions for which presumptions had been made Improving the Presumptive Disability Decision Making Process for Veterans explains recommendations made by the committee general methods by which scientists as well as government and other organizations evaluate scientific evidence in order to determine if a specific exposure causes a health condition

Policy and Opinion in the Gulf War John Mueller,1994-07 The Persian Gulf crisis may well have been the most extensively polled episode in U S history as President Bush his opponents and even Saddam Hussein appealed to and tried to influence public opinion As well documented as this phenomenon was it remains largely unexplained John Mueller provides an account of the complex relationship between American policy and public opinion during the Gulf crisis Mueller analyzes key issues the actual shallowness of public support for war the effect of public opinion on the media rather than the other way around the use and misuse of polls by policy makers the American popular focus on Hussein s ouster as a central purpose of the War and the War s short lived impact on voting Of particular interest is Mueller s conclusion that Bush succeeded in leading the country to war by increasingly convincing the public that it was inevitable rather than right or wise Throughout Mueller author of War Presidents and Public Opinion an analysis of public opinion during the Korean and Vietnam wars places this analysis of the Gulf crisis in a broad political and military context making comparisons to wars in Panama Vietnam Korea and the Falklands as well as to World War II and even the War of 1812 The book also collects nearly 300 tables charting public opinion through the Gulf crisis making *Policy and Opinion in the Gulf War* an essential reference for anyone interested in recent American politics foreign policy public opinion and survey research
