Making Better Drugs for Children with Cancer National Research Council, Institute of Medicine, National Cancer Policy Board, Committee on Shortening the Time Line for New Cancer Treatments, 2005-03-31 The successes that have been achieved in treating childhood cancers stand as beacons against the less dramatic improvements for adults with cancer Progress began to accelerate in the 1960s and 1970s as treatment regimens were built up primarily by building combinations of chemotherapeutic drugs However the near absence of research in pediatric cancer drug discovery threatens to halt the progress in childhood cancer treatment achieved during the past four decades Making Better Drugs for Children with Cancer identifies the major issues to be addressed in developing new agents for childhood cancers the gaps in research and development and the steps that have been suggested to move the process forward This report also makes a new proposal to capitalize on today's science to bring new treatments to children's cancers *Pediatric Drug Development* Andrew E. Mulberg, Dianne Murphy, Julia Dunne, Lisa L. Mathis, 2013-05-20 Most medicines have never been adequately tested for safety and efficacy in pediatric populations and preterm infants and children are particularly vulnerable to adverse drug reactions *Pediatric Drug Development Concepts and Applications* Second Edition addresses the unique challenges in conducting effective drug research and development in pediatric populations This new edition covers the legal and ethical issues of consent and assent the additional legal and safety protections for children and the appropriate methods of surveillance and assessment for children of varying ages and maturity particularly for patient reported outcomes It includes new developments in biomarkers and surrogate endpoints developmental pharmacology and other novel aspects of global pediatric drug development It also encompasses the new regulatory initiatives across EU US and ROW designed to encourage improved access to safe and effective medicines for children globally From an international team of expert contributors *Pediatric Drug Development Concepts and Applications* is the practical guide to all aspects of the research and development of safe and effective medicines for children **Addressing the Barriers to Pediatric Drug Development** Institute of Medicine, Board on Health Sciences Policy, Forum on Drug Discovery, Development, and Translation, 2008-09-12 Decades of research have demonstrated that children do not respond to medications in the same way as adults Differences between children and adults in the overall response to medications are due to profound anatomical physiological and developmental differences Although few would argue that children should receive medications that have not been adequately tested for safety and efficacy the majority of drugs prescribed for children 50 to 75 percent have not been tested in pediatric populations Without adequate data from such testing prescribing drugs appropriately becomes challenging for clinicians treating children from infancy through adolescence *Addressing the Barriers to Pediatric Drug Development* is the summary of a workshop held in Washington D C on June 13 2006 that was organized to identify barriers to the development and testing of drugs for pediatric populations as well as ways in which the system can be improved to facilitate better treatments

for children      **Cancer Control Opportunities in Low- and Middle-Income Countries** Institute of Medicine, Board on Global Health, Committee on Cancer Control in Low- and Middle-Income Countries, 2007-02-26 Cancer is low or absent on the health agendas of low and middle income countries LMCs despite the fact that more people die from cancer in these countries than from AIDS and malaria combined International health organizations bilateral aid agencies and major foundations which are instrumental in setting health priorities also have largely ignored cancer in these countries This book identifies feasible affordable steps for LMCs and their international partners to begin to reduce the cancer burden for current and future generations Stemming the growth of cigarette smoking tops the list to prevent cancer and all the other major chronic diseases Other priorities include infant vaccination against the hepatitis B virus to prevent liver cancers and vaccination to prevent cervical cancer Developing and increasing capacity for cancer screening and treatment of highly curable cancers including most childhood malignancies can be accomplished using resource level appropriateness as a guide And there are ways to make inexpensive oral morphine available to ease the pain of the many who will still die from cancer

**The Preferential Option for the Poor beyond Theology** Daniel G. Groody, Gustavo A. Gutiérrez, 2016-10-15 Since the 1973 publication of Gustavo Gutiérrez's groundbreaking work *A Theology of Liberation* liberation theology's central premise of the preferential option for the poor has become one of the most important yet controversial theological themes of the twentieth century As the situation for many of the world's poor worsens it becomes ever more important to ensure that the option for the poor remains not only a vibrant theological concept but also a practical framework for living out the gift and challenge of Christian faith *The Preferential Option for the Poor beyond Theology* draws on a diverse group of contributors to explore how disciplines as varied as law economics politics the environment science liberal arts film and education can help us understand putting a commitment to the option for the poor into practice The central focus of the book revolves around the question How can one live a Christian life in a world of destitution The contributors address the theological concept of the option for the poor as well as the ways it can shape our social economic political educational and environmental approaches to poverty Their creative examples serve as an inspiration to all those who are seeking to put their talents at the service of human need and the building of a more just and humane world      *Safe and Effective Medicines for Children*

Institute of Medicine, Board on Health Sciences Policy, Committee on Pediatric Studies Conducted Under the Best Pharmaceuticals for Children Act (BPCA) and the Pediatric Research Equity Act (PREA), 2012-10-13 The Best Pharmaceuticals for Children Act BPCA and the Pediatric Research Equity Act PREA were designed to encourage more pediatric studies of drugs used for children The FDA asked the IOM to review aspects of pediatric studies and changes in product labeling that resulted from BPCA and PREA and their predecessor policies as well as assess the incentives for pediatric studies of biologics and the extent to which biologics have been studied in children The IOM committee concludes that these policies have helped provide clinicians who care for children with better information about the efficacy safety and

appropriate prescribing of drugs The IOM suggests that more can be done to increase knowledge about drugs used by children and thereby improve the clinical care health and well being of the nation s children

**Treating Infectious Diseases in a Microbial World** National Research Council, Division on Earth and Life Studies, Board on Life Sciences, Committee on New Directions in the Study of Antimicrobial Therapeutics: Immunomodulation, Committee on New Directions in the Study of Antimicrobial Therapeutics: New Classes of Antimicrobials, 2006-02-03 Humans coexist with millions of harmless microorganisms but emerging diseases resistance to antibiotics and the threat of bioterrorism are forcing scientists to look for new ways to confront the microbes that do pose a danger This report identifies innovative approaches to the development of antimicrobial drugs and vaccines based on a greater understanding of how the human immune system interacts with both good and bad microbes The report concludes that the development of a single superdrug to fight all infectious agents is unrealistic

**Taking Action, Saving Lives** Kristin Shrader-Frechette, 2007-10-19 In the United States alone industrial and agricultural toxins account for about 60 000 avoidable cancer deaths annually Pollution related health costs to Americans are similarly staggering 13 billion a year from asthma 351 billion from cardiovascular disease and 240 billion from occupational disease and injury Most troubling children the poor and minorities bear the brunt of these health tragedies Why asks Kristin Shrader Frechette has the government failed to protect us and what can we do about it In this book at once brilliant and accessible Shrader Frechette reveals how politicians campaign contributors and lobbyists and their power over media advertising and public relations have conspired to cover up environmental disease and death She also shows how science and regulators themselves are frequently captured by well funded polluters and special interests But most important the author puts both the blame and the solution on the shoulders of ordinary citizens She argues that everyone especially in a democracy has a duty to help prevent avoidable environmental deaths to remain informed about and involved in public health and environmental decision making Toward this end she outlines specific concrete ways in which people can contribute to life saving reforms many of them building on

recommendations of the American Public Health Association As disturbing as it is Shrader Frechette s message is ultimately hopeful Calling for a new democratic revolution she reminds us that while only a fraction of the early colonists supported the American Revolution that tiny group managed to change the world Her book embodies the conviction that we can do the same for environmental health particularly if citizens become the change they seek Timely accessible and written with enviable clarity and passion A distinguished philosopher sounds an ethical call to arms to prevent illness and death from pollution Sheila Jasanoff Harvard University Influential and impressive A must read Nicholas A Ashford Massachusetts Institute of Technology By one of America s foremost philosophers and public intellectuals immensely readable courageous often startling insightful Richard Hiskes University of Connecticut Like Rachel Carson s Silent Spring brilliant brave Sylvia Hood Washington University of Illinois Chicago A blistering account of how advocacy must be brought to bear on issues of justice and public health Jeffrey Kahn University of Minnesota No other author can so forcefully bring together ethical analysis government policy and environmental science Outstanding Colleen Moore University of Wisconsin

Pediatric Oncology Nursing Pamela S. Hinds,Lauri Linder,2020-01-23

This book presents the current state of the nursing science in topics relevant to the care of pediatric oncology patients and their families across the treatment trajectory and is framed within a precision health framework. The spectrum of topics covered is wide including for example symptom management, self care management, exercise and physical activity, family centered care, palliative care, the role of the nurse in treatment decision making, patient and nurse resiliency, survivorship and genetic counseling. Throughout there is a focus on the implications of research for nursing practice highlighting which elements of the available evidence are ready for translation into practice and which are not. In addition, careful attention is paid to the role that nursing can play in further advancing science through clinical research. The authors are leading experts from across the globe. The book will be of special interest for pediatric oncology nurses including direct care nurses, research nurses and nursing leaders and will also be a stimulating source for researchers and non oncology nurses. **Oxford**

**Textbook of Palliative Nursing** Betty Rolling Ferrell, Judith A. Paice, 2019-02-15. The Oxford Textbook of Palliative Nursing remains the most comprehensive treatise on the art and science of palliative care nursing available. Dr Betty Rolling Ferrell and Dr Judith A Paice have invited 162 nursing experts to contribute 76 chapters addressing the physical, psychological, social and spiritual needs pertinent to the successful palliative care team. Organized within 7 Sections, this new edition covers the gamut of principles of care from the time of initial diagnosis of a serious illness to the end of a patient's life and beyond. This fifth edition features several new chapters including chapters on advance care planning, organ donation, self care, global palliative care and the ethos of palliative nursing. Each chapter is rich with tables and figures, case examples for improved learning and a strong evidence based practice to support the highest quality of care. The book offers a valuable and practical resource for students and clinicians across all settings of care. The content is relevant for specialty hospice agencies and palliative care programs as well as generalist knowledge for schools of nursing, oncology, critical care and pediatric. Developed with the intention of emphasizing the need to extend palliative care beyond the specialty to be integrated in all settings and by all clinicians caring for the seriously ill, this new edition will continue to serve as the cornerstone of palliative care education. **Oncology of Infancy and Childhood E-Book** Stuart H.
