ecological systems Section two concentrates upon empirically grounded and quantitative work that collectively redefines health in a more expansive way that extends beyond the absence of disease Section three examines the role of the state and management interventions through historically rich approaches centering on both disease and non disease related examples from Latin America Eastern Africa and the United States Finally Section four highlights how health vulnerabilities are differentially constructed with concomitant impacts for disease management and policy interventions This timely volume advances knowledge on health environment interactions disease vulnerabilities global development and political ecology It offers theoretical and methodological contributions which will be a valuable resource for researchers and practitioners in geography public health biology anthropology sociology and ecology *Rice and Beans* Richard Wilk,Livia
