We could actually see the de facto abolition of marriage with the state taking many of the responsibilities formerly assumed by the nuclear family Among Tucker s many eye opening observations How primitive polygamy was a retrogression from the original monogamous structure of the human family Why monogamy was essential to the development of ancient Greek democracy Why it was the Catholic Church not the Bible or Christianity in general that was the great defender of monogamous marriage in Western Civilization Why polygamous societies from primitive farming communities to the Mongols to the Muslim world to the early Mormons are internally violent and have bloody borders Why same sex marriage utterly irrelevant in evolutionary terms is a distraction from the real marriage debate we should be having The prospects for monogamous marriage and the dangers if it collapses Marriage and Civilization might be the most important provocative and talked about book of the year      **Unmarking Whiteness and the New American Racism** Michael L. Blakey, 2025-07-18

This book criticizes recent performative solutions to racism diversity programs at universities for example and White people s Fragility or intolerance of mature criticism These ideas are locked in an intellectually gated and defensive conversation that effectively denies the ongoing particular abuses of White supremacy This book instead proposes expensive educational and economic changes including reparations as necessary to achieve real equity Once imputed by the eugenical effects of World War II and the Civil Rights Movement s opposition to White racism the word race was largely stricken from scientific writing But biological determinism remained deeply ensconced in an institution of science that assumed the natural world to be determining making natural science its most authoritative means Authoritative heritability estimates and genetic correlations though spurious continued to imply that obvious racial and class inequalities including their dire health effects were natural and acceptable White people often attempted to unmark their racial identity and assumed that of the uniquely normal people as though an act of anti racism Frankenberg shows On the contrary it served to deny their skin color privileges while enjoying benefits of ongoing structural racism as the only real complete human beings in the room This book uses an ethnology of anthropology to show White people s equivocal views of other s equality in their formal analyses museum collections and exhibitions and treatment of colleagues in recent times They remained deliberately deaf to critical African diasporic scholarship Thus Unmarking gives an anthropological analysis of the social history of White supremacy and shows what it is like for some to confront it In constructing this historical and sociological counternarrative the author provides a critical new social history that illuminates a tangled and turgid past for contemporary readers students and researchers with vital insights for anthropology sociology history cultural studies philosophy and American studies      *The Renaissance* Walter Pater, 1873      **the dance of life** havelock ellis , 1923      **Anthology of American Negro Literature** Victor Francis Calverton, 1929      **The Red and the Black** Stendhal, 1926 The son of a carpenter Julian Sorel is inspired by the writings of Napoleon to conquer the heights of society His initial plan to work his way up through the church is however thwarted when he is forced to accept employment as a tutor and this rash social entrepreneur certainly has not considered the dangers of

falling in love Stendhal's novel is an amusing and piquant study of hypocrisy and free will in post Napoleonic France

*Buddenbrooks* Thomas Mann, 1924      **The Canterbury Tales** Geoffrey Chaucer, 1290 Chaucer's work begins at the Tabard Inn in Southwark England where a group of pilgrims have assembled on their way to Canterbury Harry Bailly the innkeeper suggests a contest whoever tells the best tale will win a supper when they reach Canterbury      **Racial**

**Segregation and Eugenical Science Between the Wars** Michael L. Blakey, 2025-07-18 This volume examines the rise and decline of racial science and its relationship to the political and social imposition of Jim Crow in the American South a racialized code of laws grounded upon an inherently racist and prejudicial pseudoscience The author argues here that the study of human beings within the emerging 18th and 19th century institutions of Western science was corrupted by the limited social intuitions of its enslaving colonizing and elitist members Western science and White societies plowed forward in continued ideological adherence to a biodeterministic imagination to justify slavery then Jim Crow racial segregation immigration restriction and other deadly and exploitative eugenical solutions of Social Darwinist thought The story is further complexified by the countervailing theories and voices of Black and Jewish intellectuals in the social and biocultural sciences in the 19th and 20th centuries such as Frederick Douglass W E B Du Bois and Montague Cobb These had profound consequences not only for the social sciences but also for the cultural life of Black Americans in the aftermath and afterlife of slavery At the same time even here the author discloses that the racialized dimensions of social science could not be fully exorcised as social science continued to construct soft line racism in that it selectively primitivized darker people and omitted White racism and colonialism from their human story African American social scientists and historians brought White racism and Black modernity to the fore Eugenics had begun to paint marginal White people Jewish and Italian immigrants to the United States as natural inferiors to Nordics or Aryans with devastating consequences in World War II Europe As the War ended the world community began its turn against racism in science and society In constructing this historical and sociological counternarrative the author provides a critical new social history that illuminates a tangled and turgid past for contemporary readers students and researchers with vital insights for anthropology sociology history cultural studies philosophy and American studies      **Gods of the Upper Air** Charles King, 2019-08-06 NEW YORK TIMES BESTSELLER 2020 Anisfield Wolf Book Award Winner Finalist for the National Book Critics Circle Award From an award winning historian comes a dazzling history of the birth of cultural anthropology and the adventurous scientists who pioneered it a sweeping chronicle of discovery and the fascinating origin story of our multicultural world A century ago everyone knew that people were fated by their race sex and nationality to be more or less intelligent nurturing or warlike But Columbia University professor Franz Boas looked at the data and decided everyone was wrong Racial categories he insisted were biological fictions Cultures did not come in neat packages labeled primitive or advanced What counted as a family a good meal or even common sense was a product of history and circumstance not of nature In *Gods of the Upper Air* a masterful narrative history

of radical ideas and passionate lives Charles King shows how these intuitions led to a fundamental reimagining of human diversity Boas's students were some of the century's most colorful figures and unsung visionaries Margaret Mead the outspoken field researcher whose *Coming of Age in Samoa* is among the most widely read works of social science of all time Ruth Benedict the great love of Mead's life whose research shaped post-Second World War Japan Ella Deloria the Dakota Sioux activist who preserved the traditions of Native Americans on the Great Plains and Zora Neale Hurston whose studies under Boas fed directly into her now classic novel *Their Eyes Were Watching God* Together they mapped civilizations from the American South to the South Pacific and from Caribbean islands to Manhattan's city streets and unearthed an essential fact buried by centuries of prejudice that humanity is an undivided whole Their revolutionary findings would go on to inspire the fluid conceptions of identity we know today Rich in drama conflict friendship and love *Gods of the Upper Air* is a brilliant and groundbreaking history of American progress and the opening of the modern mind

**The Charterhouse of Parma** Stendhal, 1925 Description of the Battle of Waterloo is background for this story of Italian love and intrigue

**A Century of Controversy** Elman R Service, 2014-05-10 A Century of Controversy Ethnological Issues from 1860 to 1960 is an assessment of the history of ethnology in terms of its intellectual progress with emphasis on the controversial issues that were broached between 1860 and 1960 Two related philosophical or theoretical poses that characterized the prominent ethnological thinkers of this period and earlier are related to this phenomenon One was the prevalent positivism the other the belief in human progress as a form of social cultural and mental evolution Comprised of 19 chapters this volume begins by looking at several eminent scholars dealing more closely with the subject of ethnology including Henry Maine and John F McLennan in Great Britain Johann J Bachofen in Switzerland and Fustel de Coulanges in France In particular the chapter examines the disagreement among Maine Bachofen McLennan and Fustel de Coulanges as to the nature of the earliest society and its form of marriage the nature of the evolutionary transformations of society especially from primitive society to civilization and the actual meaning and function of kinship terminology The next two chapters describe the positive useful discoveries as well as the mistakes and weaknesses of Lewis H Morgan's work with particular reference to his classificatory kinship nomenclature Subsequent sections focus on controversies surrounding kinship terminology social structure the origins of government the economic life of primitive peoples and society and culture This book will be of interest to scholars of anthropology archaeology and ethnology

Passages from the Diary of Samuel Pepys Samuel Pepys, 1923

*The Guermantes Way* Marcel Proust, The twittering of the birds at daybreak sounded insipid to Françoise Every word uttered by the maids upstairs made her jump disturbed by all their running about she kept asking herself what they could be doing In other words we had moved Certainly the servants had made no less noise in the attics of our old home but she knew them she had made of their comings and goings familiar events Now she faced even silence with a strained attention And as our new neighbourhood appeared to be as quiet as the boulevard on to which we had hitherto looked had been noisy the song distinct at a distance

when it was still quite faint like an orchestral motif of a passer by brought tears to the eyes of a Fran oise in exile And so if I had been tempted to laugh at her in her misery at having to leave a house in which she was so well respected on all sides and had packed her trunks with tears according to the Use of Combray declaring superior to all possible houses that which had been ours on the other hand I who found it as hard to assimilate new as I found it easy to abandon old conditions I felt myself drawn towards our old servant when I saw that this installation of herself in a building where she had not received from the hall porter who did not yet know us the marks of respect necessary to her moral wellbeing had brought her positively to the verge of dissolution She alone could understand what I was feeling certainly her young footman was not the person to do so for him who was as unlike the Combray type as it was possible to conceive packing up moving living in another district were all like taking a holiday in which the novelty of one s surroundings gave one the same sense of refreshment as if one had actually travelled he thought he was in the country and a cold in the head afforded him as though he had been sitting in a draughty railway carriage the delicious sensation of having seen the world at each fresh sneeze he rejoiced that he had found so smart a place having always longed to be with people who travelled a lot And so without giving him a thought I went straight to Fran oise who in return for my having laughed at her tears over a removal which had left me cold now shewed an icy indifference to my sorrow but because she shared it The sensibility claimed by neurotic people is matched by their egotism they cannot abide the flaunting by others of the sufferings to which they pay an ever increasing attention in themselves Fran oise who would not allow the least of her own ailments to pass unnoticed if I were in pain would turn her head from me so that I should not have the satisfaction of seeing my sufferings pitied or so much as observed It was the same as soon as I tried to speak to her about our new house Moreover having been obliged a day or two later to return to the house we had just left to retrieve some clothes which had been overlooked in our removal while I as a result of it had still a temperature and like a boa constrictor that has just swallowed an ox felt myself painfully distended by the sight of a long trunk which my eyes had still to digest Fran oise with true feminine inconstancy came back saying that she had really thought she would stifle on our old boulevard it was so stuffy that she had found it quite a day s journey to get there that never had she seen such stairs that she would not go back to live there for a king s ransom not if you were to offer her millions a pure hypothesis and that everything everything that is to say to do with the kitchen and usual offices was much better fitted up in the new house Which it is high time now that the reader should be told and told also that we had moved into it because my grandmother not having been at all well though we took care to keep this reason from her was in need of better air was a flat forming part of the H tel de Guermantes
