**The Power of Language in the Making of International Law** Stephane Beaulac, 2004-04-01 The purpose of this book is to enter into the history of the mental social phenomena that are the word sovereignty and the myth of Westphalia Given the circularity of language the project proposes to examine the reality creating role of language as an organic instrument of social power within humanity In semiotic terms the complex structures of words and also myths form part of sign systems in which they can both represent and create reality These are the passive and active functions of language which explain that words and myths not only represent and describe reality but may also play a leading part in creating and transforming reality thus demonstrating and being used to carry fabulous power within humanity The Peace of Westphalia is analysed to show that in spite of what actually took place in 1648 Westphalia has had an incredible social effect in international law standing for the proposition that it signalled the beginning of a new era based on state sovereignty However it is argued that Westphalia constitutes a myth an aetiological myth which has provided a way for society to explain itself to itself that is a way for international society to explain its genesis to itself As regards sovereignty it is shown that Jean Bodin introduced the word in *Six Livres* for the purpose of having the French ruler enjoy supreme power in the hierarchical organisation structure of society This is the original creative and transforming social effect on the shared consciousness of humanity for which the linguistic sign must be credited which has continued unaltered to this day With respect to *Droit des Gens* it is demonstrated that Emer de Vattel utilised and actually changed the reality associated with sovereignty also for a specific reason namely to carry out its externalisation the ruling entity was now to enjoy exclusive power to govern which entailed being the sole representative of the people both internally and externally and also meant that it could not be submitted to any foreign state or to any higher law externally Vattel's use of the word has had an extraordinary effect on the shared consciousness of society including that of the emerging international society which is still very much present today These two archetype cases in which sovereignty developed show how this word has really had two paradigms over the years that is it has represented and created the two distinct realities of the internal and the international

*Paradigm Lost?* David Jablonsky, 1993 After every momentous event there is usually a transition period in

which participants in the events whether individuals or nation states attempt to chart their way into an unfamiliar future In the United States in this century there are three such transitions each focused on America's role in the international arena After World War I the American people specifically rejected the global role for the United States implicit in Woodrow Wilson's strategic vision of collective security In contrast to this return to normalcy after World War II the United States moved inexorably toward international leadership in response to the Soviet threat The result was an acceptance of George Kennan's strategic vision of containing the Soviet Union on the Eurasian landmass and the subsequent bipolar confrontation of the two superpowers in a twilight war that lasted for over 40 years Sometime in the penultimate decade of the 20th century the United States and its allies won the cold war Once again in the current transition period the primary questions revolve around the management of power and America's role in global politics Once again there are the issues of change and continuity In terms of change the cold war set in train a blend of integrative and disintegrative forces and trends that are adding to the complex tensions of the current transition The integrative force that increasingly linked global economies in the cold war for instance also holds out the spectral potential of global depression or at the very least nations more susceptible to disintegrative actions as the Iraqi invasion of Kuwait demonstrated In a similar manner the advances in communications and transportation that have spread the results of medical and scientific discoveries around the world are countered by the malign transnational results of nuclear technology the drug trade terrorism AIDS and global warming

**Great Power Peace and American Primacy** J. *Patriots Against Fashion* A. Maxwell, 2014-08-05 During the era of the French revolution patriots across Europe tried to introduce a national uniform This book the first comparative study of national uniform schemes discusses case studies from Austria Bulgaria England France Germany Hungary Italy the Netherlands Spain Sweden Turkey the United States and Wales

*A Protestant Theology of Religious Pluralism* Livingstone Thompson, 2009 In this book three main things have been accomplished First it locates the emergence of religious pluralism as a problem for Christian theology Secondly it shows the critical weaknesses in the approaches to pluralism that we find in the works of Gavin D Costa George Lindbeck and John Hick all major players in the field of religious pluralism Retrieving theological material from seventeenth century Comenius and eighteenth century Zinzendorf the book shows that the Protestant tradition has suitable theological material that can better serve the development of a theology of religious pluralism Thirdly the book enters into dialogue with Islam and highlights exciting new approaches to addressing the issues of salvation the Qur'an and Christology One critical outcome of the book is that it breaks

new ground in showing the limitations of liberation theology and proposes a fascinating new pluralism sensitive hermeneutical approach to contextual theology *Incarceration and Slavery in the Middle Ages and the Early Modern Age* Albrecht Classen, 2021-10-19 People in the Middle Ages and the early modern age more often suffered from imprisonment and enslavement than we might have assumed *Incarceration and Slavery in the Middle Ages and the Early Modern Age* approaches these topics from a wide variety of perspectives and demonstrates collectively the great relevance of the issues involved Both incarceration and slavery were and continue to be most painful experiences and no one was guaranteed exemption from it High ranking nobles and royalties were often the victims of imprisonment and at times had to wait many years until their ransom was paid Similarly slavery existed throughout Christian Europe and in the Arab world However while imprisonment occasionally proved to be the catalyst for major writings and creativity slaves in the Ottoman empire and in Egypt succeeded in rising to the highest position in society Janissaries Mamluks and others *Magic, Body and the Self in Eighteenth-Century Sweden* Jacqueline Van Gent, 2009 Contrary to previous assumptions magic remained an integral part of everyday life in Enlightenment Europe This book demonstrates that the endurance of magical practices both benevolent and malevolent was grounded in early modern perceptions of an interconnected body self and spiritual cosmos Drawing on eighteenth century Swedish witchcraft trials which are exceptionally detailed these notions of embodiment and selfhood are explored in depth The nuanced analysis of healing magic the role of emotions the politics of evidence and proof and the very ambiguity of magical rituals reveals a surprising syncretism of Christian and pre Christian elements The book provides a unique insight to the history of magic and witchcraft the study of eighteenth century religion and culture and to our understanding of body and self in the past *Selected Works of Eliza Haywood, Part II Vol 2* Alex Pettit, 2024-08-07 This text reprints selected non fictional works by Haywood with particular attention to the journalism criticism and conduct and advice material Here Haywood explicates and defends ideas on gender and culture that she develops obliquely elsewhere
