*The Late Medieval Landscape of North-east Scotland* Colin Shepherd,2021-10-31 The landscape of the north east of Scotland ranges from wild mountains to undulating farmlands from cosy quaint fishing coves to long sandy bays This landscape witnessed the death of MacBeth the final stand of the Comyns earls of Buchan against Robert the Bruce and the last victory in Britain of a catholic army at Glenlivet But behind these momentous battles lie the quieter histories of ordinary folk farming the land and supping their local malts Colin Shepherd paints a picture of rural life within the landscapes of the north east between the 13th and 18th centuries by using documentary cartographic and archaeological evidence He shows how the landscape was ordered by topographic and environmental constraints that resulted in great variation across the region and considers the evidence for the way late

medieval lifestyles developed and blended sustainably within their environments to create a patchwork of cultural and agricultural diversity. However, these socio-economic developments subsequently led to a breakdown of this structure, resulting in what Adam Smith in the 18th century described as oppression. The 12th century Renaissance, the Protestant Reformation, and the Industrial Revolution are used here to define a framework for considering the cultural changes that affected this region of Scotland. These include the dispossession of rights to land ownership that continue to haunt policy makers in the Scottish government today. While the story also shows how a regional cultural divergence recognized here can undermine big theories of socio-political change when viewed across the wider stage of Europe and the Americas.

**From British Peasants to Colonial American Farmers** Allan Kulikoff, 2014-02-01. With this book Allan Kulikoff offers a sweeping new interpretation of the origins and development of the small farm economy in Britain's mainland American colonies. Examining the lives of farmers and their families, he tells the story of immigration to the colonies, traces patterns of settlement, analyzes the growth of markets, and assesses the impact of the Revolution on small farm society. Beginning with the dispossession of the peasantry in early modern England, Kulikoff follows the immigrants across the Atlantic to explore how they reacted to a hostile new environment and its Indian inhabitants. He discusses how colonists secured land, built farms, and bequeathed those farms to their children. Emphasizing commodity markets in early America, Kulikoff shows that without British demand for the colonists' crops, settlement could not have begun at all. Most important, he explores the destruction caused during the American Revolution, showing how the war thrust farmers into subsistence production and how they only gradually regained their prewar prosperity.

**The Georgian Triumph, 1700-1830** Michael Reed, 2024-11-01. In *The Georgian Triumph 1700-1830*, originally published in 1983, Michael Reed re-creates the ambience of eighteenth-century Britain, a period of astonishing change and paradoxically of massive stability. Both the change and the stability were reflected in the landscape. Dr. Reed explores the visual impact on the landscape of the adoption of new ideas and practices. These range from the acceptance of the Palladian style of architecture and its gradual replacement by a taste for Gothic Picturesque or Chinese designs, to the practical exploration of the power of atmospheric pressure and improvements in road-making techniques, and the design of water wheels. He describes the feel of what it must have been like to live through the years which saw the

beginning of the end for the old medieval society and the birth of a modern industrial nation Traditional ways of life were slowly abandoned as ancient open fields were enclosed and divided up by straight roads and hedgerows Changes in the moral climate led to the gradual disappearance of village feasts and the suppression of cockfighting and bull running while other more acceptable pastimes such as horse racing and cricket acquired rules and institutions The book shows that these changes were brought about by people at work and at play going about their everyday affairs they wrote and re wrote upon the landscape the autobiography of the society of which they formed a part reflecting its aspirations ideals and achievements

**Society and Economy in Modern Britain 1700-1850** Richard Brown,2002-11-01 For both contemporaries and later historians the Industrial Revolution is viewed as a turning point in modern British history There is no doubt that change occurred but what was the nature of that change and how did it affect rural and urban society Beginning with an examination of the nature of history and Britain in 1700 this volume focuses on the economic and social aspects of the Industrial Revolution Unlike many previous textbooks on the same period it emphasizes British history and deals with developments in Wales Scotland and Ireland in their own right It is the emphasis on the diversity not the uniformity of experience on continuities as well as change in this crucial period of development which makes this volume distinctive In his companion title Richard Brown completes his examination of the period and looks at the changes that took place in Britain s political system and in its religious affiliations

**Agriculture, Economy and Society in Early Modern Scotland** Robert Allan Houston,2024 Showcases the latest research on Scotland s rural economy and society Early modern Scotland was predominantly rural Agriculture was the main occupation of most people at the time so what happened in the countryside was crucial economically socially and culturally The essays collected here focus on the years between around 1500 and 1750 This period although before the main era of agricultural improvement in the late eighteenth and early nineteenth centuries

was nevertheless far from static in terms of agrarian development. Specific topics addressed include everyday farming practices, investment, landlords, tenants, and estate management, and the cultural context within which agriculture was imagined. The disastrous famine of 1622-23 is analysed in detail. The volume is completed by a comprehensive survey of recent historiography, setting agricultural history in its broader context.
