Understanding primary school teachers' mathematical knowledge for teaching Yasmin Sitabkhan, Aida Alikova, Nurgul Toktogulova, Adema Zholdoshbekova, Wendi Ralaingita, Jonathan Stern, 2025-05-13 We

present the results from an exploratory study that aimed to measure teachers specialized knowledge in early mathematics during a pilot of an educational intervention using the Foundational Mathematical Knowledge for Teaching FMKT survey The survey was administered to 323 teachers in the Kyrgyz Republic in 2021 We delve into survey results at two timepoints pre and post intervention to showcase the areas in which the intervention was successful and identify ongoing challenges in teacher knowledge We found that the FMKT provided detailed specific information on teacher learning and is an example of one way to center teacher knowledge in an instructional intervention

Tasks in Primary Mathematics Teacher Education Barbara Clarke, Barbro Grevholm, Richard Millman, 2008-10-25 Tasks in Primary Mathematics Teacher Education is intended to advance relevant research and innovative international practices in the preparation and professional development of mathematics teachers Emerging from discussion at the ICMI study on teacher professional development this volume focused on primary and elementary teachers culls a richness that can only be found by gathering wisdom from varied experiences around the world The choice of tasks and the associated pedagogies is a key aspect of teaching and learning mathematics Arguing that what students learn is largely defined by the tasks they are given several major themes are presented One such major strand the form function and

focus of tasks is discussed throughout several chapters offering analysis discussion of implementation and exemplars of a broader category of illustrative techniques for developing critical understanding

Mathematical Knowledge in Teaching Tim Rowland, Kenneth Ruthven, 2011-01-06 The quality of primary and secondary school mathematics teaching is generally agreed to depend crucially on the subject related knowledge of the teacher However there is increasing recognition that effective teaching calls for distinctive forms of subject related knowledge and thinking Thus established ways of conceptualizing developing and assessing mathematical knowledge for teaching may be less than adequate These are important issues for policy and practice because of longstanding difficulties in recruiting teachers who are confident and conventionally well qualified in mathematics and because of rising concern that teaching of the subject has not adapted sufficiently The issues to be examined in Mathematical Knowledge in Teaching are of considerable significance in addressing global aspirations to raise standards of teaching and learning in mathematics by developing more effective approaches to characterizing assessing and developing mathematical knowledge for teaching
