Statistics for Applied Behavior Analysis Practitioners and Researchers David J. Cox, Jason C. Vladescu, 2023-06-17
Statistics for Applied Behavior Analysis Practitioners and Researchers provides practical and useful content for individuals who work directly with or supervise those who work directly with individuals with ASD. This book introduces core concepts and principles of modern statistical analysis that practitioners will need to deliver ABA services. The organization of the book works through the flow of behavior analytic service provision aiming to help practitioners read through research, evaluate intervention options, incorporate statistics in their analysis of time series intervention and assessment data, and effectively communicate assessment and intervention effects using statistics. As professionals who provide applied behavior analysis, ABA services are required to use evidence-based practices and make data-based decisions regarding assessments and interventions; this book will help them take a modern scientific approach to derive knowledge and make decisions based on statistical literacy. Describes the logic behind the many variations to statistically describe human behavior. Explains the conditions under which variations in statistical description are most appropriate. Highlights common methods for quantitatively determine the effectiveness of an intervention. Discusses the unique challenges of the time series data and reviews current solutions. Covers current standards in writing and presenting statistical effects of interventions. Reviews the application of statistical description for both single case and between group experimental designs.
