*Mathematics Assessment Sampler, Grades 3-5* J. D. Gawronski, Marthe Craig, 2005 The sample assessment items in this volume are sorted according to the strands of number and operations algebra geometry measurement and data analysis and probability Because one goal of assessment is to determine students abilities to communicate mathematically the writing team suggests ways to extend or modify multiple choice and short answer items to elicit students thinking The writers also present various rubrics as examples of how teachers might score extended response questions When students know in advance how their answers will be evaluated they will strive to meet expected criteria The hope is that teachers will find this material useful as they plumb their students thinking and consider how students responses can guide their instructional decisions

**Mathematics Assessment Sampler, Prekindergarten-grade 2** DeAnn Huinker, Lynn M. McGarvey, 2006

This sampler presents assessment tasks that are appropriate for use with students from age 4 to age 8 The book provides teachers of primary grades mathematics with examples of assessment tasks that reflect the various ways assessments can be used prior to during and following mathematics instruction Teachers can then consider the potential of these tasks to uncover the mathematical understandings of their students for the purpose of planning further instruction Each task can be altered by changing the context breaking the task into subparts limiting the scope or complexity of the task or extending the task to provide more of a challenge or enhance the depth of understanding being assessed
