Gao,Xianwei Liu,2021-07-11 Based on the fieldwork carried out at two elementary schools Merits School and Pioneer School
in northeastern China the monograph details how local schools enacted the New Mathematics Curriculum Reform that was
launched in early 2000 The trajectory of the reform implementation at each school was plotted out Both schools resorted to a
long standing quality control mechanism i e teaching norms to operationalize the reform ideas The mechanism functioned by
placing teachers under measurable supervision and evaluation aligned with the reform The schools responded to the reform
following school people s raising practical concerns as well as the established school culture Merits School arrived at a two
faced strategy to cope with the reform Pioneer School managed to maintain a balance between promoting reform pedagogy
and maintaining good test rankings Both schools marginally involved parents in the implementation of the reform This study
suggests that to achieve success reformers need to place equal emphasis on the transformation of teachers as well as local
policymakers This book enriches the existing literature on the implementation of mathematics curriculum reform at the
school level and brings insights into the schools implementation decisions which will appeal to policymakers curriculum

Towards Gender Equity in Mathematics Education Gila Hanna,2006-04-11 THE REAL WORLD OF MATHEMATICS SCIENCE AND TECHNOLOGY EDUCATION In this Preface I would like to focus on what I mean by education and speak about the models and metaphors that are used when people talk write and act in the domain of education We need to look at the assumptions and processes that the models and metaphors implicitly and explicitly contain I feel we should explore whether

there is a specific thrust to mathematics education in the here and now and be very practical about it For me education is the enhancement of knowledge and understanding and there is a strong and unbreakable link between the two There seems little point in acquiring knowledge without understanding its meaning Nor is it enough to gain a deep understanding of problems without gaining the appropriate knowledge to work for their solution Thus knowledge and understanding are each necessary conditions for the process of education but only when they are linked will the process bear fruit Only in the balanced interplay of knowledge and understanding can we expect to achieve genuine education Classroom-Ready Rich Math Tasks, Grades K-1 Beth McCord Kobett, Francis (Skip) Fennell, Karen S.
