Silver Burdett Ginn Mathematics ,2001 **Silver Burdett Ginn Mathematics** ,1999 **The Mathematics Educator** ,2004 *Increasing Student Success in Developmental Mathematics* National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Division of Behavioral and Social Sciences and Education, Board on Mathematical Sciences and Analytics, Board on Science Education, 2019-12-18 The Board on Science Education and the Board on Mathematical Sciences and Analytics of the National Academies of Sciences Engineering and Medicine convened the Workshop on Increasing Student Success in Developmental Mathematics on March 18 19 2019 The Workshop explored how to best support all students in postsecondary mathematics with particular attention to students who are unsuccessful in developmental mathematics and with an eye toward issues of access to promising reforms and equitable learning environments The two day workshop was designed to bring together a variety of stakeholders including experts who have developed and or implemented new initiatives to improve the mathematics education experience for students The overarching goal of the workshop was to take stock of the mathematics education community's progress in this domain Participants examined the data on students who are well served by new reform structures in developmental mathematics and discussed various cohorts of students who are not currently well served those who even with access to reforms do not succeed and those who do not have access to a reform due to differential access constraints Throughout the workshop participants also explored promising approaches to bolstering student outcomes in mathematics focusing especially on research and data that demonstrate the success of these approaches deliberated and discussed barriers and opportunities for effectively serving all students and outlined some key directions of inquiry intended to address the prevailing research and data needs in the field This publication summarizes the presentations and discussion of the workshop *Teaching Math to Multilingual Students, Grades K-8* Kathryn B. Chval, Erin Smith, Lina Trigos-Carrillo, Rachel J. Pinnow, 2021-01-07 Using strengths based approaches to support development in mathematics It's time to re imagine what's possible and celebrate the brilliance multilingual learners bring to today's classrooms Innovative teaching strategies can position these learners as leaders in mathematics Yet as the number of multilingual learners in North American schools grows many teachers have not had opportunities to gain the competencies required to teach these learners effectively especially in disciplines such as mathematics Multilingual learners historically called English Language Learners are expected to interpret the meaning of problems analyze make conjectures evaluate their progress and discuss and understand their own approaches and the approaches of their peers in mathematics classrooms Thus language plays a vital role in mathematics learning and demonstrating these competencies in a second or third language is a challenging endeavor Based on best practices and the authors years of research this guide offers practical approaches that equip grades K 8 teachers to draw on the strengths of multilingual learners partner with their families and position these learners for success Readers will find A focus on

multilingual students as leaders A strength based approach that draws on students life experiences and cultural backgrounds An emphasis on maintaining high expectations for learners capacity for mastering rigorous content Strategies for representing concepts in different formats Stop and Think questions throughout and reflection questions at the end of each chapter Try It Implementation activities student work examples and classroom transcripts With case studies and activities that provide a solid foundation for teachers growth and exploration this groundbreaking book will help teachers and teacher educators engage in meaningful humanized mathematics instruction Scott Foresman-Addison Wesley Mathematics ,2008

Learning and Teaching Early Math Douglas H. Clements,Julie Sarama,2009-04-01 In this important new book for pre and in service teachers early math experts Douglas Clements and Julie Sarama show how learning trajectories help teachers become more effective professionals By opening up new windows to seeing young children and the inherent delight and curiosity behind their mathematical reasoning learning trajectories ultimately make teaching more joyous They help teachers understand the varying level of knowledge and thinking of their classes and the individuals within them as key in serving the needs of all children In straightforward no nonsense language this book summarizes what is known about how children learn mathematics and how to build on what they know to realize more effective teaching practice It will help teachers understand the learning trajectories of early mathematics and become quintessential professionals Foundations of Education Leslie S. Kaplan,William A. Owings,2022-01-21 Foundations of Education makes core topics in education accessible and personally meaningful to students pursuing a career within the education profession The Third Edition offers readers the breadth of coverage scholarly depth and conceptual analysis of contemporary issues that will help them gain a realistic and insightful perspective of the field **Leading for Equity** Stacey M. Childress,Denis P. Doyle,David A. Thomas,2009-07-01 Leading for Equity tells the compelling story of the Montgomery County Maryland Public Schools and its transformation in less than a decade into a system committed to breaking the links between race and class and academic achievement In chapters organized around six core themes the authors lay out the essential elements of MCPS s success They identify key lessons other districts can draw from MCPS s experience and offer a framework for applying them A dramatic departure from business as usual MCPS has won nationwide attention as a compelling model for tackling the achievement and opportunity issues that confront our nation as a whole **Master Mathematics Teachers** Zhenzhen Miao,Christian Bokhove,David Reynolds,2023-08-21 This practical guide invites teachers to take a journey towards masterly mathematics teaching using the experiences and lessons learnt across five Chinese provinces Anhui Beijing Jiangsu Jiangxi and Tianjin On this journey you will gain a thorough understanding of 1 the quality and characteristics of master mathematics teachers teaching 2 the quality of mathematics learning they have nurtured amongst their students in affective metacognitive and cognitive dimensions and 3 the teaching learning mechanisms that underpin excellent performance in the three dimensions Alongside the quantitative and qualitative evidence on educational excellence you will also delve deep into the trajectories and processes of professional

development that generate professional excellence amongst master mathematics teachers and their peers within and across primary schools up and down China Building on data collected with 70 master mathematics teachers and 3 178 students and from teaching research events at the school municipal provincial and national levels the Master Mathematics Teachers MasterMT project is to date the first that has looked at the legendary tribe of master mathematics teachers in China at such a large scale and with such breadth and depth The book offers invaluable insights for any teacher or teacher educator who wants to improve mathematics teaching and learning and generate educational and professional excellence in primary schools and beyond More information on the Master Mathematics Teachers MasterMT project can be accessed at <https://mastermt.org>

Wade Boykin,Pedro

Noguera,2011-09-22 Unless we believe that those who have more are inherently superior to those who have less we should be troubled by the fact that patterns of achievement are often fairly predictable particularly with respect to students race and class In *Creating the Opportunity to Learn* Wade Boykin and Pedro Noguera help navigate the turbid waters of evidence based methodologies and chart a course toward closing and eliminating the academic achievement gap Turning a critical eye to current and recent research the authors present a comprehensive view of the achievement gap and advocate for strategies that contribute to the success of all children Boykin and Noguera maintain that it is possible to close the achievement gap by abandoning failed strategies learning from successful schools and simply doing more of what the research shows is most effective Success is founded on equity but equity involves more than simply ensuring students have equal access to education equity also entails a focus on outcomes and results If we want to bring about significant improvements in those outcomes we have to do more to address the context in which learning takes place In short we must create schools where a child s race or class is no longer a predictor for how well he or she might perform **Journal of Developmental Education** ,2017
