Teaching Mathematics 3-5 Sue Gifford, 2005-08-16 With freshness humour and originality Sue Gifford demonstrates the interactive strategies that are required to teach mathematics to young children. The text is both refreshingly free from conventional wisdom and solidly grounded in recent research on learning and teaching early mathematics. At the same time it is unfailing in its accuracy in uncovering children's own humour and instinct for subverting teacherly overtures. Given the demonstrated lack of spontaneous mathematics in early childhood setting this

assembled collage of children's own observations activities and comments is in itself a work of art Professor Carol Aubrey
Institute of Education University of Warwick UK What are the most important aspects of mathematics for young children to
learn How do children learn mathematics How can adults best teach mathematics to children so young The book informs
practitioners students and parents about how three to five year olds learn mathematics and shows them how best to develop
enjoyable mathematical learning in early years settings The book includes a summary of relevant research and considers
issues relating to current practice This book Establishes principles for teaching mathematics to young children Takes into
account the way children learn including social emotional physical and cognitive aspects Helps practitioners find the middle
ground between not initiating enough mathematical activity and being too directive Suggests principles and frameworks for
planning and assessment The book places particular emphasis on adult initiated number focused activities and playful
challenging and sensitive teaching strategies to engage younger children The strategies are based on research and work with
practitioners and are illustrated by children's own responses such as making number jokes It covers key areas of
mathematics including number shape and space measures and problem solving with appropriate expectations and common
difficulties as well as suggested activities Essential reading for those teaching or preparing to teach mathematics to young
children as well as parents interested in the mathematical education of their children
