Gail Clark,2005-05-01 The black footed ferret once thought extinct was rediscovered in Wyoming in 1981 In this book Tim Clark tells the story of subsequent efforts to save the black footed ferret showing how it points up the necessity of finding new ways to conserve and restore species According to Clark the problems facing conservation are not fundamentally biological but stem from human systems policy decisions organizational priorities and professional rivalries The focus in conservation he says must shift from science to practical problem solving Clark first describes and analyzes efforts to restore the black footed ferret after 1981 and looks at the processes people institutions and programs that were involved in that endeavor Finding that the ferret case illustrates many things that go wrong in the implementation of complex environmental policy Clark then proposes fresh approaches to endangered species recovery He gives guidelines for improving decisionmaking and development of policies for devising organizational strategies and structures that are more conducive to learning and for a new civic professionalism that will raise the standards for performance and better meet society s needs This policy oriented approach he contends will open up new avenues methods and hope for species recovery A very important work that will be widely read discussed and argued Steven J Bissell Colorado Division of Wildlife A valuable contribution to a general science policy field where clear and sophisticated thinking is rare Garry D Brewer School of Natural Resources and the Environment University of Michigan Ann Arbor *The Encyclopedia of Historic and Endangered Livestock and Poultry Breeds* Janet Vorwald Dohner,2001-01-01 The need to preserve farm animal diversity is increasingly urgent says the author of this definitive book on endangered breeds of livestock and poultry Farmyard animals may hold critical keys for our survival Jan Dohner warns and with each extinction genetic traits of potentially vital importance to our agricultural future or to medical progress are forever lost **BOOK JACKET** **Endangered Species Technical Bulletin** ,1986 **Captive Breeding** James Wyman Carpenter,1987 **The Mating Game** Bonnie Vanak,2017-03-10 **The Heart of the Wild** Ben A. Minteer,Jonathan B. Losos,2024-08-13 Timely and provocative reflections on the future of the wild in an increasingly human world The Heart of the Wild brings together some of today s leading scientists humanists and nature writers to offer a thought provoking meditation on the urgency of learning about and experiencing our wild places in an age of rapidly expanding human impacts These engaging essays present nuanced and often surprising perspectives on the meaning and value of wildness amid the realities of the Anthropocene They consider the trends and forces from the cultural and conceptual to the ecological and technological that are transforming our relationship with the natural world and sometimes seem only to be pulling us farther away from wild places and species with each passing day The contributors make impassioned defenses of naturalism natural history and nature education in helping us to rediscover a love for the wild at a time when our connections with it have frayed or been lost altogether Charting a new path forward in an era of ecological uncertainty The Heart of the Wild reframes our understanding of nature and our responsibility to learn from and sustain it as the human footprint sinks ever deeper into the landscapes around us With contributions by Bill Adams Joel Berger Susan
